

26 April 2023

David Schwebel  
Senior Environmental Assessment Officer – Industry Assessments  
Department of Planning and Environment  
4 Parramatta Square, 12 Darcy Street  
Parramatta NSW 2150 Australia

Dear David

**SSD-9138102 WESTLINK STAGE 1 DEVELOPMENT CONSENT – ENVIRONMENTAL REPRESENTATIVE**

In accordance with Condition A35 of SSD-9138102 Development Consent, this letter seeks approval from the Planning Secretary for the appointment of the Environmental Representative (ER) as nominated by the applicant.

The proposed ER has not been involved in the preparation of the EIS, RTS, ADR or any additional information for the development and is independent from the design and construction personnel.

Please see the following details and attached curriculum vitae for your review and approval.

Proposed Environmental Representative

Carl Vincent  
Director, ErSed Environmental Pty Ltd.

Kind regards,

A handwritten signature in black ink that reads "G. Macdonald". The signature is written in a cursive style with a large, looped initial "G".

# Curriculum Vitae

## Carl Vincent

Director, ErSed Environmental Pty Ltd  
Senior Environmental Management Consultant  
Service Delivery Coordinator

### Qualifications & Affiliations

MBA (Exec) Australian Graduate School of Management 2009,  
B.Sc. (Resource and Environmental Management), Australian National University, 1992.  
Certified Professional in Erosion and Sediment Control (IECA)

Certificate in Water Quality Assessment (Field Officers), University of Western Sydney, 1999;  
Training Certificate in Coastal Management, Southern Cross University School of Coastal Management, 2000; Environmental Systems Auditor and Lead Auditor, NCSI 2008.

### Expertise Areas

- Environmental best practice and management in construction activities
- Environmental Management Representative
- Site assessment, inspection, advisory and audit services
- Environmental Best Practice Training Development and Delivery
- Erosion and sediment control (in stream and terrestrial)
- Environmental assessment and planning
- Ecological rehabilitation planning and works & Coastal Land Management

### Summary Work History

Carl is an environmental management specialist with 20 years' experience in Soil Conservation, Environmental Best Practice in Construction, land management and environmental protection. He has broad experience working with all levels of government and industry. Since 1997, Carl has provided professional site advisory and audit services on major road, rail, electricity transmission, and bridge and pipeline projects.

He is a qualified lead auditor of Environmental Management Systems and acts as an Environmental Management Representative on behalf of land management and State planning authorities.

Carl has developed training materials in construction site environmental best practice and has delivered training to 1000s of staff from private industry and government.

Carl has extensive experience working for and within the public Sector. He was the Senior Environmental Consultant and Manager of the Sydney Metropolitan Office for the NSW Government, Soil Conservation Service from 1999 to 2010. In 2010 Carl formed ErSed Environmental Pty Ltd, an Environmental Management consultancy focusing on provision of high level professional environmental services to Government Authorities and large infrastructure developments.

## Overview of Relevant Experience

Carl has over 20 years' experience in environmental management within infrastructure construction and assisting projects to achieve Environmental Best Practice. He is a Professional Soil Conservationist and Certified Professional in Erosion and Sediment Control. He has delivered and provided oversight of construction activities in the full range of environments across NSW, from Alpine Regions to the coast and from the Sydney Metropolitan area to the Blue Mountains and to rural and western NSW.

He has 15 years' experience working within the NSW public sector as an environmental professional and manager as well as a 20-year history of providing services for the private sector. This experience allows him to work with and facilitate cooperation between construction groups and Public Authorities.

He has a high-level awareness of the planning requirements within NSW and of processes for compliance and risk management within delivery of large projects. He has a proven ability to represent the interests of Public Authorities while recognising and working within the constraints of delivery of infrastructure projects.

His extensive and direct involvement in civil on projects has spanned a broad range of construction methods and given him a solid technical knowledge of construction practices and the practical application construction environmental management systems. This experience is invaluable when working within a project team.

