

### About SSRN

SSRN is an early-stage research platform for connecting researchers, evolving ideas, and sharing research.

SSRN provides a custom platform for authors to share research for free. Academics and other researchers can freely discover and access tomorrow's research today on the SSRN eLibrary database.

### Gregory J. Gordon

Gregory J. Gordon is Managing Director at SSRN, a leading open access multidisciplinary online repository of scholarly research. Prior to helping Michael C. Jensen found SSRN in 1994, Gregg worked at KPMG and entrepreneurial companies in technology and healthcare. Gregg speaks around the world and writes regularly about scholarly research and the changes needed to create innovative research faster. He co-authored "The Question of Data Integrity in Article-Level Metrics" published by PLOS Biology and recently gave several talks in Beijing, Seoul and Tokyo celebrating Open Access Week 2017.

### Elsevier

Since Elsevier was founded as a small Dutch publisher in 1880, the world and the way we share information has been subject to constant change. In our journey to become a modern-day global information analytics business, Elsevier has always anticipated and adapted itself to the challenges ahead. In 2016 Elsevier bought a leading collegiate publishing network, SSRN. SSRN is known for its extensive subject network and its ability to publish new works first.
