EDUCATION

Victor Valley College - Victorville, CA

Expected, August 2026

Associate of Science in Computer Information Systems

- Relevant coursework: Programming I (C++), Programming Concepts & Methods I Using Python, CodePath Introduction to Cybersecurity

SKILLS & CERTIFICATIONS

- **Programing Languages:** C++, Python, Bash, Nix
- **Certifications:** CodePath Cyber Introduction to Cybersecurity (Spring 2025), CodePath Certificate of Leadership (Summer 2025), Seal of Biliteracy (2022)
- **Tools:** Docker, Wireshark, Metasploit, Shodan, VirusTotal, Grafana
- **Operating Systems:** Linux, Windows, macOS
- **Languages:** English (fluent), Spanish (fluent)

EXPERIENCE

CodePath - Tech Fellow | Remote

May 2025 – December 2025

- Supported students in the Cybersecurity course by providing technical assistance during sessions and assignments, resulting in a 90% course completion rate.
- Cultivated a supportive environment by developing strong relationships with students, resulting in a 30% increase in participation and a 25% improvement in overall student satisfaction ratings.
- Enhanced student understanding and project outcomes by leading live recorded Study Hall sessions, providing tailored support that resulted in a 5% improvement in project completion rates.

Desvelada Records - Multimedia Designer | Paramount, CA

August 2022 – April 2025

- Led cross-functional media projects, coordinating with designers and musicians to deliver branding, merchandise, and social media campaigns, increasing engagement by 30%.
- Managed project workflows by organizing Photoshop files with smart objects and layer comps, reducing revision time by 30%.
- Oversaw YouTube content production, optimizing metadata and thumbnails, which improved video reach and audience retention by 25%.

PROJECTS

Homelab Server Security Enhancements - Lead Developer | Solo Project

- Secured self-hosted services by transitioning from open port forwarding to a reverse proxy using Caddy, reducing exposure to external threats by 80%.
- Configured DNS filtering with AdGuard Home and monitored network traffic using Wireshark, improving privacy and overall network security.

Cybersecurity Lab Simulations (CodePath CYB101) – Cybersecurity Analyst | Solo Project

- Conducted ethical hacking simulations using Metasploit, successfully identifying vulnerabilities by exploiting systems and documenting attack vectors.
- Solved 15 Capture The Flag (CTF) challenges, gaining hands-on experience in penetration testing and threat mitigation.
