1) Individual subscription rates available on request from subscriptions@ems.press. Digital subscribers may add print to their subscription at "Deep Discount Prices", which is the difference in price between the digital and print editions.

2) P&P included.

3) CHF, Individual and Member rates available on request from subscriptions@ems.press.

4) Reduced rate available for Italian subscribers on request from subscriptions@ems.press.

5) The print edition of the EMS Magazine is free for EMS Members.

6) Each edition of MEMS will be counted as a discrete volume. Each volume will be available for individual purchase without subscription from [ems.press](mailto:subscriptions@ems.press).

Please note: customers in Germany are advised that these prices do not include VAT. VAT will be applied on invoicing.

Subscribe To Open (S2O) at EMS Press

S2O is a business model that facilitates open access through subscriptions - quite literally you **subscribe** in order **to** make content **open** access.

Why should I support S2O?

S2O is a model of open access that depends on community investment, which then allows us as a publisher to support the entire community in return. Annual subscription rates continue to be lower than per-article fees, which means that S2O is a solution for OA that is sympathetic to tight library budgets. A subscription guarantees that you have access to the journals, and sufficient subscribers grant access to those same journals for the entire mathematics community.

We believe that this model is the fairest for researchers in the field of mathematics, ensuring that the best research from all over the world can be published with us, regardless of funding or institutional OA budgets. There are no article processing charges (APCs), no complicated fee waiver systems and no expensive and complex read-and-publish deals. This allows us to focus our publishing programme around research based on quality, relevance and novelty.

In short, S2O is fair for libraries, equitable for researchers, and sustainable for publishers.

Key Benefits of S2O

For the subject librarian

- Retain control of budgets and collection with fair annual subscription rates;
- Administratively, subscriptions operate as before but now support OA;
- Guaranteed access to journal content when subscribing (including full archive), regardless of outcome.

For the researcher

- No article fees or other financial barriers to publication;
- Publish where you choose, not where your institution has a deal;
- Support an equitable system for all researchers based on relevance and quality, not cost.

To find out more about Subscribe To Open please visit ems.press/subscribe-to-open.

Packages

The EMS Journals Package | €5,500

The EMS Journal Package is our comprehensive journal subscription deal, providing digital access to all of our journals including archive issues. An individual subscription to the entire portfolio would cost €6,915 if done individually; the package therefore offers a substantial discount of €1,415 for 2022. The total package represents 26,270 pages over 23 titles.

Multi-year package subscription options offering a long-term commitment discount and fixed pricing for the duration of the agreement are available on a 3 to 5 year basis.

EMS Journal Package subscribers may also purchase printed copies of any title at 'deep discount' prices (DDP), calculated as the difference between a digital and print subscription per title.

A complete title list is provided overleaf, and detailed descriptions of each title can be found at ems.press/journals.

Package subscriptions - including multi-year agreements and DDP add-ons - can be ordered via subscriptions@ems.press or via your usual subscription agent. Please contact subscriptions@ems.press for all related enquiries.

The EMS Essentials Package | €1,300

The EMS Essentials Package offers subscribers the three flagship publications of the European Mathematical Society at a discounted bundle price. It is composed of *Journal of the European Mathematical Society*, *EMS Surveys in Mathematical Sciences*, and *Memoirs of the European Mathematical Society*, a newly-launched publication for 2022. The bundle represents 5,400 pages over 3 titles.

EMS Essentials Package subscribers may also purchase printed copies of any title at 'deep discount' prices (DDP), calculated as the difference between a digital and print subscription per title.

A detailed description of each title can be found at ems.press/journals.

EMS Essentials subscriptions - including DDP add-ons - can be ordered via subscriptions@ems.press or via your usual subscription agent. Please contact subscriptions@ems.press for all related enquiries.

The EMS & MSP Journals Package | €6,950 / €7,025 | \$8,190 / \$8,280

EMS Press has teamed up with Mathematical Science Publishers to bring you a combined package offering the EMS Journals Package plus titles from the MSP Portfolio at a heavily discounted price.

New for this year, MSP have introduced tiered pricing based on [Shanghai Ranking](#). The appropriate price will be applied upon subscription.

