Workplace Recycling Law Wales

- Introduction
- The new law
- Advice available for waste collectors
- Advice for your customers
- Case study

About WRAP

- WRAP (the Waste and Resources Action Programme) is a climate action NGO working around the globe to tackle the causes of the climate crisis and give the planet a sustainable future. We were established in the UK in 2000; we now work in 40+ countries.
 - Working around the globe with governments, businesses, and citizens, our mission is to make the world a more sustainable place. We bring people together, we act on the facts, and we drive change.
 - We are working with Welsh Government to provide support to implement the new Workplace Recycling law.
-

Webinar housekeeping

- Please ask questions – use the Q&A button
- We will answer questions at the end
- If there are any we don't get to we will send replies after the webinar
- We will be sharing the recording of the webinar
- A copy of the slides will be available (in English and Welsh)

New Regulations - 6th April 2024*

- All workplaces such as businesses, public sector and charities will need to **separate their recyclable materials** in the same way most households already do.
- **Bans on the disposal of all food waste to sewer** from non-domestic premises.
- **Bans** on specified **separate recyclable** waste streams going to **incineration plants and landfills**.

Applies to all waste and recycling collectors and processors who manage **household-like waste** from workplaces.

**Hospitals (NHS and private) have an additional two years to comply with the separation requirements. The ban on food waste to sewer applies from 6th April 2024.*

Household-like waste

- Waste materials like those found in households
- Commonly collected by local authorities from households
- Also includes unsold small waste electricals and unsold textiles

Does not include:

- Construction waste
- Industrial waste
- Agricultural waste

Except for commonly recycled waste materials like those found in households.

Why?

- Wales is already really good at household recycling, currently 1st among the UK nations for household recycling – 65%.
- 3rd best nation in the world for household recycling.
- The aim is to ensure high recycling rates across all sectors, not only households.
- Over 70% of materials in the commercial waste stream could be recycled.

Why?

Recycling reduces carbon emissions

- 45% of carbon emissions are due to products we purchase
- 90% of biodiversity loss and water stress comes from resource extraction

Increasing recycling also:

- increases the amount and quality of recycled materials that can then be used by Welsh manufacturers and reduce the use of virgin materials;
 - supports workplaces to minimise waste and potentially save money;
 - helps the economy to create a greener Wales.
-

Why?

This will enable a consistent recycling system wherever anyone works, rests or plays.

Why separate materials?

- To promote high quality recycling
 - More likely to result in closed-loop recycling
 - Better environmental outcomes
-

WHO?

- Including:
- agricultural premises;
 - bars and public houses;
 - bed and breakfasts, hotels;
 - bus stations, railway stations, seaports, airports, heliports;
 - campsites and caravan parks (but not individual caravans);
 - care homes, residential care homes and nursing homes;
 - cinemas;
 - community centres and village halls;
 - construction sites;
 - educational establishments such as universities, colleges and schools;
 - entertainment and sports venues, including leisure centres;
 - factories;
 - film and television production sets;
 - garages for vehicle servicing and repair;
 - garden centres;
 - heritage buildings;
 - holiday parks and resorts;
 - hospitals;
 - libraries and museums;
 - offices;
 - outdoor markets
 - pharmacies, doctors' surgeries, dental surgeries, optometrists, opticians, podiatrists and other primary care facilities;
 - places of worship;
 - prisons;
 - restaurants and cafes;
 - service stations and petrol stations;
 - shops and shopping centres;
 - showgrounds;
 - sports grounds and stadia;
 - take aways & mobile food vendors;
 - theatres and arts venues;
 - venues for temporary events such as festivals and shows, including outdoors events;
 - warehouses; and
 - workshops.

If you mainly have an on-line presence, you will still need to comply with the changes on any premises that you use.

