Npay Payment Terminals

Production Version 23.1.3 │ 09/2023

Previous versions in production 23.1.0

Platform version: 0063

Table of Contents

1. INTRODUCTION

The purpose of this release is to introduce improvements to the previous production version, 23.1.0. The production release version is 23.1.3.

The previous release included the following updates:

- Fix JSONPOS Abort handling in idle that prevented starting new transactions

- Fix crash when trying to print report after losing network connection

- Fix pre-inserted card handling for ECR-integrated terminals

- Improve Wi-Fi configurator usability for the V3M2 Mobile terminal

- Improvements to the menu layout

- Speed up connection establishment after startup for terminals using both 4G and Wi-Fi

- Increase the size of status bar icons

- Update the Npay logo and add a logo to the terminal initialization screen

- Add Italian language support

- Other fixes and improvements

For information or questions regarding this release, please contact your local support team or Account Manager. For further information on the terminal range, please consult the user guides/quick guides on the Nets website.

The information contained in this document is confidential and only aimed at the intended recipient. The information shall not be used, published, or redistributed without the prior, written consent of Nets A/S.

This release is for:

› The Npay software
› Terminal models: V3M2 Mobile, V3P3 Cashier (Castles Technology)
