

# Books Catalogue 2023–24

EMS Press is the publishing house of the European Mathematical Society, the not-for-profit organisation dedicated to the promotion and development of mathematics in Europe. Our editorial mission is to publish high-quality research for both the European and global mathematics community. We focus on technology-driven solutions for academic publishing, and are committed to delivering fair and sustainable open access.

Since 2003 EMS Press has published over 250 books in mathematics in both print and digital formats, with approximately 10 new titles published per year. Our books programme is mainly organised by series, including monographs, graduate texts, collected volumes, lecture notes as well as textbooks.

All book titles are available for individual and institutional purchase (with 20% discount for EMS members) and as an eBooks package – contact [orders@ems.press](mailto:orders@ems.press) for any purchase enquiries.

For book manuscript submissions, please contact our editorial director, Apostolos Damialis – [damialis@ems.press](mailto:damialis@ems.press).

### **EMS eBooks Package 2024 | €9,475 (€900 renewal)**

Purchase a full institution-wide, multi-user access licence for the entire EMS Press eBooks portfolio of more than 200 titles plus forthcoming 2024 titles with more than 40% discount on the total list price, at just €9,475 for first time subscribers. For those renewing the price is €900.

This includes DRM-free access to over 85,000 pages of high quality research, all fully downloadable as PDF files. We offer a number of library-friendly features including easily available metadata (XML, MARC and ONIX), perpetual access and no annual maintenance fees. All of our content is archived in CLOCKSS, and subscriptions are valid on a campus-wide basis with no restrictions on simultaneous downloads.

Print copies are available to eBook Package subscribers at discounted rates too; €9,475 for all books published 2004 to 2023, or just €500 for titles published in 2023 or 2024, delivered at the point of publication, with approximately 10 new titles per year.

To purchase our eBooks package, renew your existing subscription, or enquire about adding print volumes please email EMS Press directly at [subscriptions@ems.press](mailto:subscriptions@ems.press), or enquire via your usual subscription agent.

## EMS MONOGRAPHS IN MATHEMATICS

The *EMS Monographs in Mathematics* is a book series aimed at mathematicians and scientists. It publishes research monographs from all fields of mathematics. The individual volumes are intended to give a comprehensive and self-contained account of their particular subject. They present mathematical results that are new or have not been accessible previously in the literature.

Edited by Hugo Duminil-Copin (Université de Genève and Institut des Hautes Études Scientifiques), Gavril Farkas (Humboldt-Universität zu Berlin), Isabelle Gallagher (École normale supérieure de Paris and Université de Paris), and Paul Seidel (Massachusetts Institute of Technology)

### Quasi-Periodic Solutions of Nonlinear Wave Equations on the $d$ -Dimensional Torus

Massimiliano Berti (SISSA, Trieste, Italy), Philippe Bolle (Avignon Université, France)

ISBN 978-3-03719-211-5 | eISBN 978-3-03719-711-0  
374pp | Hardcover | €69.00 | \$74.00

This monograph deals with partial differential equations (PDEs) and infinite-dimensional Hamiltonian systems, in particular with the existence of time quasi-periodic solutions. It provides an updated introduction to the now rich KAM theory for PDEs before focusing on the nonlinear wave equation with periodic boundary conditions. Its main part deals with the proof of bifurcation of small amplitude finite-dimensional invariant tori for this equation, in any space dimension, combining tools like Nash–Moser and KAM theory, reduction techniques in Hamiltonian dynamics, and multiscale analysis for quasi-periodic linear operators.

### Mackey 2-Functors and Mackey 2-Motives

Paul Balmer (University of California, Los Angeles, USA), Ivo Dell’Ambrogio (Université de Lille, France)

ISBN 978-3-03719-209-2 | eISBN 978-3-03719-709-7  
235pp | Hardcover | €59.00 | \$64.00

This book is dedicated to equivariant mathematics, specifically the study of additive categories of objects with actions of finite groups. The framework of Mackey 2-functors axiomatizes the variance of such categories as a function of the group. In other words, it provides a categorification of the widely used notion of Mackey functor, familiar to representation theorists and topologists. The book contains an extended catalogue of examples of such Mackey 2-functors that are already in use in many mathematical fields from algebra to topology, from geometry to KK-theory.

## From the Vlasov–Maxwell–Boltzmann System to Incompressible Viscous Electro-magneto-hydrodynamics

Diogo Arsénio (Université Paris Diderot, France), Laure Saint-Raymond (École Normale Supérieure, France)

ISBN 978-3-03719-193-4 | eISBN 978-3-03719-693-9  
418pp | Hardcover | €78.00 | \$84.00

This work studies in a systematic way the Vlasov–Maxwell–Boltzmann system for the dynamics of charged particles subject to self-induced electromagnetic forces. Its first part is devoted to the formal analysis of viscous hydrodynamic limits, leading to a precise classification of physically relevant models for viscous incompressible plasmas. In the second part, the convergence results are made precise and rigorous, assuming the existence of renormalized solutions. The third and fourth parts, dealing with a weaker notion of solutions to the system, will be published in a second volume.

## The Shock Development Problem

Demetrios Christodoulou (ETH Zürich, Switzerland)

ISBN 978-3-03719-192-7 | eISBN 978-3-03719-692-2  
932pp | Hardcover | €128.00 | \$137.00

This monograph addresses the problem of the development of shocks in the context of the Eulerian equations of the mechanics of compressible fluids. The mathematical problem is that of an initial-boundary value problem for a nonlinear hyperbolic system of partial differential equations with a free boundary and singular initial conditions, and new geometric and analytic methods are introduced to solve the problem. The developed methods are also relevant in fields like magnetohydrodynamics, nonlinear elasticity, and the electrodynamics of nonlinear media through the ubiquitous nature of shocks in physics.

## EMS SERIES IN INDUSTRIAL AND APPLIED MATHEMATICS

The *EMS Series in Industrial and Applied Mathematics* publishes high quality advanced texts and monographs in all areas of industrial and applied mathematics. Books include those of a general nature as well as those dealing with the mathematics of specific applications areas and real-world situations. While it is intended to disseminate scholarship of the highest standard, authors are encouraged to make their work as accessible as possible.

Edited by Alfredo Bermúdez de Castro (Universidade de Santiago de Compostela), Lorenz T. Biegler (Carnegie Mellon University), Annalisa Buffa (École Polytechnique Fédérale de Lausanne), Matthias Heinkenschloss (Rice University), Alexander Martin (Universität Erlangen-Nürnberg), Volker Mehrmann (Technische Universität Berlin), Stephen B. G. O'Brien (University of Limerick)

### Interactions between Elasticity and Fluid Mechanics

Editors: Maurizio Garrione (Politecnico di Milano, Italy), Filippo Gazzola (Politecnico di Milano, Italy)

ISBN 978-3-98547-027-3 | eISBN 978-3-98547-527-8  
248pp | Hardcover | €69.00 | \$75.00

This book collects several contributions and points of view on phenomena where fluid mechanics, elasticity, and their interactions are at play. It is addressed both to junior researchers entering the field as well as to experienced professionals aiming to expand their scientific knowledge to closely related disciplines. The book also aims to bring closer the mathematical and engineering communities working on fluid-structure interactions in order to create a common language and to encourage future collaborations.

### Decision Support Systems for Water Supply Systems

Smart Water System to Improve the Operation of Water Supply Systems by Using Applied Mathematics

Editors: Antonio Morsi (Universität Erlangen-Nürnberg, Germany), Andreas Pirsing (Siemens AG, Germany)

ISBN 978-3-03719-207-8 | eISBN 978-3-03719-707-3  
243pp | Hardcover | €69.00 | \$74.00

This book summarizes the results of a research project funded by the German Federal Ministry of Education and Research, which was initiated to develop an innovative Decision Support System for water supply companies. Combining mixed-integer linear and nonlinear mathematical optimization methods, as well as simulation methods to verify the physics, the contents of this book will be useful to automation experts in water supply companies as well as to mathematicians working in the infrastructure industry.

## EMS SERIES OF CONGRESS REPORTS

The *EMS Series of Congress Reports* publishes volumes originating from conferences or seminars focusing on any field of pure or applied mathematics. The individual volumes include an introduction into their subject and review of the contributions in this context. Articles are required to undergo a refereeing process and are accepted only if they contain a survey or significant results not published elsewhere in the literature.

### Representations of Algebras and Related Structures

International Conference on Representations of Algebras, ICRA 2020, 9–25 November 2020

Editors: Aslak Bakke Buan (Norwegian University of Science and Technology, Norway), Henning Krause (Universität Bielefeld, Germany), Oeyvind Solberg (Norwegian University of Science and Technology, Norway)

ISBN 978-3-98547-054-9 | eISBN 978-3-98547-554-4  
428pp | Hardcover | €89.00 | \$95.00

This volume presents a collection of articles devoted to representations of algebras and related topics. Distinguished experts in this field presented their work at the International Conference on Representations of Algebras in 2020. The book reflects recent trends in the representation theory of algebras and its interactions with other central branches of mathematics, including combinatorics, commutative algebra, algebraic geometry, topology, data analysis, Lie algebras, quantum groups, homological algebra, and theoretical physics. There are thirteen independent articles, written by leading experts in the field.

### Partial Differential Equations, Spectral Theory, and Mathematical Physics

The Ari Laptev Anniversary Volume

Editors: Pavel Exner (Czech Technical University, Prague and Czech Academy of Sciences, Czech Republic), Rupert L. Frank (California Institute of Technology, USA and Ludwig-Maximilians-Universität München, Germany), Fritz Gesztesy (Baylor University, USA), Helge Holden (Norwegian University of Science and Technology, Norway), Timo Weidl (Universität Stuttgart, Germany)

ISBN 978-3-98547-007-5 | eISBN 978-3-98547-507-0  
494pp | Hardcover | €89.00 | \$96.00

This volume is dedicated to Ari Laptev on the occasion of his 70th birthday. It collects original contributions by his numerous colleagues sharing with him research interests in analysis and spectral theory. Topics covered include, among others, functional and entropy inequalities, eigenvalue bounds and asymptotics, heat kernel estimates, Schrödinger operators, Feshbach–Schur maps, scattering theory, stability of matter, homogenization, Bose–Einstein condensation, Bogoliubov theory, Brezis–Nirenberg problems, electron density estimates etc.

## Probabilistic Structures in Evolution

Editors: Ellen Baake (Universität Bielefeld, Germany), Anton Wakolbinger (Goethe-Universität, Germany)

ISBN 978-3-98547-005-1 | eISBN 978-3-98547-505-6  
502pp | Hardcover | €89.00 | \$96.00

Evolution is a complex phenomenon driven by various processes with intrinsically random elements which give rise to a wealth of phenomena that cannot be explained by deterministic models. The present volume collects twenty-one survey articles about probabilistic aspects of biological evolution, centred around the stochastic processes in population genetics and population dynamics. The contributions in this volume will be valuable to researchers interested in stochastic processes and their biological applications, or in mathematical population biology.

## $t$ -Motives: Hodge Structures, Transcendence and Other Motivic Aspects

Editors: Gebhard Böckle (Universität Heidelberg, Germany), David Goss†, Urs Hartl (Universität Münster, Germany), Matthew A. Papanikolas (Texas A&M University, USA)

ISBN 978-3-03719-198-9 | eISBN 978-3-03719-698-4  
473pp | Hardcover | €89.00 | \$96.00

This volume contains research and survey articles on Drinfeld modules, Anderson  $t$ -modules and  $t$ -motives. Much material that had not been easily accessible in the literature is presented, for example the cohomology theories and Pink's theory of Hodge structures attached to Drinfeld modules and  $t$ -motives. Also included are survey articles on the function field analogue of Fontaine's theory of  $p$ -adic crystalline Galois representations and on transcendence methods over function fields, encompassing the theories of Frobenius difference equations, automata theory, and Mahler's method, as well as a small number of research articles.

## EMS SERIES OF LECTURES IN MATHEMATICS

The *EMS Series of Lectures in Mathematics* is a book series aimed at students, professional mathematicians and scientists. It publishes polished notes arising from seminars or lecture series in all fields of pure and applied mathematics, including the reissue of classic texts of continuing interest. The individual volumes are intended to give a rapid and accessible introduction into their particular subject, guiding the audience to topics of current research and the more advanced and specialized literature.

Edited by Ari Laptev (Imperial College London)

### An Introduction to Singular Stochastic PDEs

#### Allen–Cahn Equations, Metastability, and Regularity Structures

Nils Berglund (Institut Denis Poisson, Université d’Orleans, Université de Tours and CNRS)

ISBN 978-3-98547-014-38 | eISBN 978-3-98547-514-8  
230pp | Softcover | €39.00 | \$42.00

This book gives a largely self-contained exposition of the subject of regular and singular SPDEs in the particular case of the Allen–Cahn equation. Properties of the equation are discussed successively in one, two and three spatial dimensions, allowing to introduce new difficulties of the theory in an incremental way. In addition to existence and uniqueness of solutions, aspects of long-time dynamics such as invariant measures and metastability are discussed. For the three-dimensional case, the theory of regularity structures developed by Martin Hairer and co-authors is presented.

### Orthogonal Polynomials and Linear Functionals

#### An Algebraic Approach and Applications

Juan Carlos García-Ardila (Universidad Politécnica de Madrid, Spain), Francisco Marcellán (Universidad Carlos III de Madrid, Spain), Misael E. Marriaga (Universidad Rey Juan Carlos, Spain)

ISBN 978-3-98547-008-2 | eISBN 978-3-98547-508-7  
128pp | Softcover | €39.00 | \$42.00

This book presents an introduction to orthogonal polynomials, with an algebraic flavor, based on linear functionals defining the orthogonality and the Jacobi matrices associated with them. The book’s structure reflects the fact that its content is based on a set of lectures delivered by one of the authors at the first Orthonet Summer School in Seville, Spain in 2016. The presentation of the material is self-contained and will be valuable to students and researchers interested in a novel approach to the study of orthogonal polynomials, focusing on their analytic properties.