The new laws have three parts

1. The separation requirements
2. Incineration and landfill bans
3. A ban on the disposal of food waste to sewer

1. The separation requirements

The following materials will need to be collected separately:

- Paper and card
- Glass
- Metal, plastic, and cartons (and other similar packaging, for example coffee cups)
- Food – only for premises that produce more than 5kg of food waste a week
- Unsold small waste electrical and electronic equipment (sWEEE)
- Unsold textiles

Materials to be kept separate at point of presentation to waste collector
Separately collected recyclable materials to be kept separate and not mixed

Code of practice

- [Separate Collection of Waste Materials for Recycling: A Code of Practice for Wales | GOV.WALES](#)
- Practical guidance on how to comply.
- It is admissible as evidence in any legal proceedings and must be taken into account by a court when determining relevant questions.

Collector's separation requirements

- Collect each recyclable waste stream separately
 - Collection and subsequent handling of the waste must be sufficient to ensure that separation is maintained
 - Unless you are a Local Authority, you do not have to collect the full range of recyclable waste streams
-

Glass

Glass	
<i>What should be placed in the waste stream</i>	<i>What should NOT be placed in the waste stream includes:</i>
<p>Glass bottles used as packaging Glass jars used as packaging</p> <p>but excluding any waste categorised as hazardous under regulation 6 of the Hazardous Waste (Wales) Regulations 2005 or containing residues of, or contaminated by, waste or substances categorised as hazardous under regulation 6 of those Regulations</p>	<p>Crockery (including ceramics and china) Drinking glasses Glass and ceramic cookware Light bulbs Metal jar lids or bottle tops (which should be placed in the metal stream) Mirrors Nail varnish bottles Sheet glass (including windowpanes, picture frame glass, car windscreens)</p>

[Annex 1: Separate Collection of Waste Materials for Recycling: A Code of Practice for Wales \(gov.wales\)](#)

2. Incineration and landfill bans

From 6 April the following bans will be in place:

Incineration (separately collected materials)

- Paper and card
- Metals
- Plastic
- Glass
- Cartons
- Food
- All sWEEE
- Unsold textiles

Landfill (separately collected materials)

- Paper and card
 - Metals
 - Plastic
 - Glass
 - Cartons
 - Food
 - All sWEEE (includes unsold)
 - All textiles (includes unsold)
- Ban all wood waste from non-domestic and domestic premises to landfill**

Incineration and landfill bans – textiles and sWEEE

- The separation requirements on waste producers only apply to UNSOLD textiles and sWEEE.
- Landfill and incineration ban applies to all the relevant materials where they have been separately collected (from any source) for the purpose of preparing for reuse or recycling.
- Applies whether separate presentation and collection was a requirement legal or a choice.

sWEEE banned from both landfill and incineration

Textiles banned from landfill. Separately collected textiles (apart from unsold textiles) that can't be reused or recycled will need to go to incineration.

3. A ban on the disposal of food waste to sewer

- A ban on disposal of all food waste to sewer including via macerators, de-waterers or Enzyme treatment.
- This will divert waste food from disposal to Anaerobic Digestion (AD) and generate renewable energy.
- Food waste to be collected separately at source from all workplaces producing 5kg per week or more.

Enforcement of the new laws

- Natural Resources Wales (NRW) is responsible for making sure that materials are being separated and collected correctly, and that the ban on recycling going to incineration and landfill is being followed.
 - Local Authorities are responsible for making sure the ban on food waste going to sewer is followed.
 - If you do not comply with the law, it could mean a fine for your workplace.
 - Occupiers of premises are responsible and liable for the actions of their staff.
-

How to Get Ready – advice for waste collectors

Read the Code of Practice – it contains all the detail about how to comply with the regulations

[Separate Collection of Waste Materials for Recycling: A Code of Practice for Wales | GOV.WALES](https://gov.wales)

