

i INFORMATION FOR POSTER PRESENTERS**Poster Panel Size**

Please refer to this visualization of the poster panels to be used during the conference. *The display area for each poster on the panel of the poster board is 100cm wide by 250cm high.* Your poster will not be expected to fit the whole display area of the board. **We recommend printing your poster A0 SIZE, portrait style.**

A0 Portrait Sizing:
84.1cm wide x 118.9 cm high

Please ensure that your poster does not exceed the display area. It is recommended that you leave a margin of at least **3 inches (7.5 cm)** around the poster.

When preparing your poster and considering how much of your display will be visible at eye-level, please bear in mind that panels will be mounted on legs/stands.

Poster Panel Allocation

A numbered panel will be allocated for each poster (separate from the abstract number you have been assigned) and staff will be on hand at the conference to provide your poster panel number.

Set-up and Session Times

There are 3 poster sessions scheduled at the conference. Poster sessions will take place outside of the meeting rooms in the pre-function area. **Please ensure that you stand by your poster(s) during the poster session for discussion and questions.**

Note: Please bookmark the online program for any latest updates here:

Fixing

Posters will be fixed to the boards with double sided tape, the on-site conference team will have some available for delegates to use.

Social Media Information

Please add one of the images below to your poster to advise attendees if they can/cannot share the information.

GENERAL GUIDELINES FOR POSTER

A poster should be self-contained and self-explanatory, allowing different viewers to proceed on their own while the author is free to supplement or discuss particular points raised in inquiry. Presentations should be kept simple and clear and a mixture of text and graphics is recommended. Remember that the viewer, not the author, as in the case of slide presentations, determines the time spent at each poster.

Poster Layout

Materials should be mounted on coloured poster paper or board. Use matt finish rather than glossy paper. Arrange materials in columns rather than rows. It is easier for viewers to scan a poster by moving along it rather than by zigzagging back and forth in front of it. An introduction should be placed at the upper left and a conclusion at the lower right. The abstract does not need to be presented.

Illustrations

Figures should be designed to be viewed from a distance and should use clear, visible graphics and large type. Each figure or table should have a heading of one or two lines. Additional essential information should be provided below in a legend. Photographs should have good contrast, sharp focus and, if necessary, an indication of scale.

Text

Minimise narrative. Use large type in short, separated paragraphs. Numbered or bulleted lists are effective ways to convey a series of points. Do not set entire paragraphs in uppercase or boldface type.

Titles and Fonts

Titles and captions should be short and easy to read, in a sans serif font for preference. Use large lettering as this means a number of people can read the poster from a distance without overcrowding. Remember to caption your poster with the abstract title, authors names and affiliations.

**Headings should
be a
minimum
of 50 point
size**

**Whereas, 25 point
size is suitable for
text**