## Lectures on Selected Topics in von Neumann Algebras

Fumio Hiai (Tohoku University, Japan)

ISBN 978-3-98547-004-4 | eISBN 978-3-98547-504-9

250pp | Softcover | €39.00 | \$42.00

The theory of von Neumann algebras, originating with the work of F. J. Murray and J. von Neumann in the late 1930s, has grown into a rich discipline with connections to different branches of mathematics and physics. These lecture notes aim to present a fast-track study of some important topics in classical parts of von Neumann algebra theory that were developed in the 1970s. The self-contained presentation of the material makes this book useful not only to graduate students and researchers interested in von Neumann algebras, but also to undergraduates with a basic knowledge of functional analysis and measure theory.

## Classification of Complex Algebraic Surfaces

Ciro Ciliberto (Università di Roma Tor Vergata, Italy)

ISBN 978-3-03719-210-8 | eISBN 978-3-03719-710-3

143pp | Softcover | €36.00 | \$39.00

The classification of complex algebraic surfaces is a very classical subject which goes back to the old Italian school of algebraic geometry. The exposition in the present book is though modern and follows Mori's approach to the classification of algebraic varieties. The text includes the P12 theorem, the Sarkisov programme in the surface case and the Noether–Castelnuovo theorem in its classical version. This self-contained book serves as a relatively quick and handy introduction to the theory of algebraic surfaces and is intended for readers with a good knowledge of basic algebraic geometry.

## EMS TEXTBOOKS IN MATHEMATICS

The *EMS Textbooks in Mathematics* is a book series aimed at students or professional mathematicians seeking an introduction into a particular field. The individual volumes are intended to provide not only relevant techniques, results and their applications, but afford insight into the motivations and ideas behind the theory. Suitably designed exercises help to master the subject and prepare the reader for the study of more advanced and specialized literature.

### Large Scale Geometry

#### Second Edition

Piotr W. Nowak (Polish Academy of Sciences, Poland), Guoliang Yu (Texas A&M University, USA)

ISBN 978-3-98547-018-1 | eISBN 978-3-98547-518-6  
213pp | Hardcover | €49.00 | \$55.00

This book provides a friendly approach to the basic theory of large scale geometry and offers a glimpse of its applications to topology, geometry, and higher index theory. The authors have made a conscientious effort to make the book accessible to advanced undergraduate students, graduate students, and non-experts. The present second edition has been updated to cover recent developments involving constructions of groups and metric spaces with exotic properties as well as results charting new directions in index theory, and it also includes minor improvements in the presentation and an updated bibliography.

### An Invitation to Optimal Transport, Wasserstein Distances, and Gradient Flows

#### Second Edition

Alessio Figalli (ETH Zürich, Switzerland), Federico Glaudo (Institute for Advanced Study, USA)

ISBN 9978-3-98547-050-1 | eISBN 978-3-98547-550-6  
152pp | Hardcover | €39.00 | \$45.00

Coauthored by one of the leading experts in optimal transport, this book provides a self-contained introduction to this important topic presenting its essentials: Kantorovich duality, existence and uniqueness of optimal transport maps, Wasserstein distances, the JKO scheme, Ottos calculus, and Wasserstein gradient flows. The book is suitable for a course at the graduate level, and also includes an appendix with a series of exercises along with their solutions. The present second edition contains a number of additions, such as a new section on the Brunn–Minkowski inequality, new exercises, and various corrections throughout the text.

## Elements of Graph Theory

### From Basic Concepts to Modern Developments

Alain Faisant (Université de Lyon – Université Jean Monnet Saint-Étienne, France), François Hennecart (Université de Lyon – Université Jean Monnet Saint-Étienne, France), Alain Bretto (Université de Caen Normandie, France)

ISBN 978-3-98547-017-4 | eISBN 978-3-98547-517-9  
502pp | Hardcover | €59.00 | \$65.00

This book is an introduction to graph theory, presenting most of its elementary and classical notions through an original and rigorous approach, including detailed proofs of most of the results. It covers all aspects of graph theory from an algebraic, topological and analytic point of view, while also developing the theory's algorithmic parts. The variety of topics covered aims to lead the reader in understanding graphs in their greatest diversity in order to perceive their power as a mathematical tool.

## Dynamic Optimization for Beginners

### With Prerequisites and Applications

Piermarco Cannarsa (Università di Roma, Italy), Filippo Gazzola (Politecnico di Milano, Italy)

ISBN 978-3-98547-012-9 | eISBN 978-3-98547-512-4  
360pp | Hardcover | €49.00 | \$53.00

The main purpose of this book is to give interested readers a friendly introduction to optimization problems for dynamical systems, providing them with the essential notions needed to handle most of the concrete situations they will be faced with. The main topics covered are calculus of variations, optimal control theory, and dynamic programming, along with many examples and exercises. Its intended readership includes both mathematics students and students or researchers in other disciplines such as economics and data science.

## EMS TRACTS IN MATHEMATICS

This series includes advanced texts and monographs covering all fields in pure and applied mathematics. The Tracts will give a reliable introduction and reference to special fields of current research. The books in the series will in most cases be authored monographs, although edited volumes may be published if appropriate. They are addressed to graduate students seeking access to research topics as well as to the experts in the field working at the frontier of research.

Edited by Yann Bugeaud (Université de Strasbourg), Camillo De Lellis (Institute for Advanced Study), Michael Farber (Queen Mary University), Michael Röckner (Universität Bielefeld and Purdue University), and Alexander Varchenko (University of North Carolina at Chapel Hill)

### The Structure of Pro-Lie Groups

#### Second Edition

Karl H. Hofmann (Technische Universität Darmstadt, Germany; Tulane University, USA), Sidney A. Morris (La Trobe University, Bundoora; Federation University Australia, Australia)

ISBN 978-3-98547-048-8 | eISBN 978-3-98547-548-3  
840pp | Hardcover | €119.00 | \$129.00

This book exposes a Lie theory of almost connected pro-Lie groups (and hence of almost connected locally compact groups) and illuminates the variety of ways in which their structure theory reduces to that of compact groups on the one hand and of finite dimensional Lie groups on the other. It is therefore a continuation of the authors' monograph on the structure of compact groups and is an invaluable tool for researchers and graduate students working in topological groups, Lie theory, harmonic analysis and representation theory.

### Euclidean Buildings

#### Geometry and Group Actions

Guy Rousseau (Université de Lorraine, IECL, France)

ISBN 978-3-98547-039-6 | eISBN 978-3-98547-539-1  
607pp | Hardcover | €99.00 | \$109.00

The theory of buildings lies at the interplay between geometry and group theory, and is one of the main tools for studying the structure of many groups. The present book develops the general abstract theory of Euclidean buildings (that is, buildings with Euclidean affine spaces as apartments). It is largely self-contained and emphasizes the metric aspects of these objects, as CAT(0) spaces very similar to Riemannian symmetric spaces of non-compact type. The book studies their compactifications, their links with groups, many classical examples, and some applications (for example, to Hecke algebras).

## Homogenized Models of Suspension Dynamics

Evgen Ya. Khruslov (B. Verkin Institute for Low Temperature Physics and Engineering of the National Academy of Sciences, Ukraine)

ISBN 978-3-98547-009-9 | eISBN 978-3-98547-509-4  
288pp | Hardcover | €59.00 | \$64.00

This book studies the motion of suspensions, that is, of mixtures of a viscous incompressible fluid with small solid particles that can interact with each other through forces of non-hydrodynamic origin. Being one of the first mathematically rigorous treatises on suspensions from the viewpoint of homogenization theory, it will be useful to graduate students and researchers in applied analysis and partial differential equations as well as to physicists and engineers interested in the theory of complex fluids with microstructure.

## Accuracy of Mathematical Models

### Dimension Reduction, Homogenization, and Simplification

Sergey I. Repin (Russian Academy of Sciences, Russian Federation), Stefan A. Sauter (Universität Zürich, Switzerland)

ISBN 978-3-03719-206-1 | eISBN 978-3-03719-706-6  
333pp | Hardcover | €59.00 | \$64.00

This book presents a unified approach to the analysis of accuracy of deterministic mathematical models described by variational problems and elliptic partial differential equations. It is based on new mathematical methods developed to estimate the distance between a solution of a boundary value problem and any function in the admissible functional class associated with it. The theory is presented for a wide class of elliptic variational problems and it is applied to the investigation of modelling errors arising in dimension reduction, homogenization, simplification, and various conversion methods.

## ESI LECTURES IN MATHEMATICS AND PHYSICS

The purpose of the series *ESI Lectures in Mathematics and Physics* is to make selected texts arising from its research programme better known to a wider community and easily available to a worldwide audience. It publishes lecture notes of courses given by internationally renowned experts on highly active research topics. In order to make the series attractive to graduate students as well as researchers, special emphasis is given to concise and lively presentations with a level and focus appropriate to a student's background and at prices commensurate with a student's means.

Edited by Christoph Dellago and Ilaria Perugia (Universität Wien)

### An Introduction to the Mathematical Fluid Dynamics of Oceanic and Atmospheric Flows

Robin S. Johnson (Newcastle University, United Kingdom)

ISBN 978-3-98547-029-7 | eISBN 978-3-98547-529-2  
176pp | Softcover | €49.00 | \$55.00

The study of the movement of the atmosphere and the oceans is intriguing, challenging and important, particularly in the context of current concerns about the climate. This text presents a single, over-arching modelling approach which uses the thin-shell approximation – and nothing more – applied to the general equations of fluid dynamics. It is suitable for researchers, and students, in the oceanic and atmospheric sciences, and for mathematicians with an interest in the application of fluid dynamics to more complicated flow scenarios.

### Microlocal Analysis of Quantum Fields on Curved Spacetimes

Christian Gérard (Université de Paris 11, France)

ISBN 978-3-03719-094-4 | eISBN 978-3-03719-594-9  
228pp | Softcover | €48.00 | \$52.00

This monograph is addressed to both mathematicians and mathematical physicists. The first will be able to use it as a rigorous exposition of free quantum fields on curved spacetimes and as an introduction to some interesting and physically important problems arising in this domain. The second may find this text a useful introduction and motivation to the use of more advanced tools of microlocal analysis in this area of research.

## Erwin Schrödinger – 50 Years After

Editors: Wolfgang L. Reiter (University of Vienna, Austria), Jakob Yngvason (University of Vienna, Austria)

ISBN 978-3-03719-121-7 | eISBN 978-3-03719-621-2  
195pp | Softcover | €69.00 | \$74.00

This book contains lectures presented at the international symposium “Erwin Schrödinger – 50 Years After” held at the Erwin Schrödinger International Institute for Mathematical Physics in Vienna in January 2011 to commemorate the 50th anniversary of Schrödinger’s death. A broad spectrum of topics is covered, ranging from personal reminiscences to foundational questions of quantum mechanics and historical accounts of Schrödinger’s work. Besides the lectures presented at the symposium, the volume also contains articles specially written for this occasion.

## Noncommutative Geometry and Physics: Renormalisation, Motives, Index Theory

Editors: Alan L. Carey (Australian National University, Canberra)

ISBN 978-3-03719-008-1 | eISBN 978-3-03719-508-6  
280pp | Softcover | €69.00 | \$74.00

This collection of expository articles grew out of the workshop “Number Theory and Physics” held in March 2009 at the Erwin Schrödinger International Institute for Mathematical Physics in Vienna. The common theme of the articles is the influence of ideas from noncommutative geometry on subjects ranging from number theory to Lie algebras, index theory, and mathematical physics.

## HERITAGE OF EUROPEAN MATHEMATICS

This series features the selected or collected works of distinguished mathematicians. Biographies of and correspondence between outstanding mathematicians, as well as other texts of historico-mathematical interest are also included.

Advisory Board: Ciro Ciliberto (Università degli Studi di Roma "Tor Vergata"), Władysław Narkiewicz (Uniwersytet Wrocławski), Samuel J. Patterson (Universität Göttingen), and Rossana Tazzioli (Université de Lille).

### Hurwitz's Lectures on the Number Theory of Quaternions

Nicola Oswald (Bergische Universität Wuppertal, Germany), Jörn Steuding (Julius-Maximilians Universität Würzburg, Germany),

ISBN 978-3-98547-011-2 | eISBN 978-3-98547-511-7  
311pp | Hardcover | €79.00 | \$85.00

This book contains an English translation of Adolf Hurwitz's 1919 textbook on the number theory of quaternions as well as his famous 1-2-3-4 theorem on composition algebras. In addition, the reader can find commentaries that shed historical light on the development of this number theory of quaternions, for example, the classical preparatory works (of Fermat, Euler, Lagrange and Gauss to name but a few), the different notions of quaternion integers in the works of Lipschitz and Hurwitz, analogies to the theory of algebraic numbers, and the further development (including Dickson's work in particular).

### Gösta Mittag-Leffler and Vito Volterra. 40 Years of Correspondence

Editors: Frédéric Jaëck (École Normale Supérieure, France), Laurent Mazliak (Université Pierre et Marie Curie, France), Emma Sallent Del Colombo (Universitat de Barcelona, Spain), Rossana Tazzioli (Université Lille 1, France)

ISBN 978-3-03719-199-6 | eISBN 978-3-03719-699-1  
438pp | Hardcover | €88.00 | \$95.00

The present book contains the voluminous correspondence exchanged between the prominent mathematicians Gösta Mittag-Leffler and Vito Volterra, spanning a period of almost forty years at the end of the 19th and beginning of the 20th centuries. This vast set of letters provides a general overview of mathematical life at the turn of the 19th century and an appreciation of the European intellectual spirit which came to an end, or at least suffered a drastic turn, when the Great War broke out. An extensive general introduction as well as exhaustive annotations enhance the presentation of these captivating documents.

## Uniformization of Riemann Surfaces

Revisiting a hundred-year-old theorem

Henri Paul de Saint-Gervais (Paris)

ISBN 978-3-03719-145-3 | eISBN 978-3-03719-645-8  
512pp | Hardcover | €79.00 | \$85.00

The evolution of the uniformization theorem took place in parallel with the emergence of modern algebraic geometry, the creation of complex analysis, the first stirrings of functional analysis, and with the flowering of the theory of differential equations and the birth of topology. Rather than describing the history of a single theorem, the author returns to the original proofs through the eyes of modern mathematicians, to enquire as to their correctness, and to attempt to make them rigorous while respecting the state of mathematical knowledge at the time, or, if this should prove impossible, using modern mathematical tools.

