

Inspec

Powered by **Engineering Village™**

Empowering engineers to solve the world's greatest challenges

About Inspec

For over 50 years, Inspec has been the essential discovery tool for numerous prestigious institutions worldwide. With Inspec you can easily pinpoint the exact research you need from the vast collection, saving time and ultimately, resources. Inspec was created by The Institution of Engineering & Technology (IET).

Comprehensive coverage

Inspec contains over 22 million records from across global publishers to deliver quality content to a wide range of research communities.

Inspec uses precise, subject-specific indexing to enhance discoverability of scientific research across physics, electrical engineering and electronics, computers and control, mechanical and production engineering, information technology and more.

Why Inspec on Engineering Village?

Engineering Village is one of the few platforms where Inspec can be searched together with **Compendex**. By searching both databases together, engineers gain access to the broadest engineering source available with a single database search experience.

Physics & Astrophysics
53%

Electrical & Electronic Engineering
40%

IET Inspec Subject Coverage

Note: documents can cover multiple subject areas

Computing & Control
33%

Production & Manufacturing Engineering
14%

Inspec ingests and indexes more than 1 million new records annually, offering timely access to high quality research.

Indexed records from Inspec include journal articles, conference proceedings, preprints, reports, books, patents, dissertations, and more.

Learn more

Engineering Village™ Inspec is your definitive research solution

From developing an innovative research strategy to assessing the impact of your organization, Inspec combines trusted content and advanced analytics to help you accelerate breakthroughs, solve societal challenges and make an impact on a global scale.

Support every stage of the research workflow with Inspec.

Inspec Analytics

Included with an Inspec subscription, this research intelligence tool provides unique and actionable insights into the current research landscape.

Inspec Analytics Plus

Adds valuable data sets and functionality to Inspec Analytics, providing integrated citation metrics and enhanced collaboration analysis.

Inspec Archive

Inspec can be supplemented with the Inspec Archive to extend coverage. These series of journals cover 837,000 records dating back to 1898.

Expert indexing, unparalleled granularity

All material within Inspec is indexed and classified by specialized indexing teams, consisting of highly-experienced subject experts using the renowned Inspec thesaurus and classification scheme.
