

BATTERIES THAT
POWER
PRODUCTIVITY.

TROJAN AES

THE NEW TROJAN AES BATTERY DELIVERS UP TO 3X THE CYCLE LIFE OF STANDARD AGM.

Trojan's maintenance-free VRLA AES Battery delivers up to three times the life of standard AGM batteries, boosts uptime, and maximizes performance in the most demanding environments. It operates at partial charging without harm, so you can charge at any time. The battery delivers safe, green solutions for energy storage. Solar AES delivers all the benefits of standard AGM, and outperforms in these areas:

LASTS LONGER

Up to 3x more cycle life than standard AGM. Validated at 1,200 cycles at 100% DoD vs. 400 cycles for AGM.

PERFORMS IN HARSH CONDITIONS

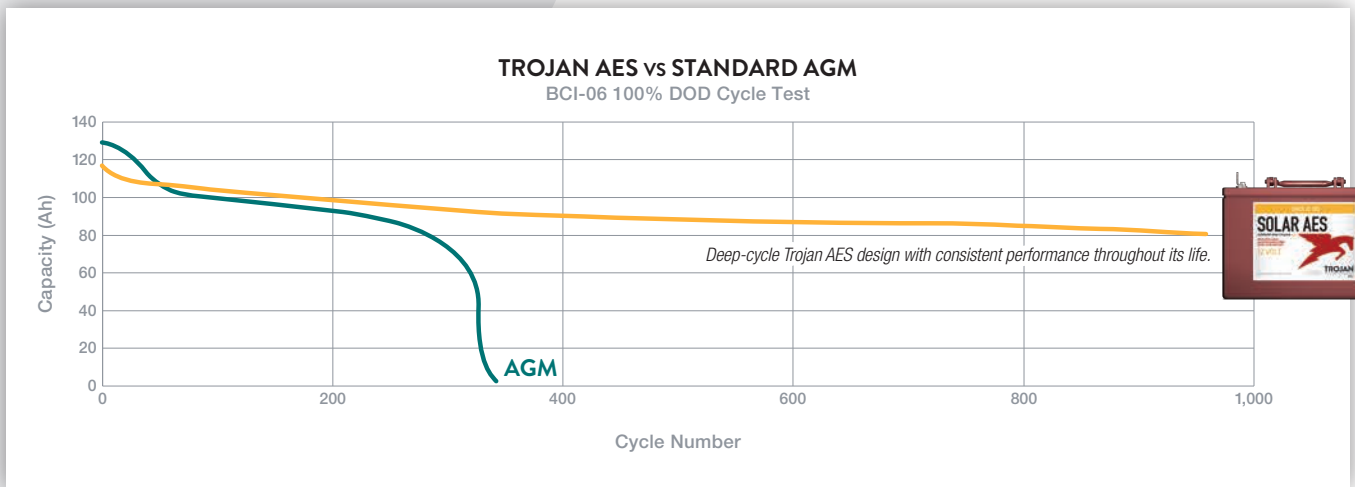

Robust performance in extreme temperatures and conditions. Temperature range from -40°F to 160°F (-40° C to 71° C).

DELIVERS HARMLESS PS_{OC}

Tested to withstand Partial State of Charge, again and again.

Trojan AES maintains high capacity in extreme deep-cycling (up to 100% DoD) with consistent performance throughout its life compared to standard AGM.

Available in 6-, 8- and 12-volt models, the battery also charges faster than traditional AGM batteries, allowing users to charge in brief periods between outages.

When used in traffic signs and lights, it significantly reduces installation and electricity bills and improves pedestrian and traffic safety.

Other features and benefits include:

MAINTENANCE FREE: Virtually no maintenance as watering is not required.

SAFE AND SUSTAINABLE: Trojan AES is classified as non-spillable and can be safely mounted horizontally to fit difficult locations. It's made using 80% recycled materials and is 99% recyclable.

RUGGED DESIGN: Designed and manufactured to absorb vibration and shock.

WARRANTY: This VRLA battery is backed by a three-year warranty.

AGM CHARGER: Charge with existing AGM charger and profiles.

WHAT SETS TROJAN BATTERY COMPANY APART?

For nearly 100 years, we have helped shape deep-cycle battery technology and become a major supplier to OEMs. We offer:

- A portfolio that features a broad range of premium energy-storage solutions including deep-cycle flooded lead-acid, AES, AGM, gel, and lithium-ion batteries
- A global Technical Support Team with trained employees
- On-time delivery and supply-chain security with global manufacturing sites
- A worldwide network of Master Distributors and Authorized Trojan Dealers
