

ALWAYS-ON CONNECTIVITY

Branch Guardian by Rogers Business

A fully managed connectivity solution that ensures your business stays online. With a powerful wireless router featuring automated cellular failover and up to 8 hours of battery backup, your connection won't miss a beat even if your primary internet connection or power goes down.

Our team with support from Colony Networks manages everything end-to-end, including device management, monitoring, and troubleshooting so your teams can focus on running the business.

Key features

All-in-One solution	Hardware, software, and a managed data plan—delivered as a single, integrated service to simplify operations and reduce vendor complexity.
Robust and easy installation	Enterprise ready solution with quick and easy installation across locations.
Managed service	Includes a managed service by solution experts from Rogers and Colony Networks, reducing the need for in-house expertise.
Reliable connectivity	Automated cellular failover with battery backup and dual carrier capability helps ensure minimal downtime
Advanced features	Includes WiFi management, AI powered network assistance, and proactive monitoring.
Enterprise-ready	Customer dashboard provides a real time, unified view of all managed devices and network performance.

Key benefits

Maintain business continuity

Keep critical systems, applications, and services running—even during outages.

Reduce operational risk

Help minimize downtime and disruption with automated, intelligent failover.

Simplify IT operations

Fully managed service reduces internal workload and complexity.

Improve customer experience

Ensure consistent connectivity for staff, customers and guests.

Scale with confidence

Ruggedized SKUs support harsh environments. Enterprise-ready for multi-location environments.

Why choose Rogers Business

Comprehensive pre sales consultation and design	Our experts help design and deploy the right solution for your environment.
Quick and simple installation	Robust solution with fast, hassle free setup.
Premium managed service	Solution experts from Colony and Rogers provide ongoing support and monitoring.
Top of the line hardware	Class leading CAT19 5G and WiFi 6E technology for superior performance.
Comprehensive WiFi management	Built in WiFi management, portals, and security capabilities.
AI powered network assistance	Proactive monitoring helps identify and resolve issues before they impact operations.
Signal strength validation	Validate connectivity quality using the Signaltest application.
Real time customer dashboard	Unified, live view of network performance across all locations.
Industry leading support	Backed by Rogers ESA Tier 1 support, with alerts integrated into Rogers ServiceNow.