Carl's High level communication skills and history in delivering workplace training in environmental practices allows him to work with site personnel at all levels. He is an experienced auditor with a demonstrated thorough and analytical approach when reviewing and auditing site documentation and a focus on ensuring is practical and implementable.

Carl's experience and expertise has seen him included Environmental Management Representative Panel for Transport for NSW and on both the Soil Conservationist Panel and Constructability Assessment Panel for the NSW Roads and Maritime Service.

## List of relevant projects and responsibilities

<b>Environmental Representative – Oakdale West Industrial Estate (SSD) (2019-Current)</b> <b>Environmental Consultant – Project Waratah (SSD)</b>
Approved  Environmental Representative providing oversight on behalf of the DPIE for a large-scale industrial development in Western Sydney. The project represents 2 concurrent state significant developments including construction of a 150ha industrial estate, bridge works, a main link road and the construction of the largest logistics warehouse in the southern hemisphere. Multiple stakeholders to the development include schools, residential age care facilities and public utility providers
<b>Environmental Representative – The Yards Kemps Creek (SSD) (2021-Current)</b>
Approved Environmental Representative providing oversight on behalf of the DPIE for a large-scale industrial development. The project represents 2 concurrent state significant developments including construction of a 100ha industrial estate, upgrade to main road and intersections.

**Principals Soil Conservationist - Roads and Maritime Services (1998-current), multiple sites**

Inspect and Monitor site practices during construction on behalf of the RMS and provide practical advice on ways of achieving best practice. Work with contractors' representatives to develop strategies for soil and water management and erosion and sediment control plans. Recent and current projects include major road works in Blue Mountains, the Illawarra, Western and Southern Sydney

**TfSNW Soil Conservationist– Warringah Road Upgrade & Western Harbour Tunnel EW (2021-Current)**

Monitor the implementation of Soil and Water Management on behalf of Transport for NSW to ensure project meets Environment Protection Licence (EPL) conditions & Conditions of Consent.

**TfSNW Soil Conservationist– Mona Vale Road Upgrade (2019-Current)**

Monitor the implementation of Soil and Water Management on behalf of Transport for NSW to ensure project meets Environment Protection Licence (EPL) conditions & Conditions of Consent.

**Nominated Soil Conservationist– Moorebank Intermodal Precinct West 2019-Current)**

Monitor the implementation of Soil and Water Management on behalf of both State and Federal Planning Authorities to ensure project meets Environment Protection Licence (EPL) conditions & Conditions of Consent.

**Project Soil Conservationist – NBCaNE Project (2015-2021)**

The Northern Beaches Connectivity and Enhancement (NBCaNE) Project involves the upgrade and widening of major roadways in the Northern Beaches region of Sydney. The project includes major viaduct works and construction of a 1.3km 4 lane open slot underpass. ErSed developed the ESC strategy for the project and is responsible for the preparation of ESCs for major work areas. ErSed works with the project team and sits on the Environmental Review Group to review the implementation of environmental management at the site.

**Project Soil Conservationist – Northwest Rail Link – Sky train Project (2014-17)**

The Northwest Rail Link Sky-train is a 4km viaduct running from Kellyville to Rouse Hill in Sydney. ErSed has worked to develop erosion and sediment control plans throughout the project and inspect and confirm implementation in line with the project EPL. Additionally, ErSed works closely with project engineers to coordinate and plan critical works in sensitive area such as riparian zones and contaminated areas. ErSed has developed and delivered specific ESC training to project personnel.

**Environmental Management Representative – Homebush Bay Bridge Construction (2015-16)**

Act as Independent Environmental Management Representative on behalf of Planning NSW on The Homebush Bay (AKA Bennelong) Bridge Rhodes and Wentworth Point. Provide oversight and work with the project team to support the successful implementation of project CEMP. Specific challenges with the project include the high levels of contamination in the project area and close proximity of residents and other sensitive receivers.

**Environmental Management Representative - Shell Cove Station & Interchange Project (2012-2015)**

Act as Independent Environmental Management Representative on behalf of Planning NSW. Provide oversight of project conditions of consent and successful implementation of project CEMP.
