

Zattoo Advertising 2023

Switzerland

About us

1

Zattoo was founded in Switzerland / USA

Zattoo is an OTT (over-the-top) service that offers streaming of live, catch up and VOD TV on a variety of devices and platforms.

2

More than 200 Zattooies in the Team.

With offices in 3 countries, Zattoo is a worldwide operating company with more than 200 employees.

3

Biggest TV-Streaming Provider in Europe

Zattoo is with more than 20 million registered users the biggest TV-Streaming provider in Europe for B2C and B2B clients.

Evolution of Zattoo

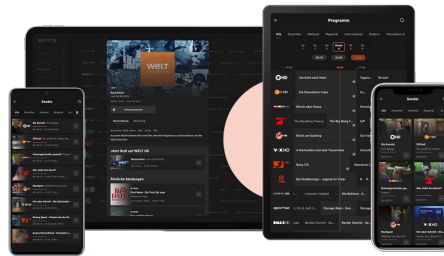

From free television to the perfect TV experience right in your living room.

Live or time delayed, on the road or at home: viewers watch their TV programmes **when and where they want**. This makes Zattoo a real alternative to classic TV reception by cable and satellite.

Live TV online

Zattoo is an online TV pioneer in Switzerland and Germany.

Focus on mobile devices

Since 2011, Zattoo users were able to watch using mobile devices as well.

Zattoo in the living room

Today, Zattoo is a fully comprehensive TV experience, with Smart TVs, streaming players and Full HD.

Individual user experience 2022

TV streaming providers like Zattoo make it possible for users to access their favorite TV content anytime and anywhere. As a recent survey of Zattoo users in Germany and Switzerland showed, people sometimes watch TV on the road in their camper van, on their exercise bike, in their own multimedia room or in their own private man cave.

With our new campaign #FernsehenWieDu, we focus on this individual TV experience. The three spots highlight different TV moments from the everyday life of our main characters.

**Zattoo is
climate neutral**

The Future of TV

We **integrate** ourselves deeply **into Assistants** (Google Home, Amazon Alexa, Apple Siri) and ensure that TV content can be found in equal measure.

We draw conclusions from the usage data and **recommend exciting content** to users based on this information. We use **Machine Learning** to do so.

We are working on **reducing streaming latency** and are continuously **improving the UX** and expansion of the platform, especially for smart TV.

For us, the future of TV is **climate neutral**. That is why we calculate and **offset** our CO2 emissions and **reduce** our consumption through targeted measures.

The Future of TV is climate neutral

Our Climate Goals

We put the topic of **climate action** in the **focus of our business** and integrate sustainability as **part of our corporate values**.

We use resources responsibly and **aim for a small corporate carbon footprint**.

We set a **good example** and use our reach to **encourage** others to act sustainably.

release

TV streaming via a wind turbine

Together with **Westfalenwind**, we are working on the carbon neutral television of the future. With the wind farm operator's **windCores project**, we're bringing our data center **directly into a wind turbine**.

Watch our project film to see exactly how it works!
