

Collaborate and communicate your way

Teams Phone Mobile

Drive digital transformation and hybrid work forward by simplifying and unifying your collaboration and calling solutions

The days of desk phones in assigned cubicles are nearing their end, as today's employees expect a new level of flexibility and mobility. While employers have been very agile since the pandemic forced staff home for extended periods, infrastructure is not as adaptable. Workers must still jump between devices and applications to effectively collaborate and communicate with colleagues. This gap reduces productivity and adds an extra cost for businesses.

The way we work is changing and Microsoft Teams is at the forefront of this transformation. The solution quickly became a must-have during the pandemic and currently boasts more than 270 million active users around the world¹. Expanding upon the collaboration capabilities, **Teams Phone Mobile** allows for an effortless calling experience across devices and networks with a single phone number, an industry first.

Key Benefits

Create a unified business communication experience

Enable an effortless workplace where teams can communicate and collaborate on any device at home, in the office or on-the-go.

Reduce costs and eliminate redundancies

Utilize one phone number across devices for a simplified experience that also eliminates expensive legacy phone systems and associated costs.

Streamline management and governance

Corporate security, privacy and compliance extend over all devices. You can also enable recording and retention to voice calls on mobile devices.

End-to-end support

To help ensure your business is up and running quickly, access to one-to-one setup, complete migration and configuration support from a Microsoft expert at Rogers Business.

Teams Phone Mobile offers unique features that create more flexibility for employees as they work from the office, home and everywhere in between, simplifying the calling experience through a **single business number**.

Enhance the experience with features including:

Incoming and outgoing calls from your mobile device or Teams desktop app using a **single business-provided mobile number**

Unified voicemail and unanswered settings on all Teams-enabled devices

Enjoy **presence integration** which mirrors status updates across devices

Choose the mobile number or the company's main number for the outbound caller ID

Simultaneous ringing on mobile device and the Teams app with the ability to **switch between devices** without interrupting your call

Reliable calling via cellular voice network or internet connection.

Why choose Rogers Business?

First Canadian Provider
