\*The seat capacity varies according to the size of the stage and type of event. The numbers in the table show the maximum capacity.

### Hours and surcharges

The halls are rented from 11:00 to 23:00 on day of the event. Extra access to the rented hall is charged additionally. The rental cost is based on a single event. An extra fee is added for recurring events on the same day.

## Staff

### Account and project manager

Account and project managers are main contacts between the event manager and the venue. The account manager issues a contract and communicates with different departments within Harpa. Near the event date, the project manager takes over, analyses the needs and supervises the event.

### Security

Harpa provides general security. If needed, extra security can be provided at additional cost.

### Stage manager

The services of a stage manager are included in the rent. If the event requires extra crew, it can be provided at additional cost.

### Ushers

Ushers assist guests, inspect tickets at the entrances and provide guests with general information.

### Light technicians

A light technician should always be booked if lights need changing during rehearsals or events.

### Technicians

Technicians are not included in the rent. Harpa offers technical services on various levels at additional cost. The technical work is charged by the hour during the event, installation and dismount. Employees can only manage lights, monitors, mixers, cables and mics. Event managers can bring in their own technicians, stage crew, light and sound technicians with the permission of the Harpa project manager. Nevertheless, a technician from Harpa is needed for monitoring equipment.

### Sound technicians

When the sound system, or magnification, is required during an event, make sure you account for one or more sound technicians.

### Video technicians

When a projector or other visual presentation is required for your event, account for one video technician.
