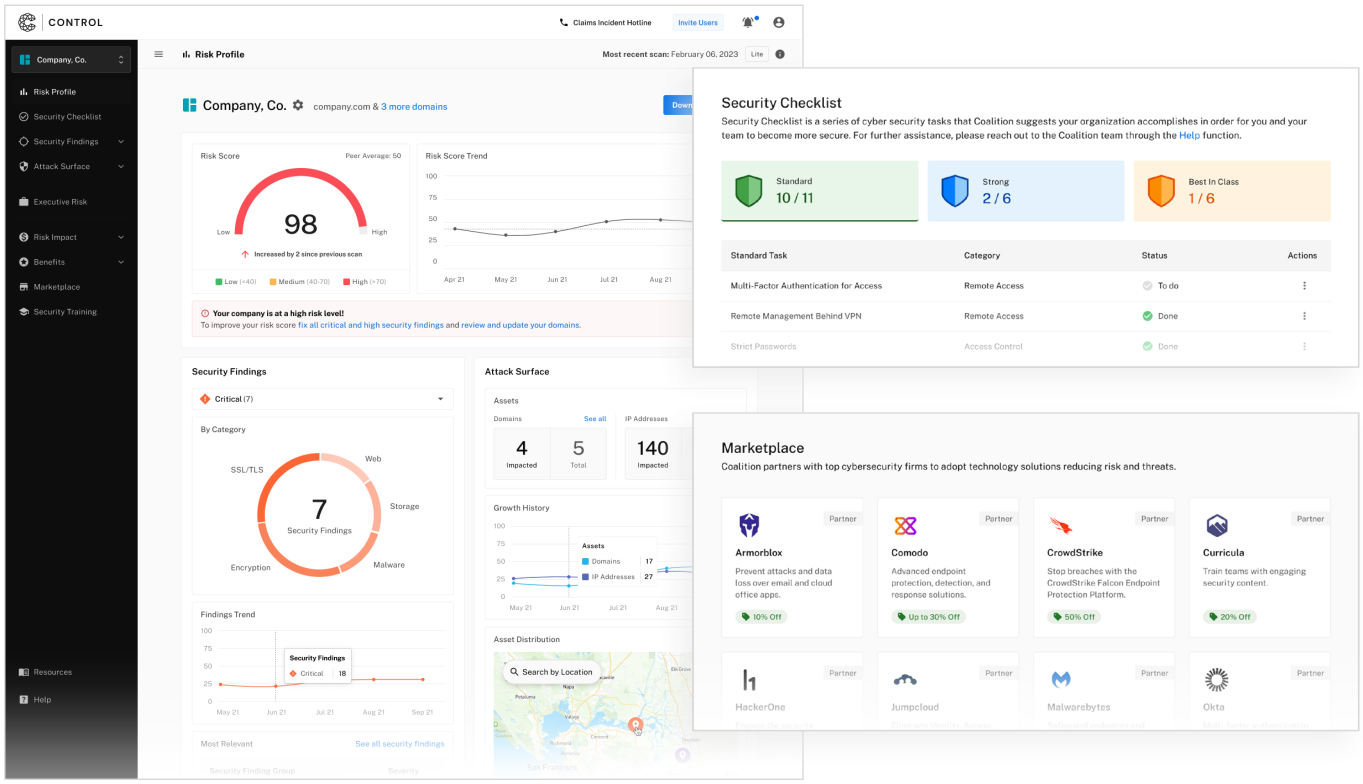
Coalition Control™

Coalition Control™ is a cyber risk management platform. Powered by the same proprietary technology and data used to underwrite and protect thousands of businesses, it can help you detect, assess and mitigate cyber threats before they turn into attacks.

Coalition* leverages machine learning and Artificial Intelligence ('AI') to analyse live data and scans from public data sources and our own proprietary incident, claims and infosec data. This creates an actionable outside-in view of your cybersecurity posture and the active security issues that are most likely to be exploited.

In addition to proactively detecting these cyber threats, Control guides you through mitigating them before they turn into attacks — with expert guidance, self-service remediation steps, our own security solutions, and a network of trusted cybersecurity partners.

Active Insurance policyholders receive full access to Control and can learn more or log in at coalitioninc.com/control.