## Karl Löwner and His Student Lipman Bers – Pre-war Prague Mathematicians

Martina Bečvářová (Czech Technical University, Czech Republic), Ivan Netuka (Charles University, Czech Republic)

ISBN 978-3-03719-144-6 | eISBN 978-3-03719-644-1  
310pp | Hardcover | €79.00 | \$85.00

This monograph is devoted to two distinguished mathematicians, Karel Löwner and Lipman Bers, whose lives are dramatically interlinked with key historical events of the 20th century. It presents an in-depth account of the lives of both, with special emphasis on the pre-war period. Included are extensive commentaries of their works, tracing the origin and motivation of the problems studied, while paying special attention to the impact of their fundamental results on current research in mathematics. The text is based on an extensive archival search, and most of the archival findings appear here for the first time.

## IRMA LECTURES IN MATHEMATICS AND THEORETICAL PHYSICS

This series is devoted to the publication of research monographs, conferences or workshops originating from the Institut de Recherche Mathématique Avancée (Strasbourg, France). The goal is to promote recent advances in mathematics and theoretical physics and make them accessible to a wide circle of professional and aspiring mathematicians and physicists.

Edited by: Olivier Guichard (Institut de Recherche Mathématique Avancée)

### Essays in Geometry

Dedicated to Norbert A'Campo

Editor: Athanase Papadopoulos (University of Strasbourg, France)

ISBN 978-3-98547-024-2 | eISBN 978-3-98547-524-7  
1028pp | Hardcover | €129.00 | \$139.00

This volume consists in a collection of essays dedicated to Norbert A'Campo on the occasion of his 80th birthday. The subject is geometry in the broadest sense. The topics include hyperbolic and super hyperbolic geometry, 3-manifolds, metric geometry, mapping class groups, linear groups, Riemann surfaces, Teichmüller spaces, high-dimensional complex geometry, differential topology, symplectic geometry, singularity theory, number theory, algebraic geometry, dynamics, mathematical physics and philosophy of mathematics. The book gives a fairly comprehensive overview of the wealth of current research in geometry.

### Topology and Geometry

A Collection of Essays Dedicated to Vladimir G. Turaev

Editor: Athanase Papadopoulos (Université de Strasbourg and CNRS, France)

ISBN 9978-3-98547-001-3 | eISBN 978-3-98547-501-8  
698pp | Hardcover | €99.00 | \$106.00

Vladimir Turaev's numerous contributions are revisited and celebrated in this collected volume. The included essays cover the large spectrum of topics in which Turaev has been interested, including knot and link invariants, quantum representations, TQFTs, state sum constructions, geometric structures on knot complements, Kleinian groups, geometric group theory and its relationship with 3-manifolds, mapping class groups, operads, mathematical physics, Grothendieck's program, the philosophy of mathematics, and several other topics.

## Algebraic Combinatorics, Resurgence, Moulds and Applications (CARMA)

Editors: Frédéric Chapoton (Université de Strasbourg, France), Frédéric Fauvet (Université de Strasbourg, France), Claudia Malvenuto (Università di Roma La Sapienza, Italy), Jean-Yves Thibon (Université Paris-Est Marne-la-Vallée, France)

Volume 1: ISBN 978-3-03719-205-4 | eISBN 978-3-03719-705-9

Volume 2: ISBN 978-3-03719-204-7 | eISBN 978-3-03719-704-2

396pp | Softcover | €58.00 | \$63.00

This two-volume work comprises a total of 14 refereed research articles which stem from the CARMA Conference (Algebraic Combinatorics, Resurgence, Moulds and Applications), held at the Centre International de Rencontres Mathématiques in Luminy, France, from June 26 to 30, 2017. The conference did notably emphasise the role of Hopf algebraic techniques and related concepts which have lately proved pervasive in combinatorics, but also in many other fields, from multiple zeta values to the algebraic study of control systems and the theory of rough paths.

## ZÜRICH LECTURES IN ADVANCED MATHEMATICS

Mathematics in Zürich has a long and distinguished tradition, in which the writing of lecture notes volumes and research monographs play a prominent part. The *Zürich Lectures in Advanced Mathematics* series aims to make some of these publications better known to a wider audience.

Edited by Habib Ammari (ETH Zürich), Alexander Gorodnik (Universität Zürich, managing editor), Urs Lang (ETH Zürich, managing editor), Michael Struwe (ETH Zürich)

### Statistical Mechanics of Mean-Field Disordered Systems

#### A Hamilton–Jacobi Approach

Tomas Dominguez (University of Toronto, Canada), Jean-Christophe Mourrat (École Normale Supérieure de Lyon, France)

ISBN 978-3-03719-204-7 | eISBN 978-3-98547-574-2  
367pp | Softcover | €59.00 | \$65.00

The goal of this book is to present new mathematical techniques for studying the behavior of mean-field systems with disordered interactions. The authors mostly focus on certain problems of statistical inference in high dimension, and on spin glasses. The presented techniques aim to determine the free energy of these systems, in the limit of large system size, by showing that they asymptotically satisfy a Hamilton–Jacobi equation.

### Prescribing Scalar Curvature in Conformal Geometry

Andrea Malchiodi (Scuola Normale Superiore di Pisa, Italy)

ISBN 978-3-98547-052-5 | eISBN 978-3-98547-552-0  
161pp | Softcover | €39.00 | \$45.00

This book treats the classical problem, posed by Kazdan and Warner, of prescribing a given function on a closed manifold as the scalar curvature of a metric within a conformal class. Since both critical equations and obstructions to the existence of solutions appear, the problem is particularly challenging. Treating different aspects of the subject and containing several references to up-to-date research directions and perspectives, the book will be useful to graduate students and researchers interested in geometric analysis and partial differential equations.

## Bayesian Non-linear Statistical Inverse Problems

Richard Nickl (University of Cambridge, UK)

ISBN 978-3-98547-053-2 | eISBN 978-3-98547-553-7  
171pp | Softcover | €39.00 | \$45.00

This book develops a general theory of Bayesian inference for non-linear forward maps and rigorously considers two PDE model examples arising with Darcy's problem and a Schrödinger equation. Starting with the statistical consistency of Gaussian process methods, it then treats local fluctuations and approximations of posterior distributions by Gaussian or log-concave measures whose curvature is described by PDE mapping properties of underlying 'information operators'. Applications to the algorithmic runtime of gradient-based MCMC methods are discussed as well as computation time lower bounds for worst case performance of some algorithms.

## Regularity Theory for Elliptic PDE

Xavier Fernández-Real (École Polytechnique Fédérale de Lausanne, Switzerland), Xavier Ros-Oton (ICREA; Universitat de Barcelona; and Centre de Recerca Matemàtica, Spain)

ISBN 978-3-98547-028-0 | eISBN 978-3-98547-528-5  
236pp | Softcover | €49.00 | \$55.00

This book aims to provide a self-contained introduction to the regularity theory for elliptic PDE, focusing on the main ideas rather than proving all results in their greatest generality. It can be seen as a bridge between an elementary PDE course and more advanced books. The book starts with a short review of the Laplace operator and harmonic functions. The theory of Schauder estimates is developed next, but presented with various proofs of the results. Nonlinear elliptic PDE are covered in the following, both in the variational and non-variational setting and, finally, the obstacle problem is studied in detail, establishing the regularity of solutions and free boundaries.

## STANDALONE TITLES

### International Congress of Mathematicians

2022 July 6–14

Editors: Dmitry Beliaev (University of Oxford, United Kingdom), Stanislav Smirnov (Université de Genève, Switzerland)

ISBN 978-3-98547-058-7 | eISBN 978-3-98547-558-2  
5940pp | Hardcover | €949.00 | \$999.00

Following the long and illustrious tradition of the International Congress of Mathematicians, these proceedings include contributions based on the invited talks that were presented at the Congress in 2022. The seven volumes present the most important developments in all fields of mathematics and its applications in the past four years. In particular, they include laudations and presentations of the 2022 Fields Medal winners and of the other prestigious prizes awarded at the Congress.

### European Congress of Mathematics

Portorož, 20–26 June, 2021

Editors: Ademir Hujdurović, Klavdija Kutnar, Dragan Marušić, Štefko Miklavić, and Tomaž Pisanski (University of Primorska, Slovenia), Primož Šparl (University of Ljubljana, Slovenia)

ISBN 9978-3-98547-051-8 | eISBN 978-3-98547-551-3  
982pp | Hardcover | €149.00 | \$159.00

These proceedings provide a permanent record of current mathematics of highest quality by presenting extended versions of seven plenary, six prize, and fourteen invited lectures as well as eleven lectures from minisymposia keynote speakers, all of which were delivered during the 8th European Congress of Mathematics held in Portorož in 2021.

## Émile Borel

### A Life in Mathematics and Politics Across Two Centuries

Pierre Guiraldenq (École Centrale de Lyon, France)

ISBN 978-3-98547-013-6 | eISBN 978-3-98547-513-1

122pp | Softcover | €19.00 | \$22.00

The book follows Borel, one of France's leading scientific and political figures of the first half of the twentieth century, through the various stages and the most significant events of his life, across two centuries and two wars. Originally published in French, this new English edition of the book will appeal primarily to mathematicians and those with an interest in the history of science, but it should not disappoint anyone wishing to explore, through the life of an exceptional scientist and man, a chapter of history from the Franco-Prussian War of 1870 to the beginnings of contemporary Europe.

## The Physics and Mathematics of Elliott Lieb

Editors: Rupert L. Frank (Ludwig-Maximilians-Universität München, Germany), Ari Laptev (Imperial College London, United Kingdom), Mathieu Lewin (Université Paris Dauphine, France), Robert Seiringer (Institute of Science and Technology Austria, Austria)

ISBN 978-3-98547-019-8 | eISBN 978-3-98547-519-3

1372pp | Hardcover | €179.00 | \$189.00

These two volumes are dedicated to Elliott Lieb on the occasion of his 90th birthday. They celebrate his fundamental contributions to the fields of mathematics, physics and chemistry. Around fifty chapters give an extensive account of Liebs impact on a very broad range of topics and the resulting subsequent developments. Many contributions are of an expository character and are accessible to a non-expert audience of researchers in mathematics, physics and chemistry. A non-exhaustive list of topics covered includes the problem of stability of matter, quantum many-body systems, density functional theory, topics in statistical mechanics, entropy inequalities and matrix analysis, functional inequalities and sharp constants.

# Handbook of Automata Theory

Editors: Jean-Éric Pin (Université de Paris and CNRS, France)

ISBN 9978-3-98547-006-8 | eISBN 978-3-98547-506-3  
1608pp | Hardcover | €199.00 | \$213.00

Automata theory is a subject of study at the crossroads of mathematics, theoretical computer science, and applications, dealing with abstract models of systems whose behavior is based on transitions between states. This important reference work on automata theory gives an authoritative and comprehensive overview of current research, and is aimed at a broad readership of researchers and graduate students in mathematics and computer science.

---

## EMS MONOGRAPHS IN MATHEMATICS

The *EMS Monographs in Mathematics* is a book series aimed at mathematicians and scientists. It publishes research monographs from all fields of mathematics. The individual volumes are intended to give a comprehensive and self-contained account of their particular subject. They present mathematical results that are new or have not been accessible previously in the literature.

Edited by Hugo Duminil-Copin (Université de Genève and Institut des Hautes Études Scientifiques), Gavril Farkas (Humboldt-Universität zu Berlin), Isabelle Gallagher (École normale supérieure de Paris and Université de Paris), and Paul Seidel (Massachusetts Institute of Technology)

### Foundations of Rigid Geometry I

Kazuhiro Fujiwara (Nagoya University, Japan), Fumiharu Kato (Tokyo Institute of Technology, Japan)

ISBN: 978-3-03719-135-4 | eISBN: 978-3-03719-635-9  
863pp | Hardcover | €108.00 | \$116.00

### Elements of Asymptotic Geometry

Sergei Buyalo (Steklov Institute of Mathematics, Russia), Viktor Schroeder (University of Zürich, Switzerland)

ISBN: 978-3-03719-036-4 | eISBN: 978-3-03719-536-9  
212pp | Hardcover | €69.00 | \$74.00

### Concentration Compactness for Critical Wave Maps

Joachim Krieger (EPFL Lausanne, Switzerland), Wilhelm Schlag (University of Chicago, USA)

ISBN: 978-3-03719-106-4 | eISBN: 978-3-03719-606-9  
490pp | Hardcover | €99.00 | \$106.00

### Logarithmic Combinatorial Structures: A Probabilistic Approach

Richard Arratia (University of Southern California, USA), A. D. Barbour (University of Zürich, Switzerland), Simon Tavaré (University of Southern California, USA)

ISBN: 978-3-03719-000-5 | eISBN: 978-3-03719-500-0  
374pp | Hardcover | €79.00 | \$85.00

### The Formation of Black Holes in General Relativity

Demetrios Christodoulou (ETH Zürich, Switzerland)

ISBN: 978-3-03719-068-5 | eISBN: 978-3-03719-568-0  
599pp | Hardcover | €109.00 | \$117.00

### A Spinorial Approach to Riemannian and Conformal Geometry

Jean-Pierre Bourguignon (IHÉS, France), Oussama Hijazi (Université de Lorraine, France), Jean-Louis Milhorat (Université de Nantes, France), Andrei Moroianu (Université de Versailles-St Quentin, France), Sergiu Moroianu (Institutul de Matematică al Academiei Române, Romania)

ISBN: 978-3-03719-136-1 | eISBN: 978-3-03719-636-6  
462pp | Hardcover | €79.00 | \$85.00

### The Formation of Shocks in 3-Dimensional Fluids

Demetrios Christodoulou (ETH Zürich, Switzerland)

ISBN: 978-3-03719-031-9 | eISBN: 978-3-03719-531-4  
1000pp | Hardcover | €159.00 | \$171.00

## EMS SERIES IN INDUSTRIAL AND APPLIED MATHEMATICS

The *EMS Series in Industrial and Applied Mathematics* publishes high quality advanced texts and monographs in all areas of industrial and applied mathematics. Books include those of a general nature as well as those dealing with the mathematics of specific applications areas and real-world situations. While it is intended to disseminate scholarship of the highest standard, authors are encouraged to make their work as accessible as possible.