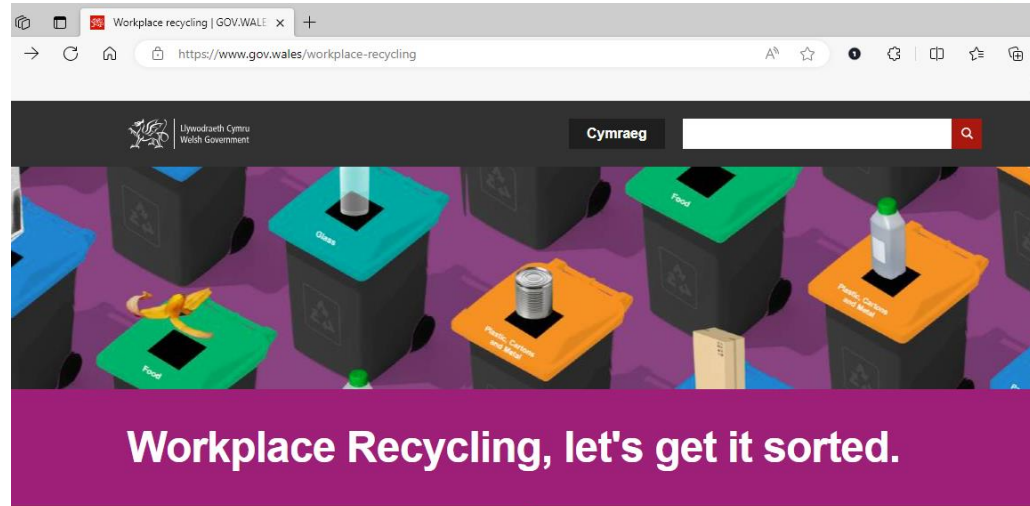

Advice for waste collectors - 1

- Communication with your customers:
 - New streams – containers and collection frequencies
 - Clear labelling of the streams
 - Provide advice to avoid contamination
 - How they can support their staff and customers to use the service correctly
 - Materials are available from WRAP for free
-

Advice for waste collectors -2

- Additional information to customers:
 - End destinations for the materials collected
 - Means of separation must be sufficient to keep the separate streams separate
 - Survival bags are NOT recommended
 - Plan measures to take should customers not complying
 - provide advice and guidance
 - ultimately option to refuse to collect highly contaminated material
-

How to Get Ready – advice for your customers

Workplace recycling is changing

From 6 April 2024, it will become law for all businesses, charities and public sector organisations to sort their waste for recycling.

It also applies to all waste and recycling collectors and processors who manage household-like waste from workplaces.

The Welsh Government is introducing this law to improve the quality and quantity of how we collect and separate waste.

What waste needs to be separated

The following materials will need to be separated for collection, and collected separately:

- Food
 - Paper and card
 - Glass
-
- Welsh Government webpage
 - General guidance on the changes
 - Code of Practice
 - [Workplace recycling | GOV.WALES](https://www.gov.wales/workplace-recycling)
 - gov.wales/workplacerecycling

WRAP Cymru Support

New 'Business of Recycling Wales' website

Guidance for all workplaces

The new recycling law applies to all workplaces in Wales.

This is a summary of the changes and offers tips on how you can get ready.

The law comes into effect on **6 April 2024**. It means all workplaces such as businesses, public sector and charities will need to separate their recyclable materials in the same way most households already do.

It also applies to all waste and recycling collectors and processors who manage household-like waste from workplaces.

- [Why you need to recycle?](#)
- [Preventing waste in the first place](#)
- [How to arrange a new recycling service](#)
- [Food waste and hygiene](#)
- [Resources](#)
- [How to better understand your waste and recycling](#)
- [How to comply with the new Workplace Recycling law](#)
- [Space for your bins?](#)
- [Engaging with staff and pupils](#)

Content overview

WRAP Cymru Webinars

Sector specific webinars, on how to comply with the new regulations for the following sectors:

- Small and medium size businesses (SMEs) - 30 Jan 10am
- Entertainment and leisure facilities (including campsites, chalets, lodges, hotels, caravans) 31 Jan 10am
- Retail – 6 Feb 10am
- Residential settings (including care homes) - 6 Feb 2pm
- Hospitality and food services – 7 Feb 10am
- Waste Collectors – 7 Feb 2pm
- Outdoor events - 8 Feb 2pm
- Education settings and universities – 20 Feb 10am

Food waste collections

- Premises that produce over 5kg of food in any 7-day period must have food waste collections.
- Premises producing less than 5kg can opt for food waste collections or use the non-recyclable bin for food waste.

