

Clinical Pharmacology powered by ClinicalKey®

Drug Monographs

Drug monographs in Clinical Pharmacology powered by ClinicalKey are designed with an easy to scan format and quick to find answers.

Search for Medications

1. Visit Clinical Pharmacology powered by ClinicalKey at www.clinicalkey.com/pharmacology/.
2. Find a medication using the search bar.
3. Select a medication from the Drug Monographs or US Drug Products section (**Fig. 1**).

A Adult monograph

P Pediatric monograph

The screenshot displays the Clinical Pharmacology search interface. The search bar contains the text 'lisi'. Below the search bar, there are four columns of results:

- Drug Monographs (View All (8))**: Lists medications with 'A' (Adult) and 'P' (Pediatric) icons. Items include Lisinopril (A, P), Alpelisib (A), Copanlisib (A), Duvelisib (A), Hydrochlorothiazide, HCTZ; Lisinopril (A), Idelalisib (A), Insulin Glulisine (A, P), and Umbralisib (A).
- US Drug Products (View All (10))**: Lists various formulations of Lisinopril, including 2.5mg, 5mg, 10mg, 20mg, 30mg, and 40mg tablets, as well as USP, and combination products with Hydrochlorothiazide (10mg-12.5mg, 20mg-12.5mg, and 20mg-25mg tablets).
- Combo Chemotherapy (View All (2))**: Lists 'Fulvestrant and Alpelisib (breast cancer)' and 'Idelalisib, Bendamustine, and Rituximab (chronic lymphocytic leukemia (CLL))'.
- Disease Information (View All (4))**: Lists 'Motor Vehicle Collision Injury, Adult', 'Motor Vehicle Collision Injury, Adult, Easy-to-Read', 'Motor Vehicle Collision Injury, Pediatric', and 'Motor Vehicle Collision Injury, Pediatric, Easy-to-Read'.
