

The best chemistry solution for Competitive Intelligence

Monitor the competition and capture strategic insights for your field of interest

Reaxys launched an **AI-driven excerption pipeline** to address our customers need for comprehensive and up-to-date patent information, delivering ~30M patents by the end of '21

Phase 1, Competitive intelligence — LIVE

Bibliographic indexing

- 105 Patent offices and 170 IPC classes covered
- Indexing of patent number, title, author, abstract and claims
- Translation of non-English language abstracts and claims
- Advanced search for patent assignee, priority date and more
- Discoverable within 5 days of publication

Target indexing

- Taxonomy of over 360K targets for synonym expansion of search terms discoverable in 105 patent offices
- Deep indexing of targets (gene/protein) name across the full patent document for 12 priority offices including WO, US, CN, JP, KR, TW, IN
- Discoverable within 5 days of publication

Phase 2, Novelty search — LIVE

Substance indexing

- 12 priority offices including WO, US, CN, JP, KR, TW, IN
- Extraction of substances from text and images*
- No limitations on the number of substances indexed per patent
- Discoverable within 5 days of publication

Reaxys continues to offer manual excerption of patents from 7 offices for in-depth substance, reaction and bioactivity data excerption.