Workplaces that produce and handle food waste

- Hotels
 - Restaurants
 - Cafés
 - Takeaways
 - Catering businesses (including those at events such as food stalls and events)
 - Shopping centre food courts
 - Sports stadiums
 - Canteens
 - Pubs
 - Offices with canteens, cafes or staff kitchen facilities
 - Schools, colleges, prisons, nursing homes and hospitals and
 - Any other workplaces that serve food.
-

WRAP support for food waste reduction

WRAP provides support for food businesses to reduce food waste via:

- [The Guardians of Grub](https://guardiansofgrub.com) campaign supports Hospitality and Food Service businesses to reduce the alarming amount of food wasted every single year.
guardiansofgrub.com
- [WRAP Food Waste Reduction Roadmap Toolkit](https://wrap.org.uk/resources/tool/food-waste-reduction-roadmap-toolkit) is an industry wide roadmap and toolkit that helps food businesses take targeted action to reduce waste in their own operations, their supply chain and from consumers.
wrap.org.uk/resources/tool/food-waste-reduction-roadmap-toolkit

Summary

- 6 April 2024
- Applies to all workplaces
- Requirement to separate for recycling
- No food waste to sewer
- Bans on certain waste streams going to incineration and landfill

The background of the slide is a large, semi-circular graphic on the left side, filled with a dense pattern of glass bottles. The bottles are rendered in a semi-transparent red color, creating a textured, layered effect. The right side of the slide is plain white.

Workplace Recycling (Wales)

Penalties

Offence	Proposed FMP
An occupier of non-domestic premises in Wales fails to present waste for collection (whether by a waste collection authority or by any other person) in accordance with the applicable separation requirements. (our customers)	£300
A person acting in the course of a business who collects controlled waste, or receives, keeps, treats or transports controlled waste, from non-domestic premises fails to do so in accordance with the applicable separation requirements.	£500
Operators of incineration and co-incineration facilities accept any of the specified, separately collected materials at their facilities.	£500
Operators of landfill facilities accept any of the specified, separately collected materials and/or any wood at their facilities.	£500
An occupier of non-domestic premises in Wales discharges food waste, or knowingly causes or permits food waste to be discharged, to the sewer.	£300

High Level Journey

January 2024

- Stop selling Dry Mixed Recycling in Wales
- Customer reporting begins
- Advised contamination customer education and support
- Second customer communication with link to e-booklet and posters
- All DMR customers switched to Paper and Cardboard

March

- Mobilise March start customers'
- Daily/Weekly review of all changes

**Go live:
6th April**

February

- Relabelling of containers starts
- Mobilise February start customers'
- Weighing fitting for vehicles
- Food and Glass vehicles delivered

April

- SME customer survey
- Designs for vehicles to be fitted
- Review Proactive Calling
- Complete re-labelling process

What's changing?

The Welsh Government are introducing new regulations that require all businesses to separate key recyclable materials.

Biffa will now be required to collect, store and process recyclable materials separately.

From 06/04/2024, all Welsh Dry Mixed Recycling bins will be switched to Paper and Card bins.

Customer requires a Plastic and Cans service, which will need to request this through the relevant sales channel.

May

- Evaluating customers who haven't taken new service
- Monitoring Contamination levels
- Monitor MRF output
- Review DMR rates for exempt customers

Customer Experience and common complaints

Undertaken sample analysis of customers mixed recycling:

- Dry Mixed Recycling container re-labelled for Paper and Card
- Additional services for Mixed Metals, Plastics and Cartons
- Existing services for Glass and Food Waste Collection

Customer confusion around:

Outside public areas on-site / offsite, Inside public areas

Collection issues:

Hospitals and Residential houses

Thank you