To purchase a joint package subscription, or to enquire about DDP purchases, please email either EMS Press or MSP directly at subscriptions@ems.press / contact@msh.org, or enquire via your usual subscription agent.

A complete title list is provided overleaf, and detailed descriptions of each title can be found at ems.press/journals and msh.org.

Algebraic Geometry

DOI: 10.4171/ag

ISSN: 2313-1691

eISSN: 2214-2584

**Diamond
Open Access**

Algebraic Geometry is an open access journal owned by the **Foundation Compositio Mathematica**. The purpose of the journal is to publish first-class research papers in algebraic geometry and related fields. All contributions are required to meet high standards of quality and originality and are carefully screened by experts in the field.

Open access implies here that the electronic version of the journal is freely accessible and that there are no article processing charges for authors whatsoever. The printed version of the journal will be available from EMS Press at the end of the calendar year, comprising all issues of the year in one hard cover volume.

This journal adheres to the **EMS Code of Practice**.

Annales de l'Institut Henri Poincaré C

DOI: 10.4171/aihpc

ISSN: 0294-1449

eISSN: 1873-143

S2O

The Nonlinear Analysis section of the Annales de l'Institut Henri Poincaré is an international journal created in 1983 which publishes original and high quality research articles. It concentrates on all domains concerned with nonlinear analysis, specially applicable to PDE, mechanics, physics, economy, without overlooking the numerical aspects.

Annales de l'Institut Henri Poincaré D

DOI: 10.4171/aihpd

ISSN: 2308-5827

eISSN: 2308-5835

The unfolding of new ideas in physics is often tied to the development of new combinatorial methods, and conversely some problems in combinatorics have been successfully attacked using methods inspired by statistical physics or quantum field theory.

The journal is dedicated to publishing high-quality original research articles and survey articles in which combinatorics and physics interact in both directions. Combinatorial papers should be motivated by potential applications to physical phenomena or models, while physics papers should contain some interesting combinatorial development.

The list of specific subject areas in which articles are anticipated includes:

- Combinatorics of renormalization
- Combinatorics of cluster, virial and related expansions
- Discrete geometry and combinatorics of quantum gravity
- Graph polynomials and statistical-mechanics models
- Topological graph polynomials and quantum field theory
- Physical applications of combinatorial Hopf algebras, matroids, combinatorial species, and other combinatorial structures
- Exact solutions of statistical-mechanical models
- Combinatorics and algebra of integrable systems
- Computational complexity and its relation with statistical physics
- Computational/algorithmic aspects of combinatorial physics
- Interactions of combinatorial physics with topology, geometry, probability theory, or computer science.

Commentarii Mathematici Helvetici

DOI: 10.4171/cmh

ISSN: 0010-2571

eISSN: 1420-8946

A journal of the **Swiss Mathematical Society**.

Published by the European Mathematical Society with the support of the Schweizerische Akademie der Naturwissenschaften and the Stiftung zur Förderung der mathematischen Wissenschaften in der Schweiz.

Commentarii Mathematici Helvetici (CMH) was established on the occasion of a meeting of the Swiss Mathematical Society in May 1928. The first volume was published in 1929. The journal soon gained international reputation and is one of the world's leading mathematical periodicals. The first Managing Editor was R. Fueter, followed in 1950 by J. J. Burckhardt, 1982 by P. Gabriel, 1990 by H. Kraft, and 2006 by Eva Bayer-Fluckiger.

The journal is intended for the publication of original research articles on all aspects in mathematics.

Commentarii Mathematici Helvetici is covered in: Mathematical Reviews (MR), Current Mathematical Publications (CMP), MathSciNet, Zentralblatt für Mathematik, Zentralblatt MATH Database, Science Citation Index (SCI), Science Citation Index Expanded (SCIE), CompuMath Citation Index (CMCI), Current Contents/Physical, Chemical & Earth Sciences (CC/PC&ES), ISI Alerting Services, Journal Citation Reports/ Science Edition, Web of Science.

This journal adheres to the **EMS Code of Practice**.

Elemente der Mathematik

DOI: 10.4171/em

ISSN: 0013-6018

eISSN: 1420-8962

A journal of the **Swiss Mathematical Society**.

Founded by L. Locher-Ernst, continued by E. Trost, M. Jeger und U. Stambach.

