

# AI HOSTING SOLUTIONS

- Nvidia certified DGX/HGX Ready Location.
- Ability to deploy dense HPC/AI/ML infrastructure that includes H100s, A100s, BasePods or SuperPods.
- Simple, all-inclusive pricing based on what you use.

## AI Data Center

Purpose built data center for today's high performance compute workloads and designed with flexible infrastructure to meet the demands of tomorrow. Fully redundant, modern infrastructure that is SOC and PCI compliant.

## Power Profile

Scalable power allowing for high density deployments of 35kW to 150kW+ per rack that is engineered to maximize efficiency and performance while maintaining a low cost of operations.

## Cooling

Flexible liquid cooling for every cabinet ensuring optimal thermal management that includes rear door heat exchangers and direct-to-chip (DTC) cooling.

## Network

Carrier diverse, high speed access with direct connects to GCP, AWS, Azure and peering exchanges.
