✓ Enable PayPal integration in general.

i The PayPal integration needs to be enabled for each (sub-)shop.

# Step 3

Start onboarding with clicking on “Authorise” button.  
If you want to test PayPal first, make sure you enable the sandbox mode.

The onboarding starts in a new mini browser window.

Be aware that you need to do the onboarding again, if you are switching from sandbox to live mode.

Make sure that your browser does not block pop-ups.

The screenshot shows the 'PayPal - Settings' window. At the top right, there is a 'Select shop:' dropdown menu set to 'Deutsch'. The main content area is divided into three sections: 'API Settings', 'Sandbox', and 'Behaviour'. The 'API Settings' section has a 'Live' sub-section with three input fields: 'Client-ID:', 'Client-Secret:', and 'PayPal Merchant ID:'. The 'Sandbox' section has three input fields: 'Client-ID:', 'Client-Secret:', and 'PayPal Merchant ID:'. Below the 'Sandbox' section, there is a checkbox labeled 'Enable sandbox:' which is currently unchecked. A red arrow points to this checkbox. To the right of the checkbox is the text 'Enable to test the integration.' Below the checkbox is a blue button labeled 'Authorise', which is highlighted with a red rectangle. To the right of the 'Authorise' button are two buttons: 'Test API settings' and 'Register webhook'. The 'Behaviour' section at the bottom has a 'Payment acquisition:' dropdown menu set to '(CAPTURE) Complete payment immediately'. A 'Save' button is located at the bottom right of the window.

# Step 4

The screenshot shows the 'PayPal - Settings' page in the Shopware admin interface. A modal window titled 'Verknüpfen Sie ein PayPal-Konto, um auf shopware AG Geld akzeptieren zu können' is displayed. The modal contains the following text: 'Verknüpfen Sie ein PayPal-Konto, um auf shopware AG Geld akzeptieren zu können' and 'Die Verknüpfung ist kostenlos, egal, ob Sie bereits ein PayPal-Konto haben oder ein neues Konto eröffnen wollen.' Below the text are two input fields: 'E-Mail' and 'Land oder Region' (set to 'Deutschland'). A blue 'Weiter' button is at the bottom of the modal. The background shows the PayPal settings page with fields for 'Live' and 'Sandbox' client IDs and secrets, and a 'Register webhook' button. A 'PayPal Assistent' notification is visible at the bottom of the modal.

Go through the PayPal onboarding.

You will need your PayPal login data.