Published by the European Mathematical Society with the support of the Schweizerische Akademie der Naturwissenschaften and the Stiftung zur Förderung der mathematischen Wissenschaften in der Schweiz.

Elemente der Mathematik (EM) publishes survey articles about important developments in the field of mathematics; stimulating shorter communications that tackle more specialized questions; and papers that report on the latest advances in mathematics and applications in other disciplines. The journal does not focus on basic research. Rather, its articles seek to convey to a wide circle of readers - teachers, students, engineers, professionals in industry and administration - the relevance, intellectual challenge and vitality of mathematics today. The Problems Section, covering a diverse range of exercises of varying degrees of difficulty, encourages an active grappling with mathematical problems. The journal's books and software reviews are additional features that serve to keep readers attuned to what is new and exciting on all mathematical fronts.

The publication language is primarily German, but many articles are in English, French or Italian.

Die *Elemente der Mathematik* richten sich an interessierte Mathematikerinnen und Mathematiker, insbesondere an Lehrende an Gymnasien und Ingenieurschulen sowie an Studierende, Assistentinnen und Assistenten der Mathematik und verwandter Fachgebiete. Ihr Ziel ist es, den Lesern und Leserinnen aktuelle und klassische Gebiete der Mathematik nahe zu bringen, und sie zu einer aktiven Auseinandersetzung mit der Mathematik anzuregen.

This journal adheres to the **EMS Code of Practice**.

EMS Surveys in Mathematical Sciences

DOI: 10.4171/emss

ISSN: 2308-2151

eISSN: 2308-216X

The *EMS Surveys in Mathematical Sciences* is dedicated to publishing authoritative surveys and high-level expositions in all areas of mathematical sciences. It is a peer-reviewed periodical which communicates advances of mathematical knowledge to give rise to greater progress and cross-fertilization of ideas. Surveys should be written in a style accessible to a broad audience, and might include ideas on conceivable applications or conceptual problems posed by the contents of the survey.

This journal adheres to the **EMS Code of Practice**.

Groups, Geometry, and Dynamics

DOI: 10.4171/ggd

ISSN: 1661-7207

eISSN: 1661-7215

Groups, Geometry, and Dynamics is devoted to publication of research articles that focus on groups or group actions as well as articles in other areas of mathematics in which groups or group actions are used as a main tool. The journal covers all topics of modern group theory with preference given to geometric, asymptotic and combinatorial group theory, dynamics of group actions, probabilistic and analytical methods, interaction with ergodic theory and operator algebras, and other related fields.

Topics covered include:

- geometric group theory
- asymptotic group theory
- combinatorial group theory
- probabilities on groups
- computational aspects and complexity
- harmonic and functional analysis on groups, free probability
- ergodic theory of group actions
- cohomology of groups and exotic cohomologies
- groups and low-dimensional topology
- group actions on trees, buildings, rooted trees

Groups, Geometry, and Dynamics is covered in: Mathematical Reviews (MR), Current Mathematical Publications (CMP), MathSciNet, Zentralblatt für Mathematik, Zentralblatt MATH Database, Science Citation Index Expanded (SCIE), CompuMath Citation Index (CMCI), Current Contents/Physical, Chemical & Earth Sciences (CC/PC&ES), ISI Alerting Services, Journal Citation Reports/Science Edition, Web of Science.

This journal adheres to the **EMS Code of Practice**.

Interfaces and Free Boundaries

DOI: 10.4171/ifb

ISSN: 1463-9963

eISSN: 1463-9971

Interfaces and Free Boundaries is dedicated to the mathematical modelling, analysis and computation of interfaces and free boundary problems in all areas where such phenomena are pertinent. The journal aims to be a forum where mathematical analysis, partial differential equations, modelling, scientific computing and the various applications which involve mathematical modelling meet. Submissions should, ideally, emphasize the combination of theory and application.

Interfaces and Free Boundaries is covered in: Mathematical Reviews (MR), Current Mathematical Publications (CMP), MathSciNet, Zentralblatt für Mathematik, Zentralblatt MATH Database, Science Citation Index Expanded (SCIE), CompuMath Citation Index (CMCI), Current Contents/Physical, Chemical & Earth Sciences (CC/PC&ES), ISI Alerting Services, Journal Citation Reports/Science Edition, Web of Science.

