Re: Westlink Stage 2 – Erosion and Sediment Control

Jacob,

I, Bradley Cole (CPESC #7645) provide this letter as endorsement to the Westlink, Kemps Creek Civil Works Package – Infrastructure Works – Stage 2 Initial Erosion and Sediment Control Plan relevant to SSD-46983729.

I have reviewed the site conditions and landform at the site and the plans prepared by AT&L, identified as Drawing numbers 20-748-C5200 to 20-748-C5202, 20-748-C5201 and 20-748-C5210, Revision C dated 12-09-23 and I verify that the proposed controls are considered suitable for the current proposal of the Stage 2 development. The current plans are to be updated with progression of project earthworks planning and construction delivery for management of site activities in accordance with best practice documents including *Managing Urban Stormwater: Soils and Construction – Volume 1: Blue Book* (Landcom, 2004) and with the WSUD design principles set out in the *Technical Guidance for Achieving Wianamatta South Creek Stormwater Management Targets* (Technical Guidance) (NSW Government, 2022).

Regards

Bradley Cole