# Step 5

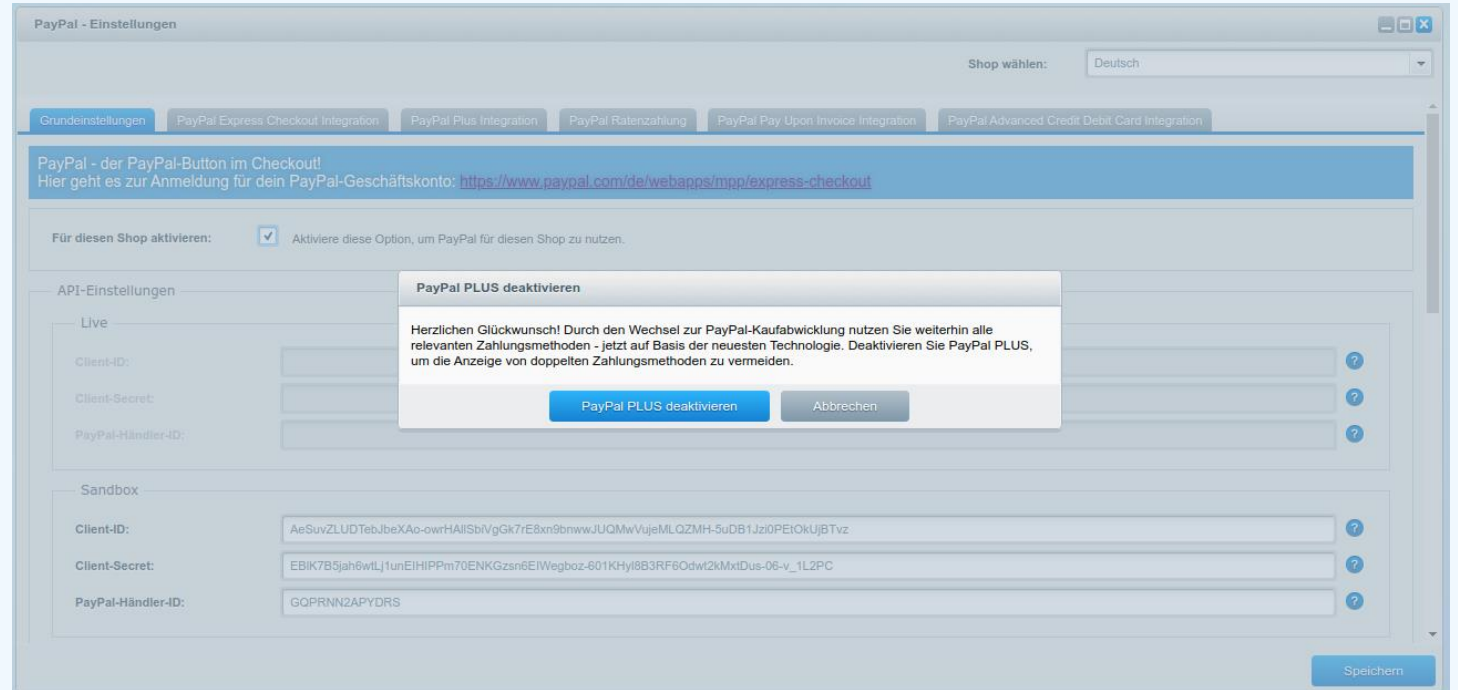

After your successful onboarding you get the possibility to disable PayPal Plus.

Disable PayPal Plus

This should be done, to make sure that no duplicated payment methods are shown to the customers in the storefront, like credit card payment provided by PLUS and the new credit card payment solution

# Step 6

✓ Save settings.

The settings need to be saved in order to make the plugin working with the new credentials.

PayPal - Settings

Select shop: Deutsch

Enable for this shop: ☒ Enable to activate PayPal for this shop.

# Step 7a | Success

The screenshot shows a web browser window titled "PayPal - Settings". At the top right, there is a "Select shop:" dropdown menu with "Deutsch" selected. Below this is a horizontal tab bar with several options: "General settings", "PayPal Express Checkout integration", "PayPal Plus integration", "PayPal installments", "PayPal Pay Upon Invoice Integration" (which is highlighted in blue), and "PayPal Advanced Credit Debit Card Integration". The main content area is titled "PayPal Pay Upon Invoice Integration". It contains three sections: 1. "Activate for this shop:" with a checked checkbox and the text "Enable this option to activate PayPal Pay Upon Invoice for this shop." 2. "Customer service instructions:" with a text input field containing "For assistance, call +49 (0) 2555 92885-0" and a help icon. 3. "Show hint to RatePay invoice under payment method:" with a checked checkbox and the text "This field should stay active. Alternatively, customise your EmailFooter under 'Basic Settings - Email Settings' with the code below." Below this text is a code block: 

```
{if $additional.paypal.UnifiedRatePayHint}  
{$additional.paypal.UnifiedRatePayHint}  
{/if}
```

 At the bottom left of the main content area is a blue button labeled "Capability test". At the bottom right is a blue button labeled "Save".

Open the PUI tab.