This journal adheres to the **EMS Code of Practice**.

Journal of Combinatorial Algebra

DOI: 10.4171/jca

ISSN: 2415-6302

eISSN: 2415-6310

The *Journal of Combinatorial Algebra* is devoted to publication of research articles of the highest level. Its domain is the rich and deep area of interplay between combinatorics and algebra. Its scope includes combinatorial aspects of group, semigroup and ring theory, representation theory, commutative algebra, algebraic geometry and dynamical systems. Exceptionally strong research papers from all parts of mathematics related to these fields are also welcome.

The *Journal of Combinatorial Algebra* is covered in: Mathematical Reviews (MR), Current Mathematical Publications (CMP), MathSciNet, Zentralblatt für Mathematik, Zentralblatt MATH Database.

This journal adheres to the **EMS Code of Practice**.

Journal of the European Mathematical Society

DOI: 10.4171/jems

ISSN: 1435-9855

eISSN: 1435-9863

The *Journal of the European Mathematical Society* (JEMS) is the official journal of the **EMS**.

The Society, founded in 1990, works at promoting joint scientific efforts between the many different structures that characterize European mathematics. JEMS will publish research articles in all active areas of pure and applied mathematics. These will be selected by a distinguished, international board of editors for their outstanding quality and interest, according to the highest international standards.

Occasionally, substantial survey papers on topics of exceptional interest will also be published. Starting in 1999, the Journal was published by Springer-Verlag until the end of 2003. Since 2004 it is published by the EMS Publishing House. The first Editor-in-Chief of the Journal was J. Jost, succeeded by H. Brezis in 2004.

The *Journal of the European Mathematical Society* is covered in: Mathematical Reviews (MR), Current Mathematical Publications (CMP), MathSciNet, Zentralblatt für Mathematik, Zentralblatt MATH Database, Science Citation Index (SCI), Science Citation Index Expanded (SCIE), CompuMath Citation Index (CMCI), Current Contents/Physical, Chemical & Earth Sciences (CC/PC&ES), ISI Alerting Services, Journal Citation Reports/ Science Edition, Web of Science.

This journal adheres to the **EMS Code of Practice**.

Journal of Fractal Geometry

DOI: 10.4171/jfg

ISSN: 2308-1309

eISSN: 2308-1317

The *Journal of Fractal Geometry* is dedicated to publishing high quality contributions to fractal geometry and related subjects, or to mathematics in areas where fractal properties play an important role.

The *Journal of Fractal Geometry* accepts submissions containing original research articles and short communications. Occasionally research expository or survey articles will also be published. Only contributions representing substantial advances in the field will be considered for publication. Surveys and expository papers, as well as papers dealing with the applications to other sciences or with experimental mathematics, may be considered, especially when they contain significant mathematical content or value and suggest interesting new research directions through conjectures or the discussion of open problems.

The *Journal of Fractal Geometry* is covered in: Mathematical Reviews (MR), Current Mathematical Publications (CMP), MathSciNet, Zentralblatt für Mathematik, Zentralblatt MATH Database, Emerging Sources Citation Index.

This journal adheres to the **EMS Code of Practice**.

Journal of Noncommutative Geometry

DOI: 10.4171/jncg

ISSN: 1661-6952

eISSN: 1661-6960

The *Journal of Noncommutative Geometry* covers the noncommutative world in all its aspects. It is devoted to publication of research articles which represent major advances in the area of noncommutative geometry and its applications to other fields of mathematics and theoretical physics. Topics covered include in particular:

- Hochschild and cyclic cohomology
- K-theory and index theory
- Measure theory and topology of noncommutative spaces, operator algebras
- Spectral geometry of noncommutative spaces
- Noncommutative algebraic geometry
- Hopf algebras and quantum groups
- Foliations, groupoids, stacks, gerbes
- Deformations and quantization
- Noncommutative spaces in number theory and arithmetic geometry
- Noncommutative geometry in physics: QFT, renormalization, gauge theory, string theory, gravity, mirror symmetry, solid state physics, statistical mechanics

The *Journal of Noncommutative Geometry* is covered in: Mathematical Reviews (MR), Current Mathematical Publications (CMP), MathSciNet, Zentralblatt für Mathematik, Zentralblatt MATH Database, Science Citation Index Expanded (SCIE), CompuMath Citation Index (CMCI), Current Contents/Physical, Chemical & Earth Sciences (CC/PC&ES), ISI Alerting Services, Journal Citation Reports/Science Edition, Web of Science.

