Contrast 2025.1 release note

Introduction 🔗

This document describes the changes to Contrast to be released in conjunction with an EW release.

The complete Contrast documentation will be updated to include the changes described below. With particular reference to Contrast-out, implementation of the new versions of the schemas by receiving systems does not necessarily entail implementation of every new thing in the schemas.

The following sections describe the changes and list the differences with respect to previous versions.

Changes 🔗

Summary of changes applied to this version of CONTRAST are as follows:

- Added new asset type for audio description files
