7TH INTERNATIONAL *BRAIN STIMULATION* CONFERENCE

Lyon
FRANCE
21–24 February
2027

The 2027 International Brain Stimulation Conference will be the seventh edition of the world's largest meeting dedicated to brain stimulation.

Founded by Dr Harold Sackeim and Dr Mark George, co-founders of the *Brain Stimulation* journal, the conference has grown with each edition, showcasing breakthrough science and expanding global participation.

In 2027, Dr Charlotte Stagg and Dr Marom Bikson will serve as conference co-chairs, building on this strong legacy.

The meeting will highlight major clinical advances, rapid developments in brain stimulation technologies, and expanded opportunities for new ideas and emerging investigators. The exhibits will once again showcase the latest devices and software, with a new Innovations Corner planned to spotlight early and pre-market technologies.