This journal adheres to the **EMS Code of Practice**.

Journal of Spectral Theory

DOI: 10.4171/jst

ISSN: 1664-039X

eISSN: 1664-0403

The *Journal of Spectral Theory* is devoted to the publication of research articles that focus on spectral theory and its many areas of application.

The following list includes several aspects of spectral theory and also fields which feature substantial applications of (or to) spectral theory.

- Schrödinger operators, scattering theory and resonances;
- eigenvalues: perturbation theory, asymptotics and inequalities;
- quantum graphs, graph Laplacians;
- pseudo-differential operators and semi-classical analysis;
- random matrix theory;
- the Anderson model and other random media;
- non-self-adjoint matrices and operators, including Toeplitz operators;
- spectral geometry, including manifolds and automorphic forms;
- linear and nonlinear differential operators, especially those arising in geometry and physics;
- orthogonal polynomials;
- inverse problems.

This journal adheres to the **EMS Code of Practice**.

L'Enseignement Mathématique

DOI: 10.4171/lem

ISSN: 0013-8584

eISSN: 2309-4672

L'Enseignement Mathématique is the official organ of the **International Commission on Mathematical Instruction**.

The Journal was founded in 1899 by Henri Fehr (Geneva) and Charles-Ange Laisant (Paris). It is intended primarily for publication of high-quality research and expository papers in mathematics.

Volumes older than 5 years, starting from 1899, are freely available on the **Swiss Electronic Academic Library Service E-Periodica Portal**.

European Mathematical Society Magazine

DOI: 10.4171/mag

ISSN: 2747-7894

eISSN: 2747-7908

**Diamond Open
Access**

The *EMS Magazine* is the journal of record of the **European Mathematical Society** and is one of the most widely read periodicals in Europe dealing with matters of interest to the mathematical community. The Magazine features announcements about meetings and conferences, articles outlining current trends in scientific development, reports on member societies, and many other informational items.

The *EMS Magazine* appears four times a year (March, June, September, December). It is sent to all individual members of the EMS, approximately 3000 mathematicians, and to mathematical institutes and member societies. The *EMS Magazine* is therefore an excellent medium for companies and institutions to advertise products and services to the community of mathematicians, statisticians, computer scientists, engineers, and other professionals who are regular readers of this popular publication.

The *EMS Magazine* was previously published under the name EMS Newsletter (issues 1 to 118, ISSN 1027-488X).

Memoirs of the European Mathematical Society

DOI: 10.4171/MEMS

ISSN: 2747-9080

eISSN: 2747-9099

S20

The *Memoirs of the European Mathematical Society* publish outstanding research contributions in individual volumes, in all areas of mathematics and with a particular focus on works that are longer and more comprehensive than usual research articles.

The collection's editorial board consists of the editors-in-chief of the *Journal of the European Mathematical Society* and the *EMS Surveys in Mathematical Sciences*, along with editors of book series of the publishing house of the EMS.

All submitted works will go through a highly selective peer-review process.

Mathematical Statistics and Learning

DOI: 10.4171/msl

ISSN: 2520-2316

eISSN: 2520-2324

Mathematical Statistics and Learning is devoted to research articles of the highest quality in all aspects of mathematical statistics and learning, including those studied in traditional areas of statistics and in machine learning as well as in theoretical computer science and signal processing.

This journal adheres to the **EMS Code of Practice**.

Oberwolfach Reports

DOI: 10.4171/owr

ISSN: 1660-8933

eISSN: 1660-8941

The **Mathematisches Forschungsinstitut Oberwolfach** regularly organizes week-long workshops in all fields of Mathematics and its applications. Following a careful selection process around 50 leading experts in the research field of the workshop are invited from all around the world to present recent research results, to discuss novel approaches and to generate new ideas.

