

# AB 1305 Disclosure

Snap’s emissions reduction targets developed in 2020 (Pg. 25 of the [2023 CitizenSnap Report](#)) were validated in 2021 by the Science-Based Targets initiative (SBTi). Our near-term targets were developed using the ‘Information & Communication Technology’ sector methodology and are based on a 1.5 degrees C pathway with a target year of 2025. While Snap has developed targets aligned with the SBTi, we have also set an aspirational goal to be Net Negative by 2030 (Pg. 32 of the [2023 CitizenSnap Report](#)) through decarbonization and procurement of a mix of renewables, carbon offsets, and carbon removals.

Snap conducts an annual greenhouse gas emissions inventory (Pg. 28 of the [2023 CitizenSnap Report](#)) to track progress on our targets. As described below, we have obtained independent third-party verification since emissions reporting year 2020.

<b>Emissions Reporting Year</b>	<b>GHG Scopes Covered by Verification</b>	<b>Name of Third-Party Verifier</b>	<b>Verification Statement</b>
2022	Scopes 1-3	Cameron-Cole, LLC	<a href="#">2022 Verification Statement</a>
2021	Scopes 1-3	Cameron-Cole, LLC	<a href="#">2021 Verification Statement</a>
2020	Scopes 1-3	Cameron-Cole, LLC	<a href="#">2020 Verification Statement</a>

For emissions in 2019-2022 that remained after our direct emissions reductions, we have made purchases of carbon offsets to fully compensate for these emissions. Below you will find a disclosure of all offset purchases that have contributed to our carbon emissions reductions and carbon neutral claims.

## Carbon Offset Project Information

Attribution Year	Entity Selling Offset	Offset Registry/ Program	ID Number	Name	Developer(s)	VCO Type	Third-Party Verification	Methodology	Retirement Date (MM/DD/YYYY)	Vintage