Edited by Alfredo Bermúdez de Castro (Universidade de Santiago de Compostela), Lorenz T. Biegler (Carnegie Mellon University), Annalisa Buffa (École Polytechnique Fédérale de Lausanne), Matthias Heinkenschloss (Rice University), Alexander Martin (Universität Erlangen-Nürnberg), Volker Mehrmann (Technische Universität Berlin), Stephen B. G. O'Brien (University of Limerick)

### MATHEON – Mathematics for Key Technologies

Editors: Peter Deuffhard (Konrad-Zuse-Zentrum, Germany), Martin Grötschel (Konrad-Zuse-Zentrum, Germany), Dietmar Hömberg (Technische Universität Berlin, Germany), Ulrich Horst (Humboldt-Universität zu Berlin, Germany), Jürg Kramer (Humboldt-Universität zu Berlin, Germany), Volker Mehrmann (Technische Universität Berlin, Germany), Konrad Polthier (Freie Universität Berlin, Germany), Frank Schmidt (Konrad-Zuse-Zentrum, Germany), Christof Schütte (Freie Universität Berlin, Germany), Martin Skutella (Technische Universität Berlin, Germany), Jürgen Sprekels (Weierstraß Institut für Angewandte Analysis und Stochastik, Germany)

ISBN: 978-3-03719-137-8 | eISBN: 978-3-03719-637-3  
466pp | Hardcover | €59.00 | \$64.00

## EMS SERIES OF CONGRESS REPORTS

The *EMS Series of Congress Reports* publishes volumes originating from conferences or seminars focusing on any field of pure or applied mathematics. The individual volumes include an introduction into their subject and review of the contributions in this context. Articles are required to undergo a refereeing process and are accepted only if they contain a survey or significant results not published elsewhere in the literature.

### Advances in Representation Theory of Algebras

Editors: David J. Benson (University of Aberdeen, UK), Henning Krause (University of Bielefeld, Germany), Andrzej Skowroński (Nicolaus Copernicus University, Poland)

ISBN: 978-3-03719-125-5 | eISBN: 978-3-03719-625-0  
378pp | Hardcover | €79.00 | \$85.00

### Non-Linear Partial Differential Equations, Mathematical Physics, and Stochastic Analysis The Helge Holden Anniversary Volume

Editors: Fritz Gesztesy (Baylor University, USA), Harald Hanche-Olsen (The Norwegian University of Science and Technology, Norway), Espen R. Jakobsen (The Norwegian University of Science and Technology, Norway), Yurii I. Lyubarskii (The Norwegian University of Science and Technology, Norway), Nils Henrik Risebro (University of Oslo, Norway), Kristian Seip (Norwegian University of Science and Technology, Norway)

ISBN: 978-3-03719-186-6 | eISBN: 978-3-03719-686-1  
502pp | Hardcover | €98.00 | \$105.00

### Schubert Varieties, Equivariant Cohomology and Characteristic Classes

#### Impanga 15

Editors: Jarosław Buczyński (Polish Academy of Sciences and University of Warsaw, Poland), Mateusz Michałek (Polish Academy of Sciences, Poland and Max Planck-Institute, Germany), Elisa Postingshel (Loughborough University, UK)

ISBN: 978-3-03719-182-8 | eISBN: 978-3-03719-682-3  
354pp | Hardcover | €78.00 | \$84.00

### Representation Theory – Current Trends and Perspectives

Editors: Henning Krause (Universität Bielefeld, Germany), Peter Littelmann (Universität Köln, Germany), Gunter Malle (Universität Kaiserslautern, Germany), Karl-Hermann Neeb (FAU Erlangen-Nürnberg, Germany), Christoph Schweigert (Universität Hamburg, Germany)

ISBN: 978-3-03719-171-2 | eISBN: 978-3-03719-671-7  
773pp | Hardcover | €109.00 | \$117.00

### Geometry and Arithmetic

Editors: Robin de Jong (University of Leiden, The Netherlands), Carel Faber (Royal Institute of Technology, Stockholm, Sweden), Gavril Farkas (Humboldt-Universität zu Berlin, Berlin, Germany)

ISBN: 978-3-03719-119-4 | eISBN: 978-3-03719-619-9  
383pp | Hardcover | €79.00 | \$85.00

### Representations of Algebras and Related Topics

Editors: Andrzej Skowroński (Nicolaus Copernicus University, Toruń, Poland), Kunio Yamagata (Tokyo University of Agriculture and Technology, Japan)

ISBN: 978-3-03719-101-9 | eISBN: 978-3-03719-601-4  
740pp | Hardcover | €109.00 | \$117.00

### Functional Analysis and Operator Theory for Quantum Physics

#### The Pavel Exner Anniversary Volume

Editors: Jaroslav Dittrich (Czech Academy of Sciences, Rez-Prague, Czech Republic), Hynek Kovařík (Università degli Studi di Brescia, Italy), Ari Laptev (Imperial College London, UK)

ISBN: 978-3-03719-175-0 | eISBN: 978-3-03719-675-5  
595pp | Hardcover | €109.00 | \$117.00

### Valuation Theory in Interaction

Editors: Antonio Campillo (Universidad de Valladolid, Spain), Franz-Viktor Kuhlmann (University of Saskatchewan, Saskatoon, Canada), Bernard Teissier (Institut de Mathématiques de Jussieu, Paris, France)

ISBN: 978-3-03719-149-1 | eISBN: 978-3-03719-649-6  
670pp | Hardcover | €109.00 | \$117.00

### Derived Categories in Algebraic Geometry Tokyo 2011

Editors: Yujiro Kawamata (University of Tokyo, Japan)

ISBN: 978-3-03719-115-6 | eISBN: 978-3-03719-615-1  
354pp | Hardcover | €79.00 | \$85.00

## EMS SERIES OF CONGRESS REPORTS

### Contributions to Algebraic Geometry Impanga Lecture Notes

Editors: Piotr Pragacz (IM PAN, Poland)

ISBN: 978-3-03719-114-9 | eISBN: 978-3-03719-614-4  
516pp | Hardcover | €109.00 | \$117.00

### Surveys in Stochastic Processes

Editors: Jochen Blath (Technical University of Berlin, Germany), Peter Imkeller (Humboldt University of Berlin, Germany), Sylvie Røelly (University of Potsdam, Germany)

ISBN: 978-3-03719-072-2 | eISBN: 978-3-03719-572-7  
263pp | Hardcover | €79.00 | \$85.00

Editors: Michael Baake (Universität Bielefeld, Germany), Friedrich Götze (Universität Bielefeld, Germany), Werner Hoffmann (Universität Bielefeld, Germany)

ISBN: 978-3-03719-197-2 | eISBN: 978-3-03719-697-7  
433pp | Hardcover | €88.00 | \$95.00

## EMS SERIES OF LECTURES IN MATHEMATICS

The *EMS Series of Lectures in Mathematics* is a book series aimed at students, professional mathematicians and scientists. It publishes polished notes arising from seminars or lecture series in all fields of pure and applied mathematics, including the reissue of classic texts of continuing interest. The individual volumes are intended to give a rapid and accessible introduction into their particular subject, guiding the audience to topics of current research and the more advanced and specialized literature.

Edited by Ari Laptev (Imperial College London)

### Local Representation Theory and Simple Groups

Editors: Radha Kessar (City University of London, UK), Gunter Malle (Universität Kaiserslautern, Germany), Donna Testerman (EPF Lausanne, Switzerland)

ISBN: 978-3-03719-185-9 | eISBN: 978-3-03719-685-4  
369pp | Softcover | €44.00 | \$48.00

### PDE Models for Chemotaxis and Hydrodynamics in Supercritical Function Spaces

Hans Triebel (University of Jena, Germany)

ISBN: 978-3-03719-172-9 | eISBN: 978-3-03719-672-4  
140pp | Softcover | €39.00 | \$42.00

### Geometry, Analysis and Dynamics on sub-Riemannian Manifolds, Volume II

Editors: Davide Barilari (Université Paris 7 Denis Diderot, France), Ugo Boscain (École Polytechnique, France), Mario Sigalotti (École Polytechnique, France)

ISBN: 978-3-03719-163-7 | eISBN: 978-3-03719-663-2  
307pp | Softcover | €49.00 | \$53.00

### Function Spaces with Dominating Mixed Smoothness

Hans Triebel (Friedrich-Schiller Universität Jena, Germany)

ISBN: 978-3-03719-195-8 | eISBN: 978-3-03719-695-3  
210pp | Softcover | €36.00 | \$39.00

### Higher-Dimensional Knots According to Michel Kervaire

Françoise Michel (Université Paul Sabatier, France), Claude Weber (Université de Genève, Switzerland)

ISBN: 978-3-03719-180-4 | eISBN: 978-3-03719-680-9  
144pp | Softcover | €39.00 | \$42.00

## Geometry, Analysis and Dynamics on sub-Riemannian Manifolds, Volume I

Editors: Davide Barilari (Université Paris 7 Denis Diderot, France), Ugo Boscain (École Polytechnique, France), Mario Sigalotti (École Polytechnique, France)

ISBN: 978-3-03719-162-0 | eISBN: 978-3-03719-662-5  
332pp | Softcover | €49.00 | \$53.00

---

## Dynamics Done with Your Bare Hands

Lecture notes by Diana Davis, Bryce Weaver, Roland K. W. Roeder, Pablo Lessa

Editors: Françoise Dal'Bo (Université de Rennes I, France), François Ledrappier (University of Notre Dame, USA), Amie Wilkinson (University of Chicago, USA)

ISBN: 978-3-03719-168-2 | eISBN: 978-3-03719-668-7  
214pp | Softcover | €39.00 | \$42.00

---

## Higher-Dimensional Generalized Manifolds: Surgery and Constructions

Alberto Cavicchioli (Università degli Studi di Modena e Reggio Emilia, Italy), Friedrich Hegenbarth (Università degli Studi di Milano, Italy), Dušan D. Repovš (University of Ljubljana, Slovenia)

ISBN: 978-3-03719-156-9 | eISBN: 978-3-03719-656-4  
154pp | Softcover | €39.00 | \$42.00

---

## Tempered Homogeneous Function Spaces

Hans Triebel (University of Jena, Germany)

ISBN: 978-3-03719-155-2 | eISBN: 978-3-03719-655-7  
143pp | Softcover | €39.00 | \$42.00

---

## Lectures on Universal Teichmüller Space

Armen Sergeev (Steklov Mathematical Institute, Russia)

ISBN: 978-3-03719-141-5 | eISBN: 978-3-03719-641-0  
111pp | Softcover | €29.00 | \$32.00

---

## Basic Noncommutative Geometry

Second edition

Masoud Khalkhali (The University of Western Ontario, Canada)

ISBN: 978-3-03719-128-6 | eISBN: 978-3-03719-628-1  
257pp | Softcover | €49.00 | \$53.00

---

## Faber Systems and Their Use in Sampling, Discrepancy, Numerical Integration

Hans Triebel (University of Jena, Germany)

ISBN: 978-3-03719-107-1 | eISBN: 978-3-03719-607-6  
115pp | Softcover | €29.00 | \$32.00

---

## Four Faces of Number Theory

Kathrin Bringmann (Universität zu Köln, Germany), Yann Bugeaud (IRMA Strasbourg, France), Titus Hilberdink (University of Reading, UK), Jürgen W. Sander (Universität Hildesheim, Germany)

ISBN: 978-3-03719-142-2 | eISBN: 978-3-03719-642-7  
198pp | Softcover | €39.00 | \$42.00

---

## 3-Manifold Groups

Matthias Aschenbrenner (University of California Los Angeles, USA), Stefan Friedl (Universität Regensburg, Germany), Henry Wilton (University of Cambridge, UK)

ISBN: 978-3-03719-154-5 | eISBN: 978-3-03719-654-0  
230pp | Softcover | €39.00 | \$42.00

---

## The Defocusing NLS Equation and Its Normal Form

Benoît Grébert (Université de Nantes, France), Thomas Kappeler (University of Zürich, Switzerland)

ISBN: 978-3-03719-131-6 | eISBN: 978-3-03719-631-1  
175pp | Softcover | €39.00 | \$42.00

---

### A Course on Elation Quadrangles

Koen Thas (Ghent University, Belgium)

ISBN: 978-3-03719-110-1 | eISBN: 978-3-03719-610-6  
129pp | Softcover | €29.00 | \$32.00

### Mathematical Foundations of Supersymmetry

Claudio Carmeli (University of Genova, Italy), Lauren Caston (RAND Corporation, CA, USA), Rita Fiorese (University of Bologna, Italy)

ISBN: 978-3-03719-097-5 | eISBN: 978-3-03719-597-0  
300pp | Softcover | €49.00 | \$53.00

### Lectures on Duflo Isomorphisms in Lie Algebra and Complex Geometry

Damien Calaque (ETH Zürich, Switzerland), Carlo A. Rossi (Max Planck Institute for Mathematics, Germany)

ISBN: 978-3-03719-096-8 | eISBN: 978-3-03719-596-3  
114pp | Softcover | €29.00 | \$32.00

### “Moonshine” of Finite Groups

Koichiro Harada (The Ohio State University, USA)

ISBN: 978-3-03719-090-6 | eISBN: 978-3-03719-590-1  
83pp | Softcover | €29.00 | \$32.00

### Finite Generalized Quadrangles

Second Edition

Stanley E. Payne (University of Colorado Denver, USA), Joseph A. Thas (Ghent University, Belgium)

ISBN: 978-3-03719-066-1 | eISBN: 978-3-03719-566-6  
299pp | Softcover | €49.00 | \$53.00

