**RE: Removal of Waste Material - Acoustic Statement
Horsley Logistics Park Stage 2**

SLR Consulting Australia Pty Ltd (SLR) has been engaged by ESR to provide acoustic consultancy regarding noise impacts arising from the operation of Horsley Logistics Park.

A query has been received from Council as follows:

The collection of waste materials from the site must be in accordance with the NSW EPA, Industrial Noise Policy (2000).

SLR notes that the EPA Industrial Noise Policy (INP) has been superseded by the EPA Noise Policy for Industry (NPfI) which was released in 2017. SLR confirms that site noise emission from the operation of Horsley Logistics Park has been assessed in accordance with the requirements of the NPfI.

In particular, SLR confirms that noise from the collection of waste at Horsley Logistics Park is considered to be a minor noise emission contributor in the context of the operation of the site. Truck movements across the day, evening and night-time periods were found to be the largest contributing noise source from the operation of the development.

Please feel free to contact the undersigned with any questions.

Regards,

SLR Consulting Australia
