

Earn Continuing Nurse Education Credits — **FREE**^{*†}

Each course provides 1-2 contact hours of CNE credit upon completion

Our belief in the happy, healthy development of all babies drives everything we do. From free CE courses to diaper design, we strive to support best practices for nurses and better outcomes for their tiniest patients. These free CE courses are supported by an ongoing grant from Pampers Professional and are developed by ANN, NANN, NANT and Synova.

* ANN and NANN CEs are free for members only

† Synova and NANT CEs are open to non-members for free

**Neonatal Abstinence Syndrome Symposium:
Caring for Opioid-Exposed Dyads Across
the Perinatal Continuum**

Davida Schiff, MD, MSc

Review common myths and misperceptions in the care of opioid-exposed mother infant dyads | Support families impacted by substance use disorder at a vulnerable time following delivery | Provide non-stigmatizing, patient-centered, trauma informed care to opioid-exposed dyads in the inpatient or outpatient setting

[nann.org/education/
nas-symposia](https://nann.org/education/nas-symposia)

**Infant Sleep Safety in the NICU:
The Successful Transition Home**

Michael B. Goodstein, MD

Gain knowledge about the AAP recommendations on SIDS risk-reduction | Identify barriers and opportunities to promote infant sleep safety in the NICU | Utilize communication techniques for engaging families in meaningful conversations regarding infant sleep safety in the home | Discuss the importance of developing a consistent infant sleep safety transition program in the NICU

nann.org/sleep

**Neonatal Skin: How Science Improves
Neonatal Skin Care in the NICU**

Marty Visscher, PhD

Strategy to address the multiple skin issues that challenge nurses in routine care of premature and full-term NICU patients | Causes of skin compromise serve as basis for evidence-based approach for facilitating skin development and preventing and restoring skin damage

nann.org/skincare

**Every Interaction Matters: Integration
of Developmental Care in the NICU**

Kati Knudsen, PT, MPT, CNT, DCS, CLE

Rationale and practices of developmental care to support long-term outcomes in preterm infants | Strategies for providing care while promoting brain and sensory development | Incorporating parents into these practices | Importance of every infant interaction and the mitigation pain and discomfort in order to best prepare the preterm infant for an optimal future

[nann.org/
development](https://nann.org/development)

Online courses
developed by:

National
Association of
Neonatal
Nurses

Course
Location:

Positioning the Neonate for Best Outcomes (NANN Monograph)

Elizabeth Drake, CNS, MN, NNP-BC

Benefits of proper positioning | Goal of supportive positioning and positioning practices | Parent and family integration and partnership | Implications for providing individualized, supportive care

[nann.org/
positioning](http://nann.org/positioning)

Online course
developed by:

National Association of Neonatal Therapists

Course
Location:

Addressing Neonatal/Perinatal Health Disparities from the Bedside, Achieving Health Equity Through Neonatal Therapists

Dr. Terri Major-Kincade, MD, MPH, FAAP

CE credit also applies to nurses | Learners will review trends in neonatal and maternal mortality with emphasis on racial disparities, highlighting life course perspective and social determinants of health | Six areas of expertise for neonatal therapists are highlighted to improve health equity by directly empowering marginalized parents

[neonataltherapists.
org/disparities](http://neonataltherapists.org/disparities)

Online courses
developed by:

Academy of
Neonatal Nursing™

Course Location:

Neonatal Skin Health of the Diapered Area

Marty Visscher, PhD

Describe premature and full-term skin at birth and how it changes throughout the first few months of life | Factors impacting diaper skin integrity and function relative to gestational age | Strategies to prevent diaper skin compromise and maintain skin health

[academyonline.org/
Visscher](http://academyonline.org/Visscher)

To Sleep...Perchance to Develop

Susan Ludington, RN, CNM, CKC, Ph.D., FAAN

Relate the stages of sleep for infants up to 52 weeks post-conceptual age | Discuss the relationship between sleep and brain development | Verbally convey to others three types of interventions to promote optimal sleep in neonates in the NICU

[academyonline.org/
Ludington](http://academyonline.org/Ludington)

The Impact of Bias on Respectful Nursing Care

Rachelle Nurse, PhD, MSHA, RN, WHNP-BC

Focus on bias, microaggression, impact on patient outcomes and interventions for nurses to assist in providing respectful nursing care

[academyonline.org/
Nurse](https://academyonline.org/Nurse)

Adventures and Misadventures in Vascular Access for NICU Patients

Carolyn Lund, RN, MSN, FAAN

Ultrasound-guided PICC placement in NICU patients | New products and techniques for securement of central venous catheters | New alternative to central access, the extended dwell intravenous catheters | Notable misadventures in IV therapy in the NICU, specifically IV extravasation injuries and occluded CVCs

[academyonline.org/
Lund2020](https://academyonline.org/Lund2020)

Hot Topics in Neonatal Skin Care

Carolyn Lund, RN, MSN, FAAN

Review current choices for skin disinfection in NICU patients in terms of efficacy and potential toxicity and controversies related to chlorhexidine gluconate bathing in NICU patients | Describe problems, challenges and new technologies related to medical adhesives in the NICU | Identify devices in NICU that are at risk for development of pressure ulcers

[academyonline.org/
Lund](https://academyonline.org/Lund)

Providing Neurodevelopmental Care in the NICU

Taryn Temples, MSN, RNC-NIC, CNE Instructor

Discuss the development of the fetal brain and sensory systems of touch, taste, smell, hearing and vision | Discuss the impact of the NICU experience and its relationship to neurodevelopment | Describe neurodevelopmental care strategies in the NICU for each of the five core concepts of developmental care

[academyonline.org/
Temples](https://academyonline.org/Temples)

The History and Future of Race, Healthcare and Justice

Dorothy Roberts, BA, JD

Learn the history of black women's health and how to advocate for them in a medical setting | The discussion covers how the biological concepts of race, structural racism and implicit bias contribute to health inequalities

synovaassociates.com/pampers

Multidisciplinary Team Challenges to Caring for Patients with Hypoxic Ischemic Encephalopathy

Stephen DeMeo, DO, MEd

Explore the challenges to team-based interdisciplinary care when caring for infants with Hypoxic Ischemic Encephalopathy

synovaassociates.com/pampers

Navigating Neonatal Abstinence Syndrome for NICU Leaders

Stephen DeMeo, DO, MEd

Describe the current trends in the incidence of NAS in the US and at least one effect this trend has on the healthcare system and/or on NICUs | Outline two or more challenges frequently encountered when using clinical assessment tools for infants with NAS, and two recent innovations | List three pharmacologic and/or non-pharmacologic treatment options for infants with NAS | Discuss two reasons why understanding local data prior to implementing process change is critical for a program's success

synovaassociates.com/pampers

Leading in Uncertain and Transformative Times

Cy Wakeman, MS, CSP
This keynote and workshop will honor the professionalism and dedication of your caregivers and provide strategies to restore commitment to the field, rejuvenate spirits and to mine the Pandemic experience in an intentional way to fuel Post-Traumatic Growth

synovaassociates.com/pampers

Leading in Uncertainty and Crisis

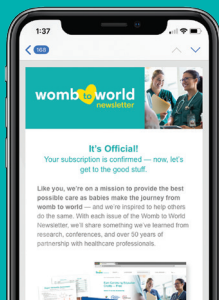

Cy Wakeman, MS, CSP
Identify strategies to leverage current challenges and develop increased resilience in your teams