### Lectures on Differential Geometry

Iskander A. Taimanov (Sobolev Institute of Mathematics, Russia)

ISBN: 978-3-03719-050-0 | eISBN: 978-3-03719-550-5  
219pp | Softcover | €39.00 | \$42.00

### Differential Harnack Inequalities and the Ricci Flow

Reto Müller (ETH Zürich)

ISBN: 978-3-03719-030-2 | eISBN: 978-3-03719-530-7  
99pp | Softcover | €29.00 | \$32.00

### Lectures on Gaussian Integral Operators and Classical Groups

Yurii A. Neretin (University of Vienna, Austria, and Moscow State University, Russia)

ISBN: 978-3-03719-080-7 | eISBN: 978-3-03719-580-2  
571pp | Softcover | €69.00 | \$74.00

### Splitting Methods for Partial Differential Equations with Rough Solutions

Analysis and MATLAB programs

Helge Holden (Norwegian University of Science and Technology, Norway), Kenneth Hvistendahl Karlsen (University of Oslo, Norway), Knut-Andreas Lie (University of Oslo, Norway), Nils Henrik Risebro (University of Oslo, Norway)

ISBN: 978-3-03719-078-4 | eISBN: 978-3-03719-578-9  
234pp | Softcover | €39.00 | \$42.00

### Wavelets, Their Friends, and What They Can Do for You

Martin J. Mohlenkamp (Ohio University, USA), María Cristina Pereyra (University of New Mexico, USA)

ISBN: 978-3-03719-018-0 | eISBN: 978-3-03719-518-5  
119pp | Softcover | €29.00 | \$32.00

### Lectures on Empirical Processes

Theory and Statistical Applications

Paul Deheuvels (Université de Paris VI, France), Eustasio del Barrio (Universidad de Valladolid, Spain), Sara van de Geer (ETH Zürich, Switzerland)

ISBN: 978-3-03719-027-2 | eISBN: 978-3-03719-527-7  
263pp | Softcover | €49.00 | \$53.00

## An Introduction to Noncommutative Geometry

Joseph C. Várilly (Universidad de Costa Rica)

ISBN: 978-3-03719-024-1 | eISBN: 978-3-03719-524-6  
121pp | Softcover | €29.00 | \$32.00

---

## Lectures on Algebraic Topology

Sergey V. Matveev (Chelyabinsk State University, Russia)

ISBN: 978-3-03719-023-4 | eISBN: 978-3-03719-523-9  
106pp | Softcover | €29.00 | \$32.00

---

## Uhlenbeck Compactness

Katrin Wehrheim (MIT, USA)

ISBN: 978-3-03719-004-3 | eISBN: 978-3-03719-504-8  
219pp | Softcover | €49.00 | \$53.00

---

## One Semester of Elliptic Curves

Torsten Ekedahl (University of Stockholm, Sweden)

ISBN: 978-3-03719-015-9 | eISBN: 978-3-03719-515-4  
138pp | Softcover | €39.00 | \$42.00

---

## EMS TEXTBOOKS IN MATHEMATICS

The *EMS Textbooks in Mathematics* is a book series aimed at students or professional mathematicians seeking an introduction into a particular field. The individual volumes are intended to provide not only relevant techniques, results and their applications, but afford insight into the motivations and ideas behind the theory. Suitably designed exercises help to master the subject and prepare the reader for the study of more advanced and specialized literature.

## Frobenius Algebras II

### Tilted and Hochschild Extension Algebras

Andrzej Skowroński (Nicolaus Copernicus University, Poland), Kunio Yamagata (Tokyo University of Agriculture and Technology, Japan)

ISBN: 978-3-03719-174-3 | eISBN: 978-3-03719-674-8  
629pp | Hardcover | €69.00 | \$74.00

---

## A Brief Introduction to Spectral Graph Theory

Bogdan Nica (McGill University, Canada)

ISBN: 978-3-03719-188-0 | eISBN: 978-3-03719-688-5  
168pp | Hardcover | €38.00 | \$41.00

---

## Spectral Theory in Riemannian Geometry

Olivier Lablée (Université Joseph Fourier Grenoble 1, France)

ISBN: 978-3-03719-151-4 | eISBN: 978-3-03719-651-9  
197pp | Hardcover | €49.00 | \$53.00

---

## An Introduction to Kac–Moody Groups over Fields

Timothée Marquis (Université Catholique de Louvain, Belgium)

ISBN: 978-3-03719-187-3 | eISBN: 978-3-03719-687-8  
343pp | Hardcover | €48.00 | \$52.00

---

## A Course In Error-Correcting Codes

### Second edition

Tom Høholdt (Technical University of Denmark, Denmark), Jørn Justesen (Technical University of Denmark, Denmark)

ISBN: 978-3-03719-179-8 | eISBN: 978-3-03719-679-3  
226pp | Hardcover | €49.00 | \$53.00

---

## Measure and Integration

Dietmar A. Salamon (ETH Zürich, Switzerland)

ISBN: 978-3-03719-159-0 | eISBN: 978-3-03719-659-5  
363pp | Hardcover | €59.00 | \$64.00

---

## Diffusion Processes and Stochastic Calculus

Fabrice Baudoin (Purdue University, USA)

ISBN: 978-3-03719-133-0 | eISBN: 978-3-03719-633-5  
287pp | Hardcover | €59.00 | \$64.00

---

### Analytic Projective Geometry

Eduardo Casas-Alvero (Universitat de Barcelona, Spain)

ISBN: 978-3-03719-138-5 | eISBN: 978-3-03719-638-0  
636pp | Hardcover | €69.00 | \$74.00

---

### Frobenius Algebras I

#### Basic Representation Theory

Andrzej Skowroński (Nicolaus Copernicus University, Poland), Kunio Yamagata (Tokyo University of Agriculture and Technology, Japan)

ISBN: 978-3-03719-102-6 | eISBN: 978-3-03719-602-1  
661pp | Hardcover | €69.00 | \$74.00

---

### Denumerable Markov Chains

#### Generating Functions, Boundary Theory, Random Walks on Trees

Wolfgang Woess (Graz University of Technology, Austria)

ISBN: 978-3-03719-071-5 | eISBN: 978-3-03719-571-0  
368pp | Hardcover | €59.00 | \$64.00

---

### Algebraic Topology

#### Corrected 2nd printing, 2010

Tammo tom Dieck (University of Göttingen, Germany)

ISBN: 978-3-03719-048-7 | eISBN: 978-3-03719-548-2  
578pp | Hardcover | €69.00 | \$74.00

---

### Introduction to Group Theory

Oleg Bogopolski (TU Dortmund, Germany)

ISBN: 978-3-03719-041-8 | eISBN: 978-3-03719-541-3  
187pp | Hardcover | €49.00 | \$53.00

---

### Complex Analysis

Translated from the Catalan by Ignacio Monreal

Joaquim Bruna (Universitat Autònoma de Barcelona, Spain), Julià Cufi (Universitat Autònoma de Barcelona, Spain)

ISBN: 978-3-03719-111-8 | eISBN: 978-3-03719-611-3  
576pp | Hardcover | €69.00 | \$74.00

---

### Lectures on Dynamical Systems

#### Hamiltonian Vector Fields and Symplectic Capacities

Eduard Zehnder (ETH Zürich, Switzerland)

ISBN: 978-3-03719-081-4 | eISBN: 978-3-03719-581-9  
363pp | Hardcover | €59.00 | \$64.00

---

### Lectures on Curves, Surfaces and Projective Varieties

#### A Classical View of Algebraic Geometry

Mauro C. Beltrametti (University of Genova, Italy), Ettore Carletti (University of Genova, Italy), Dionisio Gallarati (University of Genova, Italy), Giacomo Monti Bragadin (University of Genova, Italy)

ISBN: 978-3-03719-064-7 | eISBN: 978-3-03719-564-2  
506pp | Hardcover | €69.00 | \$74.00

---

### First Steps in Several Complex Variables: Reinhardt Domains

Marek Jarnicki (Jagiellonian University, Poland), Peter Pflug (University of Oldenburg, Germany)

ISBN: 978-3-03719-049-4 | eISBN: 978-3-03719-549-9  
367pp | Hardcover | €69.00 | \$74.00

---

### An Invitation to Quantum Groups and Duality From Hopf Algebras to Multiplicative Unitaries and Beyond

Thomas Timmermann (University of Münster, Germany)

ISBN: 978-3-03719-043-2 | eISBN: 978-3-03719-543-7  
427pp | Hardcover | €69.00 | \$74.00

---

## Distributions, Sobolev Spaces, Elliptic Equations

Dorothee D. Haroske (University of Jena, Germany), Hans Triebel (University of Jena, Germany)

ISBN: 978-3-03719-042-5 | eISBN: 978-3-03719-542-0  
303pp | Hardcover | €59.00 | \$64.00

---

## Locally Compact Groups

Markus Stroppel (University of Stuttgart, Germany)

ISBN: 978-3-03719-016-6 | eISBN: 978-3-03719-516-1  
312pp | Hardcover | €69.00 | \$74.00

---

## Differential-Algebraic Equations

### Analysis and Numerical Solution

Peter Kunkel (University of Leipzig, Germany), Volker Mehrmann (Technical University of Berlin, Germany)

ISBN: 978-3-03719-017-3 | eISBN: 978-3-03719-517-8  
385pp | Hardcover | €69.00 | \$74.00

---

## EMS TRACTS IN MATHEMATICS

This series includes advanced texts and monographs covering all fields in pure and applied mathematics. The Tracts will give a reliable introduction and reference to special fields of current research. The books in the series will in most cases be authored monographs, although edited volumes may be published if appropriate. They are addressed to graduate students seeking access to research topics as well as to the experts in the field working at the frontier of research.

Edited by Yann Bugeaud (Université de Strasbourg), Camillo De Lellis (Institute for Advanced Study), Michael Farber (Queen Mary University), Michael Röckner (Universität Bielefeld and Purdue University), and Alexander Varchenko (University of North Carolina at Chapel Hill)

## Estimates for Differential Operators in Half-space

Translated from the German by Darya Apushkinskaya

Igor W. Gel'man (Akko, Israel), Vladimir G. Maz'ya (Linköping University, Sweden, and University of Liverpool, UK)

ISBN: 978-3-03719-191-0 | eISBN: 978-3-03719-691-5  
264pp | Hardcover | €48.00 | \$52.00

---

## Regular, Quasi-regular and Induced Representations of Infinite-dimensional Groups

Alexander V. Kosyak (National Academy of Science of Ukraine, Ukraine)

ISBN: 978-3-03719-181-1 | eISBN: 978-3-03719-681-6  
587pp | Hardcover | €98.00 | \$105.00

---

## Degenerate Complex Monge–Ampère Equations

Vincent Guedj (Université Paul Sabatier, France), Ahmed Zeriahi (Université Paul Sabatier, France)

ISBN: 978-3-03719-167-5 | eISBN: 978-3-03719-667-0  
496pp | Hardcover | €99.00 | \$106.00

---

## K3 Surfaces

Shigeyuki Kondō (Nagoya University, Japan)

ISBN: 978-3-03719-208-5 | eISBN: 978-3-03719-708-0  
250pp | Hardcover | €78.00 | \$84.00

---

## Boundary Behavior of Solutions to Elliptic Equations in General Domains

Vladimir G. Maz'ya (Linköping University, Sweden and University of Liverpool, UK)

ISBN: 978-3-03719-190-3 | eISBN: 978-3-03719-690-8  
441pp | Hardcover | €78.00 | \$84.00

---

## Shape Variation and Optimization

### A Geometrical Analysis

Antoine Henrot (Université de Lorraine, France), Michel Pierre (ENS Cachan Bretagne, France)

ISBN: 978-3-03719-178-1 | eISBN: 978-3-03719-678-6  
379pp | Hardcover | €68.00 | \$73.00

---

## Bound States of the Magnetic Schrödinger Operator

Nicolas Raymond (Université de Rennes, France)

ISBN: 978-3-03719-169-9 | eISBN: 978-3-03719-669-4  
394pp | Hardcover | €69.00 | \$74.00

---

### Elliptic PDEs, Measures and Capacities

From the Poisson Equation to Nonlinear Thomas–Fermi Problems

Augusto C. Ponce (Université catholique de Louvain, Belgium)

ISBN: 978-3-03719-140-8 | eISBN: 978-3-03719-640-3  
463pp | Hardcover | €69.00 | \$74.00

### Foundations of Garside Theory

Patrick Dehornoy (Université de Caen, France), François Digne (Université de Picardie Jules-Verne, France), Eddy Goddelle (Université de Caen, France), Daan Krammer (University of Warwick, UK), Jean Michel (Université Denis Diderot Paris 7, France)

ISBN: 978-3-03719-139-2 | eISBN: 978-3-03719-639-7  
710pp | Hardcover | €119.00 | \$128.00

### Invariant Manifolds in Discrete and Continuous Dynamical Systems

Kaspar Nipp (ETH Zürich, Switzerland), Daniel Stoffer (ETH Zürich, Switzerland)

ISBN: 978-3-03719-124-8 | eISBN: 978-3-03719-624-3  
225pp | Hardcover | €69.00 | \$74.00

### Infinitesimal Geometry of Quasiconformal and Bi-Lipschitz Mappings in the Plane

Bogdan Bojarski (IM PAN, Poland), Vladimir Gutlyanskii (National Academy of Science of Ukraine, Ukraine), Olli Martio (Finnish Academy of Science and Letters, Finland), Vladimir Ryazanov (National Academy of Science of Ukraine, Ukraine)

ISBN: 978-3-03719-122-4 | eISBN: 978-3-03719-622-9  
214pp | Hardcover | €69.00 | \$74.00

### Nonlinear Potential Theory on Metric Spaces

Anders Björn (Linköping University, Sweden), Jana Björn (Linköping University, Sweden)

ISBN: 978-3-03719-099-9 | eISBN: 978-3-03719-599-4  
415pp | Hardcover | €69.00 | \$74.00