Coalition is a trading name of Coalition Risk Solutions Ltd. which is an appointed representative of Davies MGA Services Limited, a company authorized and regulated by the Financial Conduct Authority (FCA), registration number 597301, to carry on insurance distribution activities. You may check this on the FCA register by visiting the FCA website www.fca.org.uk. Coalition Risk Solutions Ltd. is registered in England and Wales: company number 13036309. Registered office: 34-36 Lime Street, London, United Kingdom, EC3M 7AT. Copyright ©2024. All rights reserved. Coalition and the Coalition logo are trademarks of Coalition, Inc. or its affiliates.

Key Features

Attack Surface Monitoring (ASM)

Coalition Control monitors and detects risks across your entire external digital footprint, including assets, apps & services, data leaks, and phishing risks.

Personalised Cyber Risk Assessment

Control utilises a proprietary combination of cyber security technology and threat intelligence to produce a report across your entire attack surface that assesses every security finding and its severity.

Third-Party Risk Management

Monitor suppliers and vendors as an extension of your organisation that may pose a threat.

On-Demand Rescans

While we rescan your attack surface monthly and update any findings that appear resolved, your users can request that we rescan specific vulnerabilities any time, to improve their posture sooner.

Resolve Vulnerabilities with Attestation and/or Evidence

Let us know if or when you've taken steps to address specific vulnerabilities by resolving each with attestation and/or evidence of the measures you've taken, improving your posture and overall risk score.

Alerting & Security Notifications

Get platform and email notifications of any critical vulnerabilities we find to help protect your business.

CoalitionAI Security Copilot

Our CoalitionAI Security Copilot can help you gain details on vulnerabilities, understand contingencies, and ask about ways to resolve security issues, providing you with expert guidance and self-service remediation steps to help you mitigate risks before they turn into attacks.

Security Checklist

A step-by-step guide for small and mid-size organisations to establish security controls in various areas such as remote access, emails, devices, network, access control, and incident readiness. Each security control provides guidance, resources, and recommended vendors.

Lookalike Domain Management

Receive alerts for any public web domains that might be pretending to be you and request their removal.

Expert Guidance & Advice

Get detailed security recommendations from our team of expert security and threat analysts* to help you address areas of concern quickly and confidently.

Security Solutions & Services from our Cybersecurity Partners

Coalition partners with leading cybersecurity companies to offer the right tools to address risks, vulnerabilities, and contingencies. Control users enjoy exclusive savings on these world-class cybersecurity solutions.

Security and threat intelligence services are provided by Coalition, Inc.

Coalition is a trading name of Coalition Risk Solutions Ltd. which is an appointed representative of Davies MGA Services Limited, a company authorized and regulated by the Financial Conduct Authority (FCA), registration number 597301, to carry on insurance distribution activities. An end-to-end cyber risk management platform to help you protect your business

Whether you're a business leader, a risk professional, or a technical user, the Coalition Control cyber risk management platform is powered by the same proprietary technology and data we use to insure and protect hundreds of thousands of businesses, to help you detect, assess, and even mitigate risks before they strike.

Business Leader

- Gain deep visibility into your infrastructure and attack surface.
- Invite internal and external members of your security and/or IT teams to use Attack Surface Monitoring (ASM) and follow security recommendations.
- See your risk easily with intuitive graphs and robust data visualisations.

Security User

- Monitor your attack surface with deep scans of all IP addresses, domains, assets, and ports.
- Receive alerts on newly-discovered vulnerabilities, including specific zero-day threats, as recommended by Coalition's expert threat analysts*.
- Receive specific remediation recommendations based on vulnerabilities found on your organisation's attack surface.

Risk Professional

- Enjoy exclusive savings from leading cybersecurity vendors including SentinelOne, Okta, and Malwarebytes.
- Receive ongoing monitoring to help lower your risk and help reduce the likelihood of loss to your organisation.
- Monitor suppliers and vendors as an extension of your organisation that may pose a threat.
- Find your organisation's credentials that are exposed on the dark web.
- Track your organisation's security hygiene over time with powerful data visualisations and tables.

IT User

- See the potential correlation between security vulnerabilities and their exact location(s) on your infrastructure for rapid remediation.
- Use easy-to-follow recommendations that are specific to your organisation's attack surface to remediate issues and reduce risk.

** Threat intelligence services are provided by Coalition, Inc.*

Coalition Security Solutions

Coalition Incident Response (CIR*) Team

Our CIR team is available to Coalition insurance policy-holders before, during, and after a cyber event to help enable them to respond quickly and decisively to any threats — or the appearance of threats — against their organisation.