Lectures followed by intensive discussions, spontaneous collaborations between participants and concentrated study in the library of the Institute all combine to create unique opportunities for new ideas and advances of understanding. Often researchers from different backgrounds meet for the first time and bring completely new perspectives to open problems.

The *Oberwolfach Reports* are meant to capture, in an informal manner, the characteristic ideas and discussions of these workshops. Offered at a nominal price, they allow to partake in the lively and stimulating atmosphere of the meetings. While the peer-reviewed results will appear elsewhere, the *Oberwolfach Reports* keep the reader abreast of current developments and open problems, and serve as an indispensable source of information for the active mathematician.

Portugaliae Mathematica

DOI: 10.4171/pm

ISSN: 0032-5155

eISSN: 1662-2758

A journal of the **Portuguese Mathematical Society**.

Published by the European Mathematical Society with the support of the Portuguese Science Foundation.

Since its foundation in 1937, *Portugaliae Mathematica* has aimed at publishing high-level research articles in all branches of mathematics. With great efforts by its founders, the journal was able to publish articles by some of the best mathematicians of the time. In 2001 a New Series of *Portugaliae Mathematica* was started, reaffirming the purpose of maintaining a high-level research journal in mathematics with a wide range scope.

Portugaliae Mathematica is covered in: Mathematical Reviews (MR), Current Mathematical Publications (CMP), MathSciNet, Zentralblatt für Mathematik, Zentralblatt MATH Database, Science Citation Index Expanded (SCIE), CompuMath Citation Index (CMCI), Current Contents/Physical, Chemical & Earth Sciences (CC/PC&ES), ISI Alerting Services, Journal Citation Reports/Science Edition, Web of Science.

This journal adheres to the **EMS Code of Practice**.

Publications of the Research Institute for Mathematical Sciences

DOI: 10.4171/prims

ISSN: 0034-5318

eISSN: 1663-4926

A journal of the **Research Institute for Mathematical Sciences of Kyoto University**.

The aim of the *Publications of the Research Institute for Mathematical Sciences* (PRIMS) is to publish original research papers in the mathematical sciences. Occasionally surveys are included at the request of the editorial board.

Publications of the Research Institute for Mathematical Sciences is covered in: Mathematical Reviews (MR), Current Mathematical Publications (CMP), MathSciNet, Zentralblatt für Mathematik, Zentralblatt MATH Database, Science Citation Index (SCI), Science Citation Index Expanded (SCIE), CompuMath Citation Index (CMCI), Current Contents/Physical, Chemical & Earth Sciences (CC/PC&ES), ISI Alerting Services, Journal Citation Reports/Science Edition, Web of Science.

Quantum Topology

DOI: 10.4171/qt

ISSN: 1663-487X

eISSN: 1664-073X

Quantum Topology is a peer reviewed journal dedicated to publishing original research articles, short communications, and surveys in quantum topology and related areas of mathematics. Topics covered include in particular:

- Low-dimensional Topology
- Knot Theory
- Jones Polynomial and Khovanov Homology
- Topological Quantum Field Theory
- Quantum Groups and Hopf Algebras
- Mapping Class Groups and Teichmüller space
- Categorification
- Braid Groups and Braided Categories
- Fusion Categories
- Subfactors and Planar Algebras
- Contact and Symplectic Topology
- Topological Methods in Physics

Quantum Topology is covered in: Mathematical Reviews (MR), Current Mathematical Publications (CMP), MathSciNet, Zentralblatt für Mathematik, Zentralblatt MATH Database, Emerging Sources Citation Index.

This journal adheres to the **EMS Code of Practice**.

Rendiconti Lincei - Matematica e Applicazioni

DOI: 10.4171/rIm

ISSN: 1120-6330

eISSN: 1720-0768

The Accademia dei Lincei (Lynx), founded in 1603, is the oldest academy dedicated to the study of humanities as well as physics, mathematics and the natural sciences in the world. Through the centuries, some of the most important scientists of their time have been among their members, including Galileo Galilei, Enrico Fermi and Vito Volterra.

