Contrast 2018.6 release note

1. Introduction

This document describes the changes to Contrast to be released in conjunction with an EW release.

The complete Contrast documentation will be updated to include the changes described below. With particular reference to Contrast-out, implementation of the new versions of the schemas by receiving systems does not necessarily entail implementation of every new thing in the schemas.

The following sections describe the changes and list the differences with respect to previous versions.

2. Changes

2.1. Support introduced for new DTD 5.6.0

Support introduced for the new DTD 5.6.0 and PITs, in CONTRAST IN and OUT, journal and book schemas, wherever applicable.

2.2. Support introduced to capture article-number

Introduced support to capture article-number in CONTRAST OUT journal schema.