### Metric Geometry of Locally Compact Groups

Yves Cornuier (Université Paris-Sud, France), Pierre de la Harpe (Université de Genève, Switzerland)

ISBN: 978-3-03719-166-8 | eISBN: 978-3-03719-666-3  
243pp | Hardcover | €69.00 | \$74.00

### Hybrid Function Spaces, Heat and Navier–Stokes Equations

Hans Triebel (University of Jena, Germany)

ISBN: 978-3-03719-150-7 | eISBN: 978-3-03719-650-2  
196pp | Hardcover | €59.00 | \$64.00

### Local Function Spaces, Heat and Navier–Stokes Equations

Hans Triebel (University of Jena, Germany)

ISBN: 978-3-03719-123-1 | eISBN: 978-3-03719-623-6  
241pp | Hardcover | €69.00 | \$74.00

### Separately Analytic Functions

Marek Jarnicki (Jagiellonian University, Poland), Peter Pflug (University of Oldenburg, Germany)

ISBN: 978-3-03719-098-2 | eISBN: 978-3-03719-598-7  
306pp | Hardcover | €69.00 | \$74.00

### Nonabelian Algebraic Topology

Filtered Spaces, Crossed Complexes, Cubical Homotopy Groupoids

Ronald Brown (Bangor University, UK), Philip J. Higgins (Durham University, UK), Rafael Sivera (Universitat de València, Spain)

ISBN: 978-3-03719-083-8 | eISBN: 978-3-03719-583-3  
703pp | Hardcover | €109.00 | \$117.00

## Geometrisation of 3-Manifolds

Laurent Bessières (Université Joseph Fourier, Grenoble, France), Gérard Besson (Université Joseph Fourier, France), Michel Boileau (Université Paul Sabatier, France), Sylvain Maillot (Université Montpellier II, France), Joan Porti (Universitat Autònoma de Barcelona, Spain)

ISBN: 978-3-03719-082-1 | eISBN: 978-3-03719-582-6  
247pp | Hardcover | €59.00 | \$64.00

---

## Homotopy Quantum Field Theory

With Appendices by Michael Müger and Alexis Virelizier

Vladimir Turaev (Indiana University, USA)

ISBN: 978-3-03719-086-9 | eISBN: 978-3-03719-586-4  
290pp | Hardcover | €69.00 | \$74.00

---

## Cohomological Theory of Crystals over Function Fields

Gebhard Böckle (Interdisciplinary Center for Scientific Computing, Germany), Richard Pink (ETH Zürich, Switzerland)

ISBN: 978-3-03719-074-6 | eISBN: 978-3-03719-574-1  
195pp | Hardcover | €59.00 | \$64.00

---

## Efficient Numerical Methods for Non-local Operators

$\mathcal{H}^2$ -Matrix Compression, Algorithms and Analysis

Steffen Börm (Kiel University, Germany)

ISBN: 978-3-03719-091-3 | eISBN: 978-3-03719-591-8  
441pp | Hardcover | €69.00 | \$74.00

---

## Bases in Function Spaces, Sampling, Discrepancy, Numerical integration

Hans Triebel (University of Jena, Germany)

ISBN: 978-3-03719-085-2 | eISBN: 978-3-03719-585-7  
305pp | Hardcover | €69.00 | \$74.00

---

## Tractability of Multivariate Problems

### Volume I: Linear Information

Erich Novak (University of Jena, Germany), Henryk Woźniakowski (Columbia University, USA, and University of Warsaw, Poland)

ISBN: 978-3-03719-026-5 | eISBN: 978-3-03719-526-0  
395pp | Hardcover | €79.00 | \$85.00

---

## Tractability of Multivariate Problems

### Volume II: Standard Information for Functionals

Erich Novak (University of Jena, Germany), Henryk Woźniakowski (Columbia University, USA, and University of Warsaw, Poland)

ISBN: 978-3-03719-084-5 | eISBN: 978-3-03719-584-0  
675pp | Hardcover | €109.00 | \$117.00

---

## Tractability of Multivariate Problems

### Volume III: Standard Information for Operators

Erich Novak (University of Jena, Germany), Henryk Woźniakowski (Columbia University, USA, and University of Warsaw, Poland)

ISBN: 978-3-03719-116-3 | eISBN: 978-3-03719-616-8  
604pp | Hardcover | €109.00 | \$117.00

---

## The Statistical Mechanics of Quantum Lattice Systems

### A Path Integral Approach

Sergio Albeverio (University of Bonn, Germany), Yuri Kondratiev (University of Bielefeld, Germany), Yuri Kozitsky (Maria Curie-Skłodowska University, Poland), Michael Röckner (University of Bielefeld, Germany)

ISBN: 978-3-03719-070-8 | eISBN: 978-3-03719-570-3  
392pp | Hardcover | €69.00 | \$74.00

---

## Function Spaces and Wavelets on Domains

Hans Triebel (University of Jena, Germany)

ISBN: 978-3-03719-019-7 | eISBN: 978-3-03719-519-2  
265pp | Hardcover | €69.00 | \$74.00

---

## EMS TRACTS IN MATHEMATICS

### Functional Equations and Characterization Problems on Locally Compact Abelian Groups

Gennadiy Feldman (B. Verkin Institute for Low Temperature Physics and Engineering of the National Academy of Sciences, Ukraine)

ISBN: 978-3-03719-045-6 | eISBN: 978-3-03719-545-1  
268pp | Hardcover | €69.00 | \$74.00

### Local and Analytic Cyclic Homology

Ralf Meyer (University of Göttingen, Germany)

ISBN: 978-3-03719-039-5 | eISBN: 978-3-03719-539-0  
368pp | Hardcover | €69.00 | \$74.00

### Elliptic Mixed, Transmission and Singular Crack Problems

Gohar Harutyunyan (University of Oldenburg, Germany),  
B.-Wolfgang Schulze (University of Potsdam, Germany)

ISBN: 978-3-03719-040-1 | eISBN: 978-3-03719-540-6  
777pp | Hardcover | €119.00 | \$128.00

### Degenerate Diffusions

#### Initial Value Problems and Local Regularity Theory

Panagiota Daskalopoulos (Columbia University, USA),  
Carlos E. Kenig (University of Chicago, USA)

ISBN: 978-3-03719-033-3 | eISBN: 978-3-03719-533-8  
207pp | Hardcover | €59.00 | \$64.00

## ESI LECTURES IN MATHEMATICS AND PHYSICS

The purpose of the series *ESI Lectures in Mathematics and Physics* is to make selected texts arising from its research programme better known to a wider community and easily available to a worldwide audience. It publishes lecture notes of courses given by internationally renowned experts on highly active research topics. In order to make the series attractive to graduate students as well as researchers, special emphasis is given to concise and lively presentations with a level and focus appropriate to a student's background and at prices commensurate with a student's means.

Edited by Christoph Dellago and Ilaria Perugia (Universität Wien)

### Lectures on the $L^2$ -Sobolev Theory of the $\bar{\partial}$ -Neumann problem

Emil J. Straube (Texas A&M University, USA)

ISBN: 978-3-03719-076-0 | eISBN: 978-3-03719-576-5  
214pp | Softcover | €49.00 | \$53.00

### Boltzmann's Legacy

Editors: Giovanni Gallavotti (Università di Roma La Sapienza, Italy), Wolfgang L. Reiter (University of Vienna, Austria), Jakob Yngvason (University of Vienna, Austria)

ISBN: 978-3-03719-057-9 | eISBN: 978-3-03719-557-4  
284pp | Softcover | €69.00 | \$74.00

### Wave Equations on Lorentzian Manifolds and Quantization

Christian Bär (University of Potsdam, Germany), Nicolas Ginoux (University of Regensburg, Germany), Frank Pfäffle (University of Potsdam, Germany)

ISBN: 978-3-03719-037-1 | eISBN: 978-3-03719-537-6  
202pp | Softcover | €49.00 | \$53.00

### The Cauchy Problem in General Relativity

Hans Ringström (KTH Mathematics, Sweden)

ISBN: 978-3-03719-053-1 | eISBN: 978-3-03719-553-6  
307pp | Softcover | €49.00 | \$53.00

### Recent Developments in Pseudo-Riemannian Geometry

Editors: Dmitri V. Alekseevsky (School of Mathematics, The University of Edinburgh, UK), Helga Baum (Humboldt-Universität, Germany)

ISBN: 978-3-03719-051-7 | eISBN: 978-3-03719-551-2  
549pp | Softcover | €69.00 | \$74.00

### Lectures on Kähler Manifolds

Werner Ballmann (University of Bonn, Germany)

ISBN: 978-3-03719-025-8 | eISBN: 978-3-03719-525-3  
182pp | Softcover | €49.00 | \$53.00

### Lectures on Real Semisimple Lie Algebras and Their Representations

Arkady L. Onishchik (Yaroslavl State University, Russia)

ISBN: 978-3-03719-002-9 | eISBN: 978-3-03719-502-4  
95pp | Softcover | €29.00 | \$32.00

## HERITAGE OF EUROPEAN MATHEMATICS

*"... il me paraît que si l'on veut faire des progrès dans les mathématiques il faut étudier les maîtres ..."*

*"... it appears to me that if one wants to make progress in mathematics one should study the masters ..."*

– Niels Henrik Abel, in his Paris notebook dated 6 August 1826

This series features the selected or collected works of distinguished mathematicians. Biographies of and correspondence between outstanding mathematicians, as well as other texts of historico-mathematical interest are also included.

Advisory Board: **Ciro Ciliberto** (Università degli Studi di Roma "Tor Vergata"), **Władysław Narkiewicz** (Uniwersytet Wrocławski), **Samuel J. Patterson** (Universität Göttingen), and **Rossana Tazzioli** (Université de Lille).

### Jacques Tits, Œuvres – Collected Works

Editors: **Francis Buekenhout** (Université libre de Bruxelles, Belgium), **Bernhard Mühlherr** (Justus Liebig University Giessen, Germany), **Jean-Pierre Tignol** (Université catholique de Louvain, Belgium), **Hendrik van Maldeghem** (Ghent University, Belgium)

ISBN: 978-3-03719-126-2 | eISBN: 978-3-03719-626-7  
3963pp | Hardcover | €650.00 | \$696.00

### The Mathematical Writings of Évariste Galois

Corrected 2nd printing, September 2013

Peter M. Neumann (University of Oxford, UK)

ISBN: 978-3-03719-104-0 | eISBN: 978-3-03719-604-5  
421pp | Hardcover | €79.00 | \$85.00

### Nikolai I. Lobachevsky, Pangeometry

Editors: **Athanase Papadopoulos** (IRMA, France)

ISBN: 978-3-03719-087-6 | eISBN: 978-3-03719-587-1  
322pp | Hardcover | €79.00 | \$85.00

### Thomas Harriot's Doctrine of Triangular Numbers: the 'Magisteria Magna'

Editors: **Janet Beery** (University of Redlands, USA), **Jacqueline Stedall** (University of Oxford, UK)

ISBN: 978-3-03719-059-3 | eISBN: 978-3-03719-559-8  
144pp | Hardcover | €69.00 | \$74.00

### Emil Artin and Beyond – Class Field Theory and L-Functions

**Della Dumbaugh** (University of Richmond, USA), **Joachim Schwermer** (University of Vienna, Austria)

ISBN: 978-3-03719-146-0 | eISBN: 978-3-03719-646-5  
245pp | Hardcover | €79.00 | \$85.00

### Contributions to the History of Number Theory in the 20th Century

**Peter Roquette** (University of Heidelberg, Germany)

ISBN: 978-3-03719-113-2 | eISBN: 978-3-03719-613-7  
289pp | Hardcover | €79.00 | \$85.00

### From Cardano's Great Art to Lagrange's Reflections: Filling a Gap in the History of Algebra

**Jacqueline Stedall** (University of Oxford, UK)

ISBN: 978-3-03719-092-0 | eISBN: 978-3-03719-592-5  
236pp | Hardcover | €79.00 | \$85.00

### Hans Freudenthal, Selecta

Editors: **Tonny A. Springer** (Utrecht University, The Netherlands), **Dirk van Dalen** (Utrecht University, The Netherlands)

ISBN: 978-3-03719-058-6 | eISBN: 978-3-03719-558-1  
661pp | Hardcover | €139.00 | \$149.00

### Andrzej Schinzel, Selecta

Editors: **Henryk Iwaniec** (Rutgers University, USA), **Władysław Narkiewicz** (University of Wrocław, Poland), **Jerzy Urbanowicz** (IM PAN, Poland)

ISBN: 978-3-03719-038-8 | eISBN: 978-3-03719-538-3  
1417pp | Hardcover | €179.00 | \$192.00

## IRMA LECTURES IN MATHEMATICS AND THEORETICAL PHYSICS

This series is devoted to the publication of research monographs, conferences or workshops originating from the Institut de Recherche Mathématique Avancée (Strasbourg, France). The goal is to promote recent advances in mathematics and theoretical physics and make them accessible to a wide circle of professional and aspiring mathematicians and physicists.

