

AB 1305 Disclosure

Snap’s emissions reduction targets developed in 2020 (Pg. 24 of the [2024 CitizenSnap Report](#)) were validated in 2021 by the Science-Based Targets initiative (SBTi). Our near-term targets were developed using the ‘Information & Communication Technology’ sector methodology and are based on a 1.5 degrees C pathway with a target year of 2025. In 2021, we achieved carbon neutrality with the purchase of carbon offsets for our historical operations from our founding in 2011 through 2020 (Pg. 24 of the [2024 CitizenSnap Report](#)). Since then, we’ve maintained our operational carbon-neutral status each year through the purchase of carbon offsets for emissions attributable to Snap, including for the year ended December 31, 2023.

Snap conducts an annual greenhouse gas emissions inventory (Pg. 44 of the [2024 CitizenSnap Report](#)) to track progress on our targets. As described below, we have obtained independent third-party verification since emissions reporting year 2020.

Emissions Reporting Year	GHG Scopes Covered by Verification	Name of Third-Party Verifier	Verification Statement
2023	Scopes 1-3	Cameron-Cole, LLC	2023 Verification Statement
2022	Scopes 1-3	Cameron-Cole, LLC	2022 Verification Statement
2021	Scopes 1-3	Cameron-Cole, LLC	2021 Verification Statement
2020	Scopes 1-3	Cameron-Cole, LLC	2020 Verification Statement

For operational emissions in 2019-2023 that remained after our direct emissions reductions, we have made purchases of carbon offsets to fully compensate for these emissions. Below you will find a disclosure of all offset purchases that have contributed to our carbon emissions reductions and carbon neutral claims.
