Overleaf is an online LaTeX and Rich Text collaborative writing and publishing tool

Free LaTeX
authoring tool,
tutorials,
templates &
resources at
overleaf.com

“Overleaf makes it so that you don’t need to download any LaTeX formatting software on your computer. It’s all done on their server. AND you can have multiple people working on it at once, like with a google doc. AND they support comments!”

Will Ratcliff, Assistant Professor at Georgia Tech.