Edited by: Olivier Guichard (Institut de Recherche Mathématique Avancée)

### Handbook of Teichmüller Theory, Volume VII

Editors: Athanase Papadopoulos (Université de Strasbourg, France)

ISBN: 978-3-03719-203-0 | eISBN: 978-3-03719-703-5  
626pp | Hardcover | €88.00 | \$95.00

### Linear Forms in Logarithms and Applications

Yann Bugeaud (Université de Strasbourg, France)

ISBN: 978-3-03719-183-5 | eISBN: 978-3-03719-683-0  
240pp | Softcover | €38.00 | \$41.00

### Handbook of Teichmüller Theory, Volume V

Editors: Athanase Papadopoulos (Université de Strasbourg, France)

ISBN: 978-3-03719-160-6 | eISBN: 978-3-03719-660-1  
596pp | Hardcover | €99.00 | \$106.00

### Free Loop Spaces in Geometry and Topology Including the monograph *Symplectic cohomology and Viterbos theorem* by Mohammed Abouzaid

Editors: Janko Latschev (Universität Hamburg, Germany),  
Alexandru Oancea (Sorbonne Universités, France)

ISBN: 978-3-03719-153-8 | eISBN: 978-3-03719-653-3  
500pp | Hardcover | €79.00 | \$85.00

### Sophus Lie and Felix Klein: The Erlangen Program and Its Impact in Mathematics and Physics

Editors: Lizhen Ji (University of Michigan, Ann Arbor,  
USA), Athanase Papadopoulos (Université de Strasbourg,  
France)

ISBN: 978-3-03719-148-4 | eISBN: 978-3-03719-648-9  
348pp | Hardcover | €59.00 | \$64.00

### Eighteen Essays in Non-Euclidean Geometry

Editors: Vincent Alberge (Fordham University, USA),  
Athanase Papadopoulos (Université de Strasbourg, France)

ISBN: 978-3-03719-196-5 | eISBN: 978-3-03719-696-0  
475pp | Hardcover | €78.00 | \$84.00

### Handbook of Teichmüller Theory, Volume VI

Editors: Athanase Papadopoulos (Université de  
Strasbourg, France)

ISBN: 978-3-03719-161-3 | eISBN: 978-3-03719-661-8  
652pp | Hardcover | €99.00 | \$106.00

### Metric Measure Geometry

#### Gromov's Theory of Convergence and Concentration of Metrics and Measures

Takashi Shioya (Tohoku University, Japan)

ISBN: 978-3-03719-158-3 | eISBN: 978-3-03719-658-8  
194pp | Hardcover | €49.00 | \$53.00

### Faà di Bruno Hopf Algebras, Dyson–Schwinger Equations, and Lie–Butcher Series

Editors: Kurusch Ebrahimi-Fard (Universidad Autónoma de  
Madrid, Spain), Frédéric Fauvet (Université de Strasbourg,  
France)

ISBN: 978-3-03719-143-9 | eISBN: 978-3-03719-643-4  
466pp | Softcover | €59.00 | \$64.00

### Handbook of Hilbert Geometry

Editors: Athanase Papadopoulos (Université de  
Strasbourg, France), Marc Troyanov (École Polytechnique  
Fédérale de Lausanne, Switzerland)

ISBN: 978-3-03719-147-7 | eISBN: 978-3-03719-647-2  
460pp | Hardcover | €79.00 | \$85.00

## Handbook of Teichmüller Theory, Volume IV

Editors: Athanase Papadopoulos (IRMA, Strasbourg, France)

ISBN: 978-3-03719-117-0 | eISBN: 978-3-03719-617-5  
838pp | Hardcover | €109.00 | \$117.00

---

## Singularities in Geometry and Topology

Strasbourg 2009

Editors: Vincent Blanlœil (IRMA, Strasbourg, France), Toru Ohmoto (Hokkaido University, Sapporo, Japan)

ISBN: 978-3-03719-118-7 | eISBN: 978-3-03719-618-2  
370pp | Softcover | €59.00 | \$64.00

---

## Strasbourg Master Class on Geometry

Editors: Athanase Papadopoulos (IRMA, Strasbourg, France)

ISBN: 978-3-03719-105-7 | eISBN: 978-3-03719-605-2  
461pp | Softcover | €59.00 | \$64.00

---

## Renormalization and Galois Theories

Editors: Alain Connes (IHÉS, Bures-sur-Yvette, France), Frédéric Fauvet (IRMA, Strasbourg, France), Jean-Pierre Ramis (Institut de Mathématiques de Toulouse, France)

ISBN: 978-3-03719-073-9 | eISBN: 978-3-03719-573-4  
279pp | Softcover | €49.00 | \$53.00

---

## Handbook of Teichmüller Theory, Volume II

Editors: Athanase Papadopoulos (IRMA, Strasbourg, France)

ISBN: 978-3-03719-055-5 | eISBN: 978-3-03719-555-0  
883pp | Hardcover | €109.00 | \$117.00

---

## Metric Spaces, Convexity and Nonpositive Curvature

Second edition

Athanase Papadopoulos (IRMA, Strasbourg, France)

ISBN: 978-3-03719-132-3 | eISBN: 978-3-03719-632-8  
320pp | Softcover | €59.00 | \$64.00

---

## Handbook of Teichmüller Theory, Volume III

Editors: Athanase Papadopoulos (IRMA, Strasbourg, France)

ISBN: 978-3-03719-103-3 | eISBN: 978-3-03719-603-8  
874pp | Hardcover | €109.00 | \$117.00

---

## Handbook of Pseudo-Riemannian Geometry and Supersymmetry

Editors: Vicente Cortés (University of Hamburg, Germany)

ISBN: 978-3-03719-079-1 | eISBN: 978-3-03719-579-6  
964pp | Hardcover | €129.00 | \$139.00

---

## Dynamical Systems and Processes

Michel Weber (IRMA, Strasbourg, France)

ISBN: 978-3-03719-046-3 | eISBN: 978-3-03719-546-8  
773pp | Hardcover | €109.00 | \$117.00

---

## Quantum Groups

Editors: Benjamin Enriquez (IRMA, Strasbourg, France)

ISBN: 978-3-03719-047-0 | eISBN: 978-3-03719-547-5  
140pp | Softcover | €49.00 | \$53.00

---

## IRMA LECTURES IN MATHEMATICS AND THEORETICAL PHYSICS

### Handbook of Teichmüller Theory, Volume I

Editors: Athanase Papadopoulos (IRMA, Strasbourg, France)

ISBN: 978-3-03719-029-6 | eISBN: 978-3-03719-529-1  
802pp | Hardcover | €109.00 | \$117.00

### Physics and Number Theory

Editors: Louise Nyssen (Université Montpellier, France)

ISBN: 978-3-03719-028-9 | eISBN: 978-3-03719-528-4  
274pp | Softcover | €49.00 | \$53.00

### Numerical Methods for Hyperbolic and Kinetic Problems

Editors: Stéphane Cordier (Orléans, France), Thierry Goudon (Lille, France), Michael Gutnic (Strasbourg, France), Eric Sonnendrücker (Strasbourg, France)

ISBN: 978-3-03719-012-8 | eISBN: 978-3-03719-512-3  
367pp | Softcover | €49.00 | \$53.00

### Differential Equations and Quantum Groups

#### Andrey A. Bolibrukh Memorial Volume

Editors: Daniel Bertrand (Université Pierre et Marie Curie, Paris, France), Benjamin Enriquez (IRMA, France), Claude Mitschi (IRMA, France), Claude Sabbah (École Polytechnique, France), Reinhard Schäfke (IRMA, France)

ISBN: 978-3-03719-020-3 | eISBN: 978-3-03719-520-8  
302pp | Softcover | €49.00 | \$53.00

### AdS/CFT Correspondence: Einstein Metrics and Their Conformal Boundaries

Editors: Olivier Biquard (IRMA, France)

ISBN: 978-3-03719-013-5 | eISBN: 978-3-03719-513-0  
259pp | Softcover | €49.00 | \$53.00

## MEMOIRS OF THE EUROPEAN MATHEMATICAL SOCIETY

The *Memoirs of the European Mathematical Society* publish outstanding research contributions in individual volumes, in all areas of mathematics and with a particular focus on works that are longer and more comprehensive than usual research articles.

The collection's editorial board consists of the editors-in-chief of the *Journal of the European Mathematical Society* and the *EMS Surveys in Mathematical Science*, along with editors of book series of the publishing house of the EMS as well as other distinguished mathematicians.

### On Einstein's Effective Viscosity Formula

Mitia Duerinckx (Université Libre de Bruxelles, Belgium, University of Paris-Saclay, France), Antoine Gloria (Sorbonne University, Paris, France; Institut Universitaire de France, Université Libre de Bruxelles, Belgium)

ISBN: 978-3-98547-055-6 | eISBN: 978-3-98547-555-1  
196pp | Softcover | €69.00 | \$75.00

### Conductive Homogeneity of Compact Metric Spaces and Construction of $p$ -Energy

Jun Kigami (Kyoto University, Japan)

ISBN: 978-3-98547-056-3 | eISBN: 978-3-98547-556-8  
138pp | Softcover | €69.00 | \$75.00

### The Universal Coefficient Theorem for $C^*$ -Algebras with Finite Complexity

Rufus Willett (University of Hawai'i at Mānoa, Honolulu, USA), Guoliang Yu (Texas A&M University, , USA)

ISBN: 978-3-98547-066-2 | eISBN: 978-3-98547-566-7  
108pp | Softcover | €69.00 | \$75.00

## Purely Arithmetic PDEs Over a $p$ -Adic Field: $\delta$ -Characters and $\delta$ -Modular Formss

Alexandru Buium (University of New Mexico, USA), Lance  
Edward Miller (University of Arkansas, USA)

ISBN: 978-3-98547-057-0 | eISBN: 978-3-98547-557-5  
116pp | Softcover | €69.00 | \$75.00

---

## Positive Energy Representations of Gauge Groups I

### Localization

Bas Janssens, Delft University of Technology, Netherlands,  
Karl-Hermann Neeb, Friedrich-Alexander University  
Erlangen-Nuremberg, Germany

ISBN: 978-3-98547-067-9 | eISBN: 978-3-98547-567-4  
156pp | Softcover | €69.00 | \$75.00

---

## The Lévy Flight Foraging Hypothesis in Bounded Regions

### Subordinate Brownian Motions and High-risk/High-gain Strategies

Serena Dipierro, University of Western Australia, Australia,  
Giovanni Giacomini, University of Western Australia,  
Australia, Enrico Valdinoci, University of Western Australia,  
Australia

ISBN: 978-3-98547-068-6 | eISBN: 978-3-98547-568-1  
99pp | Softcover | €69.00 | \$75.00

---

## Extension, Separation and Isomorphic Reverse Isoperimetry

Assaf Naor, Princeton University, USA

ISBN: 978-3-98547-069-3 | eISBN: 978-3-98547-569-8  
242pp | Softcover | €69.00 | \$75.00

---

## Integrating the Wigner Distribution on Subsets of the Phase Space, a Survey

Nicolas Lerner, Institut de Mathématiques de Jussieu,  
Sorbonne Université, France

ISBN: 978-3-98547-071-6 | eISBN: 978-3-98547-571-1  
224pp | Softcover | €69.00 | \$75.00

---

## On Efficient Algorithms for Computing Near-Best Polynomial Approximations to High-Dimensional, Hilbert-Valued Functions from Limited Samples

Ben Adcock, Simon Fraser University, Canada, Simone  
Brugiapaglia, Concordia University, Canada, Nick Dexter,  
Simon Fraser University, Canada, Sebastian Moraga,  
Simon Fraser University, Canada

ISBN: 978-3-98547-070-9 | eISBN: 978-3-98547-570-4  
112pp | Softcover | €69.00 | \$75.00

---

## The Limiting Absorption Principle for Massless Dirac Operators, Properties of Spectral Shift Functions, and an Application to the Witten Index of Non-Fredholm Operators

Alan L. Carey (Australian National University, and  
University of Wollongong, Australia), Fritz Gesztesy (Baylor  
University, USA), Galina Levitina (Australian National  
University, Australia), Roger Nichols (The University  
of Tennessee at Chattanooga, USA), Fedor Sukochev  
(University of New South Wales, Australia), Dmitriy Zanin  
(University of New South Wales, Australia)

ISBN: 978-3-98547-049-5 | eISBN: 978-3-98547-549-0  
213pp | Softcover | €69.00 | \$75.00

---

## Laplacians on Infinite Graphs

Aleksey Kostenko (University of Ljubljana, Slovenia; and  
University of Vienna, Austria), Noema Nicolussi (University  
of Vienna, Austria)

ISBN: 978-3-98547-025-9 | eISBN: 978-3-98547-525-4  
240pp | Softcover | €69.00 | \$75.00

---

## Long-Time Dispersive Estimates for Perturbations of a Kink Solution of One-Dimensional Cubic Wave Equations

Jean-Marc Delort (Université Sorbonne Paris-Nord,  
France), Nader Masmoudi (New York University Abu  
Dhabi, United Arab Emirates; Courant Institute of  
Mathematical Sciences, USA)

ISBN: 978-3-98547-020-4 | eISBN: 978-3-98547-520-9  
292pp | Softcover | €69.00 | \$75.00

---

## Cyclic Stratum of Frobenius Manifolds, Borel– Laplace $(\alpha, \beta)$ -Multitransforms, and Integral Representations of Solutions of Quantum Differential Equations

Giordano Cotti (Universidade de Lisboa, Portugal)

ISBN: 978-3-98547-023-5 | eISBN: 978-3-98547-523-0  
134pp | Softcover | €69.00 | \$75.00

---

## MÜNSTER LECTURES IN MATHEMATICS

The *Münster Lectures in Mathematics* report on recent developments in mathematics. Material considered for publication includes monographs and lecture notes or seminars on a new field or a new angle at a classical field.

Edited by Christopher Deninger and Linus Kramer (Universität Münster)

### Free Probability and Operator Algebras

Editors: Nicolai Stammeier (University of Oslo, Norway), Dan-Virgil Voiculescu (University of California, USA), Moritz Weber (Universität Saarbrücken, Germany)

ISBN: 978-3-03719-165-1 | eISBN: 978-3-03719-665-6  
142pp | Softcover | €39.00 | \$42.00

### Lectures in Model Theory

Editors: Franziska Jahnke (Universität Münster, Germany), Daniel Palacín (The Hebrew University of Jerusalem, Israel), Katrin Tent (Universität Münster, Germany)

ISBN: 978-3-03719-184-2 | eISBN: 978-3-03719-684-7  
222pp | Softcover | €38.00 | \$41.00

## THE QGM MASTER CLASS SERIES

This series contains lecture notes, textbooks and monographs arising from the master classes held at QGM. The guiding theme can be characterized as the study of geometrical aspects and mathematical foundations of quantum field theory and string theory.

