

Knovel®

Innovation comes from unexpected places

Give engineers **Knovel All Access** to get the knowledge they need to succeed

Knovel All Access:

All access provides a wider view from all the major engineering disciplines helping you solve the most complex and challenging engineering problems

Knovel has more than **10,000** reference resources from more than **150** publishers and societies; including books, databases, conference proceedings, standards, research literature, equation worksheets, graphs and tables etc.

Engineering is increasingly interdisciplinary. Ideas often comes from places where you weren't necessarily looking — a new material, a time-tested process from another industry, a case study that unlocks an insight.

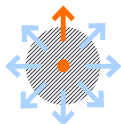

Knovel All Access provides powerful visualization and interactive analytic tools with:

150,000+
live graphs

20,000+
interactive tables

3,000+
live equations

Knovel All Access analytic tools comprises of 74 million datapoints covering:

- 100k chemicals
- 550K metals
- 80K polymers
- 1,500 composites

...providing engineers with numeric range search, unit conversion, and most comprehensive source of reference datapoints such as material/property data.