After its merger with the Accademia Pontificia dei Nuovi Lincei, the academy began publishing in 1847 with the *Atti dell'Accademia Pontificia dei Nuovi Lincei*. In 1870 this society was divided into two separate academies, one of which published its transactions as *Atti della Reale Accademia dei Lincei* and under the name *Atti della Reale Accademia dei Lincei*, Transunti as of 1876. Continued in 1884 as *Atti della Reale Accademia dei Lincei*, *Rendiconti* and under the present name in 1990, the *Rendiconti Lincei* have been one of the best Italian journals ever since. Papers by the most outstanding Italian mathematicians such as Betti, Bianchi, Caccioppoli, Castelnuovo, Enriques, Levi-Civita, Picone, Tonelli, Volterra and, more recently, Andreotti, Fichera, De Giorgi, Segre, Severi and Stampacchia have been published.

The journal is dedicated to the publication of high-quality peer-reviewed surveys, research papers and preliminary announcements of important results from all fields of mathematics and its applications.

Rendiconti Lincei - Matematica e Applicazioni is covered in: Mathematical Reviews (MR), Current Mathematical Publications (CMP), MathSciNet, Zentralblatt für Mathematik, Zentralblatt MATH Database, Science Citation Index Expanded (SCIE), CompuMath Citation Index (CMCI), ISI Alerting Services, Journal Citation Reports/Science Edition, Web of Science, Scopus.

This journal adheres to the **EMS Code of Practice**.

Revista Matemática Iberoamericana

DOI: 10.4171/rmi

ISSN: 0213-2230

eISSN: 2235-0616

Revista Matemática Iberoamericana publishes original research articles on all areas of mathematics. Its distinguished Editorial Board selects papers according to the highest standards. Founded in 1985, Revista is a scientific journal of Real Sociedad Matemática Española.

Revista Matemática Iberoamericana is covered in: Mathematical Reviews (MR), Current Mathematical Publications (CMP), MathSciNet, Zentralblatt für Mathematik, Zentralblatt MATH Database, Science Citation Index (SCI), Science Citation Index Expanded (SCIE), CompuMath Citation Index (CMCI), Current Contents/Physical, Chemical & Earth Sciences (CC/PC&ES), ISI Alerting Services, Journal Citation Reports/ Science Edition, Web of Science.

Rendiconti del Seminario Matematico della Università di Padova

DOI: 10.4171/rsmup

ISSN: 0041-8994

eISSN: 2240-2926

The *Rendiconti del Seminario Matematico della Università di Padova* have been published since 1930. The aim of Rendiconti is to publish original high-quality research articles in mathematics. By tradition the journal focuses on algebra, analysis, algebraic and differential geometry, mathematical physics and number theory. The journal is ready to accept long papers of foundational or technical nature, as well as papers containing applications or surveys, provided these are especially well structured and fill a gap in the literature.

This journal adheres to the **EMS Code of Practice**.

Zeitschrift für Analysis und ihre Anwendungen

DOI: 10.4171/zaa

ISSN: 0232-2064

eISSN: 1661-4534

**A periodical edited by the University of Leipzig
and founded by Rolf Klötzler (Leipzig) in 1982.**

The *Journal of Analysis and its Applications* aims at disseminating theoretical knowledge in the field of analysis and, at the same time, cultivating and extending its applications.

To this end, it publishes research articles on differential equations and variational problems, functional analysis and operator theory together with their theoretical foundations and their applications – within mathematics, physics and other disciplines of the exact sciences.

The *Journal of Analysis and its Applications* is covered in: Mathematical Reviews (MR), Current Mathematical Publications (CMP), MathSciNet, Zentralblatt für Mathematik, Zentralblatt MATH Database, Science Citation Index Expanded (SCIE), CompuMath Citation Index (CMCI), Current Contents/Physical, Chemical & Earth Sciences (CC/PC&ES), ISI Alerting Services, Journal Citation Reports/Science Edition, Web of Science.

EMS Press is the publishing house of the European Mathematical Society, the not-for-profit organization dedicated to the promotion and development of mathematics in Europe. We have a digital and print portfolio of more than 20 peer-reviewed journals and a growing catalogue of over 200 books. Our editorial mission is to publish high-quality research for both the European and global mathematics community. We focus on technology-driven solutions for academic publishing, and are committed to delivering fair and sustainable open access.
