1. INTRODUCTION

The purpose of this release is to introduce improvements to the previous production version, 24.15.0. The production release version is 26.1.0.

The previous release included the following updates:

- › Diagnostics improvements
- › JSONPOS response_to field is now dropped (unless configured)
- › Performance improvements (esp. receipt generation)
- › Progress bar for software updates

The information shall not be published, or redistributed without the prior, written consent of Nets A/S.

This release is for:

- › The Npay software
- › Payment Terminal models: V3M2 Mobile, V3P3 Cashier (Castles Technology)

2. NEW FEATURES

2.1 *Release Highlights*

The following updates were made in this release:

- › Payment Card Core update to v5.0.0
- › Firmware update to 1Y20
- › PIN entry improved
- › Display performance improvements
- › Printer performance improvements
- › Terminal info shows ethernet MAC address even when disconnected
- › JsonPos: fix missing transaction data in error response
- › Standalone configuration: do not show transaction of previous terminal id, if terminal id has changed

3. SOFTWARE SECURITY IMPLEMENTATION GUIDE:

- › Payment Card Core v5.0.0: [Implementation guide](#)
