

OEM APIs

Import data via OEM API

Configure API Connections

1. Navigate to Data Transfer > Connect Apps > API Connections
2. Click on the "+ Add Account" drop down
3. Select your desired API connection from the list: agrirouter, Raven Slingshot, AGCO Variodoc, JD Operations Center, Case IH, New Holland or Steyr
4. A New Web page will open with the login page for your third-party account, where you can enter your credentials and sign in to your third-party account
5. FarmENGAGE will display a message "Linking to your account"
6. When the API connection is complete, your third-party account will be listed on the API Connections tab and any associated vehicles and data can be viewed from your FarmENGAGE account
