

Crop Rotation Planning

Crop Rotation Planner

Navigate to Plan > Crop Rotation Plan:

How to Create a Crop Rotation Plan

Note: In the table, any box with a '+' symbol does not have a plan made for that field and crop season yet

1. Click '+' button to add to the crop rotation plan for a specific field and season
2. Enter the required type of crop
3. Fill out any other required details
4. Click "Save"

How to Create a Sequentially Ordered Crop Rotation Plan

1. Create the first crop following the instructions above, make sure that "Crop Sequence" is set to "1"
2. Create a second crop following the instructions above, make sure the "Crop Sequence" is set to "2"
3. Confirm that there are 2 crops ordered horizontally in the row for the crop season

2025 (Current)	2026	20
 Wheat 50.49 ac	Corn 50.49 ac lb/ac	

How to Create a Split Crop Rotation Plan

It is possible to create a Crop Rotation Plan with 2 or more crops in the same field at any one time.

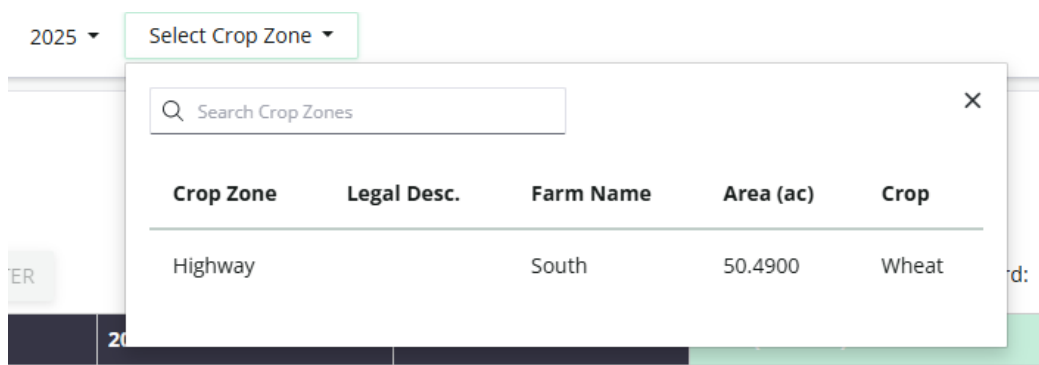

1. Create the first crop following the instructions above, make sure that the "Crop Sequence" is set to "1"
2. Create any remaining crops following the instructions above, make sure that the "Crop Sequence" is also set to "1"
3. Confirm that there are 2 crops ordered vertically in the row for the crop season

Split Field Crop Zones

Split fields

Turn one field into two or more fields with the click of a button in FarmENGAGE. Use this tool in the early process of setting up your fields online, before adding boundaries, applying products to fields, importing as-applied coverage maps and other tasks that affect field expenses.

1. Select the preferred crop year and select a crop zone

if two fields with the same name are shown, choose the field with a crop listed

if you don't see your field on the list (shows the first 20 fields), go to the Field menu and select Field Profiler, then click on the name of the field to open the Field Manager

- From the Crop Zone screen, click the settings button
- Select Split Crop Zone

The screenshot shows the PTx interface with the 'Highway' crop zone selected. The left sidebar contains navigation options: Back, Crop Zone Activities, Weather, Work Orders, and Equipment Activity. The main header shows 'Highway' with a close button and a settings gear icon. Below the header, there's a table of 'Completed Activities' with columns for Activity, Date, Days After Planting, Area, and Cost. The activities listed are Wheat Harvesting, Planting, and Seeding, all dated 06/18/2025 and covering 50.49 ac each.

Activity	Date	Days After Planting	Area	Cost
Wheat Harvesting	06/18/2025		50.49 ac	\$0.00
Planting	06/18/2025		50.49 ac	\$0.00
Seeding	06/18/2025		50.49 ac	\$0.00

- Edit Field details by Adding Name to Crop Zone, select crop/subcrop and enter tillable area

The screenshot shows the 'Split Crop Zone' screen in PTx. The left sidebar is expanded to 'Fields', showing options like Crop Zones, Equipment, Materials, Crops, People, Plan, Track, Analytics, and Data Transfer. The main area features a map with a red boundary around a field. Above the map is a toolbar with various editing tools like Undo, Redo, Select, Multi Select, Add, Subtract, Split, Buffer, Delete, and Group. To the right of the map is a form for editing the crop zone details.

Split Crop Zone

Highway - 1

Name: Highway - 1

Crop: Wheat

Subcrop:

Boundary Area: 50.49 ac

Tillable Area: 50.49 ac

Sequence: 1

Buttons: Cancel, Save

- Edit the field boundaries, if needed using the icons above the map that launches. You can add, subtract, or split the field into multiple crop zones
- Click Save when complete