**Coalition Incident Response services provided through Coalition's affiliate are offered to policyholders as an option via our incident response firm panel.*

Coalition Claims Teams

When the worst happens, and a breach or covered event has occurred, the Coalition claims team** gets to work right away to help mitigate the impact on your organisation.

***Claims services are provided by Coalition Risk Solutions Ltd and Coalition, Inc.*

Coalition Cybersecurity Partners

Access exclusive savings on leading cybersecurity solutions from partners offering world-class technology. Whether your organisation needs to secure identities, email accounts, or endpoints, Coalition's cybersecurity partners make it easy to adopt a defense-in-depth security strategy both quickly and confidently.

Vendor	Product Type	Description
Armorblox	Email Security	Prevent attacks and data loss over email and cloud office apps.
Comodo	Endpoint Detection & Response	Advanced endpoint protection, detection, and response solutions.
Crowdstrike	Endpoint Detection & Response	Stop breaches with the CrowdStrike Falcon Endpoint Protection Platform.
Curricula	Security Awareness Training	Train teams with engaging security content.
HackerOne	Penetration Testing	Engage the security community with ethical discovery programs.
JumpCloud	Identity and Access Mgmt	Eliminate identity, access, and device risk.
Malwarebytes	Endpoint Detection & Response	Safeguard endpoints and servers with relentless protection.
Okta	Identity & Access Management	Multi-factor authentication for companies of all sizes.
Reciprocity	Governance, Risk & Compliance	Advanced endpoint protection, detection, and response solutions.
SentinelOne	Endpoint Detection & Response	Automated endpoint detection and response for rapid defense.
Twingate	Remote Access Control	Secure network access without the need for VPN.

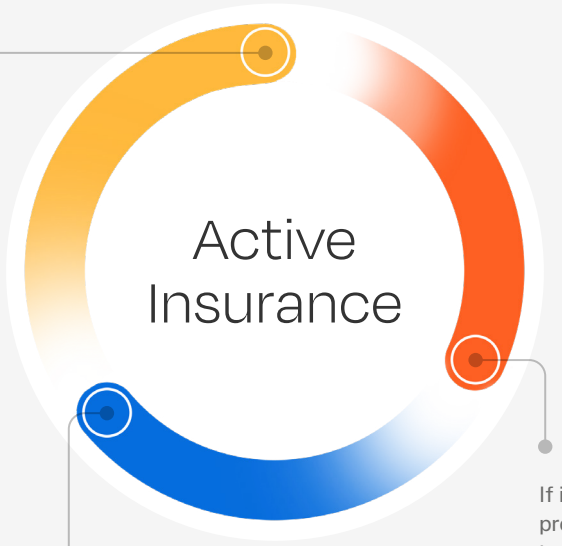
Active Insurance

A risk-management-led approach to managing digital risk with three layers of protection: Active Risk Assessment, Active Protection, and Active Response.

Digital transformation has made all organisations — even small ones — faster, more impactful, and more complex than ever. However, this digital shift has had the same effect on the risks businesses face. From ransomware attacks to the challenges of managing distributed workforces during the pandemic. Digital has transformed risk. And we believe that commercial insurance — the world's oldest form of risk management — has struggled to keep up, leaving many organisations without the protection that can help them thrive.

At Coalition, we believe that all businesses should be able to embrace technology and thrive in the digital economy, and to do so, they should consider active protection from cyber threats. That's why we created Active Insurance to address digital risk.



Active Protection

Coalition Control* is our end-to-end cyber risk management platform, with full access available for all Active Insurance policyholders. Powered by the same proprietary combination of cyber security technology and data protecting half-a-million businesses, you can use Coalition Control to help detect, assess, and mitigate risks before they turn into events and claims.

Active Risk Assessment

Coalition provides a near real-time snapshot of an organisation's digital risks. Our data platform streamlines the quoting process while identifying potential issues most traditional insurers never see, enabling us to provide accurate pricing.

Active Response

If incidents do occur, Coalition provides dedicated, in-house support, incident response**, and cyber claims teams that will help you recover quickly and get back to business. With our in-house expertise and access to digital records on exposures, our team helps the policyholder get back up and running faster, minimising downtime and any financial damages.

*Provided by Coalition, Inc.

**Incident response services are provided by Coalition Incident Response (CIR), an affiliate of Coalition Risk Solutions Ltd. Incident response services are offered to policyholders as an option via our incident response firm panel.
