1. INTRODUCTION

The purpose of this release is to introduce improvements to the previous production version, 23.4.0. The production release version is 24.1.0.

The previous release included the following updates:

- Workaround for card removal detection issues
- Allow zero amount in JSONPOS DisplayScreen generic_enter_sum
- Payment Card Core update to 4.3.1.1
- Other fixes and improvements
- For information or questions regarding this release, please contact your local support team or Account Manager. For further information on the terminal range, please consult the user guides/quick guides on the Nets website.

The information shall not be published, or redistributed without the prior, written consent of Nets A/S.

This release is for:

› The Npay software

› Payment Terminal models: V3M2 Mobile, V3P3 Cashier (Castles Technology)