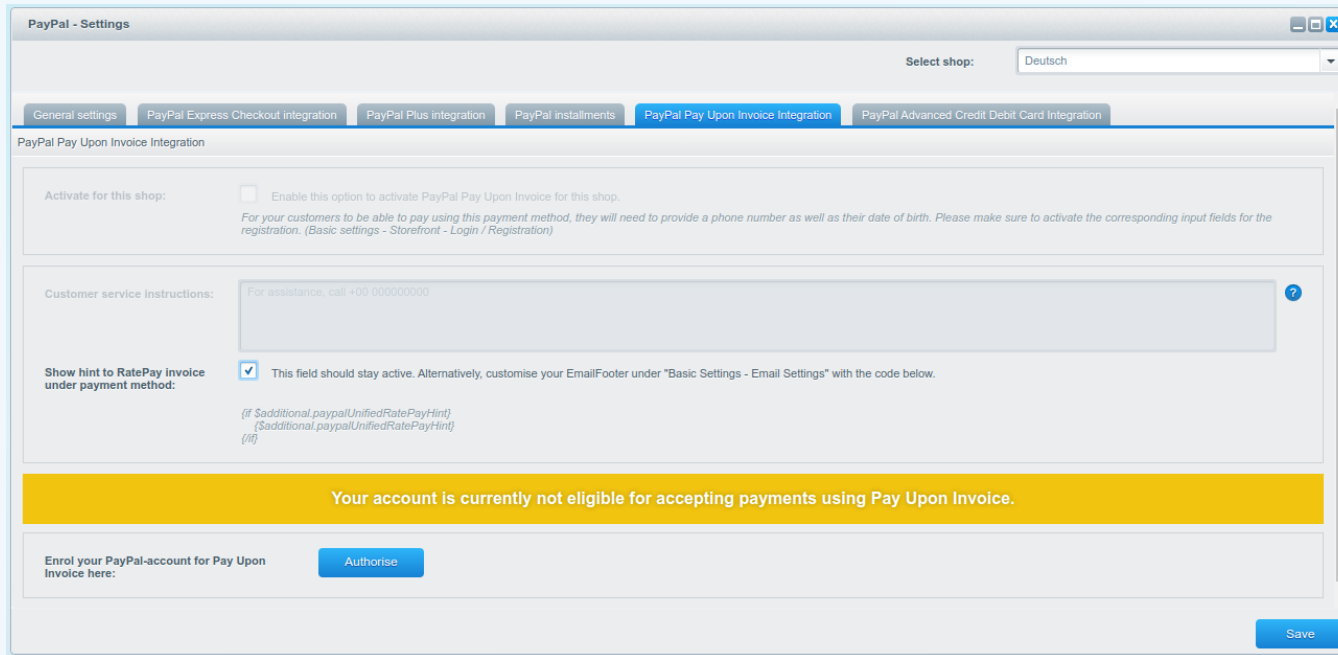

Pay upon invoice onboarding was successful.

You are now able to use PayPal Upon Invoice.

Make sure that you enabled the birthday and telephone field for the registration of the customers. Otherwise, the customers cannot put in all the necessary data for Pay upon invoice.

# Step 7b | no success

PayPal - Settings

Select shop: Deutsch

General settings | PayPal Express Checkout Integration | PayPal Plus Integration | PayPal installments | **PayPal Pay Upon Invoice Integration** | PayPal Advanced Credit Debit Card Integration

PayPal Pay Upon Invoice Integration

Activate for this shop: ☐ Enable this option to activate PayPal Pay Upon Invoice for this shop.  
*For your customers to be able to pay using this payment method, they will need to provide a phone number as well as their date of birth. Please make sure to activate the corresponding input fields for the registration. (Basic settings - Storefront - Login / Registration)*

Customer service instructions: For assistance, call +00 0000000000 ?

Show hint to RatePay invoice under payment method: ☒ This field should stay active. Alternatively, customise your EmailFooter under "Basic Settings - Email Settings" with the code below.  
*(if \$additional.paypalUnifiedRatePayHint)  
\$additional.paypalUnifiedRatePayHint  
(/if)*

**Your account is currently not eligible for accepting payments using Pay Upon Invoice.**