Edited by Jørgen Ellegaard Andersen (Aarhus Universitet), Henning Haahr Andersen (Aarhus Universitet), Nigel Hitchin (University of Oxford), Maxim Kontsevich (Institut des Hautes Études Scientifiques), Robert Penner (California Institute of Technology) and Nicolai Reshetikhin (University of California, Berkeley)

### Decorated Teichmüller Theory

Robert C. Penner (Centre for Quantum Geometry of Moduli Spaces, Aarhus, Denmark, and Caltech, Pasadena, USA)

ISBN: 978-3-03719-075-3 | eISBN: 978-3-03719-575-8  
377pp | Hardcover | €69.00 | \$74.00

### Lectures on Algebraic Categorification

Volodymyr Mazorchuk (Uppsala University, Sweden)

ISBN: 978-3-03719-108-8 | eISBN: 978-3-03719-608-3  
128pp | Softcover | €29.00 | \$32.00

## ZÜRICH LECTURES IN ADVANCED MATHEMATICS

Mathematics in Zürich has a long and distinguished tradition, in which the writing of lecture notes volumes and research monographs play a prominent part. The *Zürich Lectures in Advanced Mathematics* series aims to make some of these publications better known to a wider audience.

Edited by Habib Ammari (ETH Zürich), Alexander Gorodnik (Universität Zürich, managing editor), Urs Lang (ETH Zürich, managing editor), Michael Struwe (ETH Zürich)

### Geometry and Topology of Surfaces

Sebastian Baader (Universität Bern, Switzerland)

ISBN: 978-3-98547-000-6 | eISBN: 978-3-98547-500-1  
86pp | Softcover | €29.00 | \$32.00

### Quantum Ergodicity and Delocalization of Schrödinger Eigenfunctions

Nalini Anantharaman (Université de Strasbourg and CNRS, France)

ISBN: 978-3-98547-015-0 | eISBN: 978-3-98547-515-5  
140pp | Softcover | €39.00 | \$45.00

### Hyperbolic Flows

Todd Fisher (Brigham Young University, USA), Boris Hasselblatt (Tufts University, USA)

ISBN: 978-3-03719-200-9 | eISBN: 978-3-03719-700-4  
737pp | Softcover | €78.00 | \$84.00

### Geometric and Topological Aspects of Coxeter Groups and Buildings

Anne Thomas (The University of Sydney, Australia)

ISBN: 978-3-03719-189-7 | eISBN: 978-3-03719-689-2  
160pp | Softcover | €34.00 | \$37.00

### The Monge–Ampère Equation and Its Applications

Alessio Figalli (ETH Zürich, Switzerland)

ISBN: 978-3-03719-170-5 | eISBN: 978-3-03719-670-0  
210pp | Softcover | €39.00 | \$42.00

## Compactness and Stability for Nonlinear Elliptic Equations

Emmanuel Hebey (Université de Cergy-Pontoise, France)

ISBN: 978-3-03719-134-7 | eISBN: 978-3-03719-634-2  
301pp | Softcover | €49.00 | \$53.00

---

## Topics in Occupation Times and Gaussian Free Fields

Alain-Sol Sznitman (ETH Zürich, Switzerland)

ISBN: 978-3-03719-109-5 | eISBN: 978-3-03719-609-0  
121pp | Softcover | €29.00 | \$32.00

---

## From Newton to Boltzmann: Hard Spheres and Short-range Potentials

Isabelle Gallagher (Université Paris-Diderot France), Laure Saint-Raymond (École Normale Supérieure, France), Benjamin Texier (Université Paris Diderot - Paris 7, France)

ISBN: 978-3-03719-129-3 | eISBN: 978-3-03719-629-8  
148pp | Softcover | €39.00 | \$42.00

---

## Asymptotic Theory of Transaction Costs

Walter Schachermayer (Universität Wien, Austria)

ISBN: 978-3-03719-173-6 | eISBN: 978-3-03719-673-1  
160pp | Softcover | €39.00 | \$42.00

---

## Coulomb Gases and Ginzburg–Landau Vortices

Sylvia Serfaty (Université Pierre et Marie Curie (Paris VI), France)

ISBN: 978-3-03719-152-1 | eISBN: 978-3-03719-652-6  
165pp | Softcover | €39.00 | \$42.00

---

## Lecture Notes on Cluster Algebras

Robert J. Marsh (University of Leeds, UK)

ISBN: 978-3-03719-130-9 | eISBN: 978-3-03719-630-4  
121pp | Softcover | €29.00 | \$32.00

---

## Lectures on Representations of Surface Groups

François Labourie (Université Paris Sud, France)

ISBN: 978-3-03719-127-9 | eISBN: 978-3-03719-627-4  
145pp | Softcover | €39.00 | \$42.00

---

## Geometric Numerical Integration and Schrödinger Equations

Erwan Faou (ENS Cachan Bretagne, France)

ISBN: 978-3-03719-100-2 | eISBN: 978-3-03719-600-7  
146pp | Softcover | €39.00 | \$42.00

---

## Invariant Manifolds and Dispersive Hamiltonian Evolution Equations

Kenji Nakanishi (Kyoto University, Japan), Wilhelm Schlag (University of Chicago, USA)

ISBN: 978-3-03719-095-1 | eISBN: 978-3-03719-595-6  
258pp | Softcover | €49.00 | \$53.00

---

## From Quantum to Classical Molecular Dynamics: Reduced Models and Numerical Analysis

Christian Lubich (University of Tübingen, Germany)

ISBN: 978-3-03719-067-8 | eISBN: 978-3-03719-567-3  
153pp | Softcover | €39.00 | \$42.00

---

## Invitation to Topological Robotics

Michael Farber (Durham University, United Kingdom)

ISBN: 978-3-03719-054-8 | eISBN: 978-3-03719-554-3  
143pp | Softcover | €39.00 | \$42.00

---

## Fukaya Categories and Picard–Lefschetz Theory

Paul Seidel (Massachusetts Institute of Technology, USA)

ISBN: 978-3-03719-063-0 | eISBN: 978-3-03719-563-5  
334pp | Softcover | €49.00 | \$53.00

---

## Mathematical Problems of General Relativity I

Demetrios Christodoulou (ETH Zürich, Switzerland)

ISBN: 978-3-03719-005-0 | eISBN: 978-3-03719-505-5  
157pp | Softcover | €29.00 | \$32.00

---

## ZÜRICH LECTURES IN ADVANCED MATHEMATICS

### Nonlinear Discrete Optimization

#### An Algorithmic Theory

Shmuel Onn (Technion - Israel Institute of Technology, Israel)

ISBN: 978-3-03719-093-7 | eISBN: 978-3-03719-593-2  
147pp | Softcover | €39.00 | \$42.00

### Integer Points in Polyhedra

Alexander Barvinok (University of Michigan, USA)

ISBN: 978-3-03719-052-4 | eISBN: 978-3-03719-552-9  
199pp | Softcover | €39.00 | \$42.00

### Geometric Invariant Theory and Decorated Principal Bundles

Alexander H. W. Schmitt (Freie Universität Berlin, Germany)

ISBN: 978-3-03719-065-4 | eISBN: 978-3-03719-565-9  
396pp | Softcover | €59.00 | \$64.00

### Rectifiable Sets, Densities, and Tangent Measures

Camillo De Lellis (University of Zürich)

ISBN: 978-3-03719-044-9 | eISBN: 978-3-03719-544-4  
133pp | Softcover | €29.00 | \$32.00

### High Risk Scenarios and Extremes

#### A geometric approach

Guus Balkema (University of Amsterdam, The Netherlands), Paul Embrechts (ETH Zürich, Switzerland)

ISBN: 978-3-03719-035-7 | eISBN: 978-3-03719-535-2  
389pp | Softcover | €59.00 | \$64.00

### $A_\infty$ -Structures and Moduli Spaces

Alexander Polishchuk, University of Oregon, USA

ISBN: 978-3-98547-026-6 | eISBN: 978-3-98547-526-1  
178pp | Softcover | €39.00 | \$45.00

### Calogero–Moser Systems and Representation Theory

Pavel Etingof (Massachusetts Institute of Technology, USA)

ISBN: 978-3-03719-034-0 | eISBN: 978-3-03719-534-5  
101pp | Softcover | €29.00 | \$32.00

### Non-linear Elliptic Equations in Conformal Geometry

Sun-Yung Alice Chang (Princeton University, USA)

ISBN: 978-3-03719-006-7 | eISBN: 978-3-03719-506-2  
100pp | Softcover | €29.00 | \$32.00

### Randomly Forced Nonlinear PDEs and Statistical Hydrodynamics in 2 Space Dimensions

Sergei B. Kuksin (Heriot-Watt University, UK)

ISBN: 978-3-03719-021-0 | eISBN: 978-3-03719-521-5  
102pp | Softcover | €29.00 | \$32.00

### Lectures on Partial Hyperbolicity and Stable Ergodicity

Yakov B. Pesin (Pennsylvania State University, USA)

ISBN: 978-3-03719-003-6 | eISBN: 978-3-03719-503-1  
128pp | Softcover | €29.00 | \$32.00

## STANDALONE TITLES

### European Congress of Mathematics Berlin, July 18–22, 2016

Editors: Volker Mehrmann (Technische Universität Berlin, Germany), Martin Skutella (Technische Universität Berlin, Germany)

ISBN: 978-3-03719-176-7 | eISBN: 978-3-03719-676-2  
901pp | Hardcover | €118.00 | \$127.00

### Absolute Arithmetic and $\mathbb{F}_1$ -Geometry

Editors: Koen Thas (University of Gent, Belgium)

ISBN: 978-3-03719-157-6 | eISBN: 978-3-03719-657-1  
397pp | Hardcover | €79.00 | \$85.00

## European Congress of Mathematics

Kraków, 2 – 7 July, 2012

Editors: Rafał Latała (University of Warsaw, Poland), Andrzej Ruciński (A. Mickiewicz University, Poland), Paweł Strzelecki (University of Warsaw, Poland), Jacek Świątkowski (University of Wrocław, Poland), Dariusz Wrzosek (University of Warsaw, Poland), Piotr Zakrzewski (University of Warsaw, Poland)

ISBN: 978-3-03719-120-0 | eISBN: 978-3-03719-620-5  
824pp | Hardcover | €119.00 | \$128.00

---

## Interviews with the Abel Prize Laureates 2003–2016

Editors: Martin Raussen (Aalborg University, Denmark), Christian F. Skau (Norwegian University of Science and Technology (NTNU), Norway)

ISBN: 978-3-03719-177-4 | eISBN: 978-3-03719-677-9  
302pp | Softcover | €29.00 | \$32.00

---

## Mathematics and Society

Editors: Wolfgang König (VIAS Berlin and Technical University Berlin, Germany)

ISBN: 978-3-03719-164-4 | eISBN: 978-3-03719-664-9  
314pp | Hardcover | €49.00 | \$53.00

---

## The Blind Spot Lectures on Logic

Jean-Yves Girard (Institut de Mathématiques de Luminy, France)

ISBN: 978-3-03719-088-3 | eISBN: 978-3-03719-588-8  
550pp | Hardcover | €79.00 | \$85.00

---

## Proceedings of the International Congress of Mathematicians Madrid, August 22–30, 2006

Editors: Marta Sanz-Solé (Universitat de Barcelona, Spain), Javier Soria (Universitat de Barcelona, Spain), Juan L. Varona (Universidad de La Rioja, Spain), Joan Verdera (Universitat Autònoma de Barcelona, Spain)

ISBN 978-3-03719-022-7 | eISBN 978-3-03719-522-2  
4392pp | Hardcover | €380.00 | \$407.00

---

## STANDALONE TITLES

math.ch/100

Schweizerische Mathematische Gesellschaft – Société  
Mathématique Suisse – Swiss Mathematical Society  
1910

Editors: Bruno Colbois (University of Neuchâtel, Switzerland), Christine Riedtmann (University of Bern, Switzerland), Viktor Schroeder (University of Zürich, Switzerland)

ISBN: 978-3-03719-089-0 | eISBN: 978-3-03719-589-5  
526pp | Hardcover | €79.00 | \$85.00

---

## Essays on the Complexity of Continuous Problems

Erich Novak (University of Jena, Germany), Ian H. Sloan (University of New South Wales, Australia), Joseph F. Traub (Columbia University, USA), Henryk Woźniakowski (Columbia University, USA)

ISBN: 978-3-03719-069-2 | eISBN: 978-3-03719-569-7  
105pp | Hardcover | €29.00 | \$32.00

---

## Dynamics on the Riemann Sphere A Bodil Branner Festschrift

Editors: Poul G. Hjorth (University of Southern Denmark, Denmark), Carsten Lunde Petersen (University of Roskilde, Denmark)

ISBN: 978-3-03719-011-1 | eISBN: 978-3-03719-511-6  
226pp | Hardcover | €79.00 | \$85.00

---

## European Congress of Mathematics Stockholm, June 27 – July 2, 2004

Editors: Ari Laptev (Royal Institute of Technology, Sweden)

ISBN: 978-3-03719-009-8 | eISBN: 978-3-03719-509-3  
897pp | Hardcover | €129.00 | \$139.00

---

## STANDALONE TITLES

### European Congress of Mathematics

Amsterdam, 14–18 July, 2008

Editors: A.C.M. Ran (Vrije Universiteit Amsterdam, The Netherlands), Herman te Riele (Centrum Wiskunde en Informatica, The Netherlands), Jan Wiegerinck (University of Amsterdam, The Netherlands)

ISBN: 978-3-03719-077-7 | eISBN: 978-3-03719-577-2  
488pp | Hardcover | €79.00 | \$85.00

---

### 6th International Congress on Industrial and Applied Mathematics

Zürich, Switzerland, 16-20 July 2007, Invited Lectures

Editors: Rolf Jeltsch (ETH Zürich, Switzerland), Gerhard Wanner (University of Geneva, Switzerland)

ISBN: 978-3-03719-056-2 | eISBN: 978-3-03719-556-7  
530pp | Hardcover | €119.00 | \$128.00

---

### Writing Mathematical Papers in English

a practical guide

Jerzy Trzeciak (Polish Academy of Sciences, Poland)

ISBN: 978-3-03719-014-2 | eISBN: 978-3-03719-514-7  
51pp | Softcover | €15.00 | \$17.00

---
