

# International Access

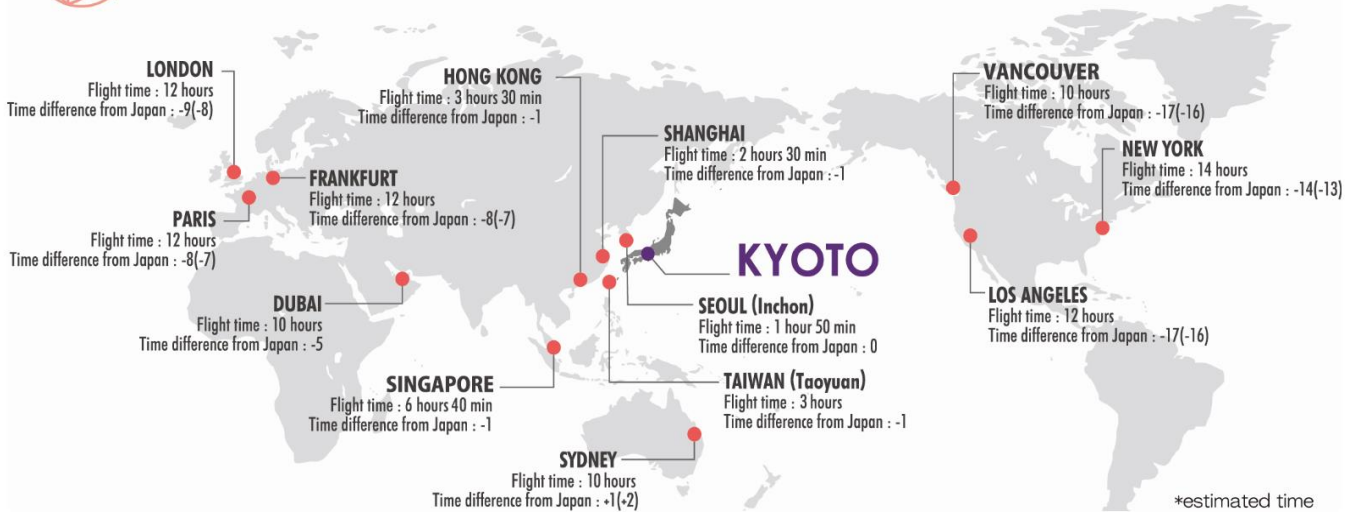

## Kansai International Airport

The closest international gateway to Kyoto is Kansai International Airport, which is serviced by 79 airlines and serves as the international and domestic hub for the Kansai region of Japan.

### Access From Around the World

Below are the flight times and time differences between major overseas airports and international airports in Japan.

## International destinations

**9 regions**

**21 countries**

**56 cities**

This information is current as of February 2025.

# Domestic Access - 1

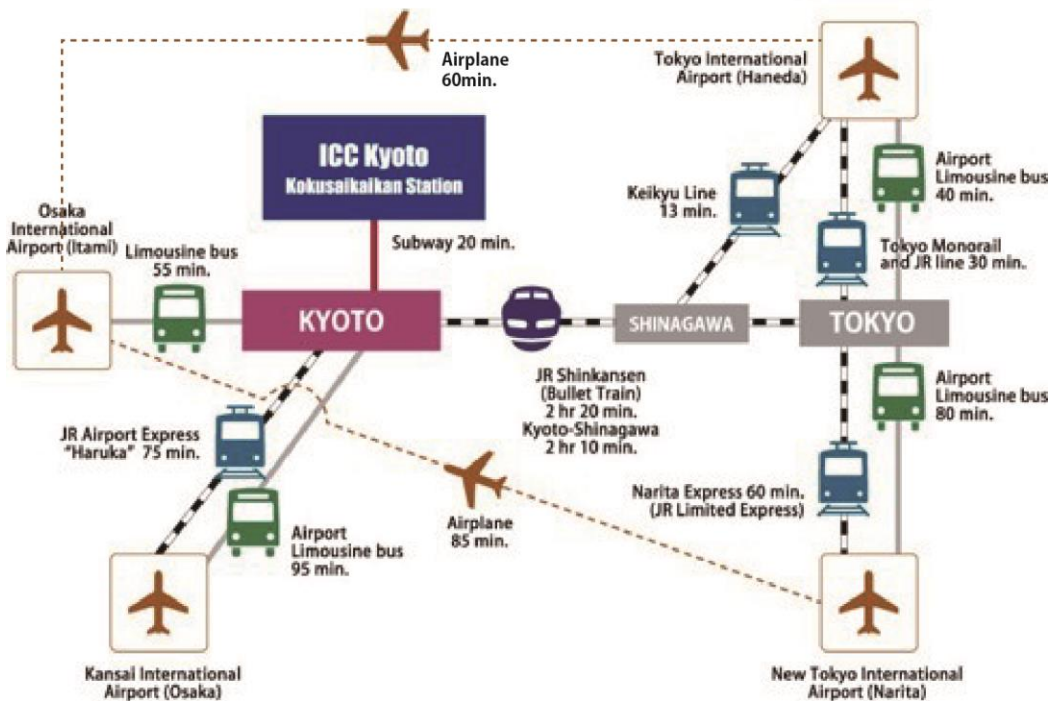

## Easy Transfer from Additional International Gateways

As a major city in Japan, Kyoto is also easily accessed via domestic transportation, which means visitors can land at another international gateway and even have opportunities to explore more of the country before or after arriving at Kyoto.

### Via domestic flights

Osaka International Airport, more commonly known as Itami Airport, is a domestic airport that connects to most major international airports in Japan and is located closer to Kyoto than Kansai International Airport.

### Via shinkansen bullet train

Kyoto is serviced by Japan's famous shinkansen bullet train, which offers a scenic and speedy way to travel between cities.

# Domestic Access - 2

## Access to Kyoto from Kansai International Airport

There are multiple options for transportation to Kyoto from Kansai International Airport, allowing visitors to choose a method to fit their schedule and budget. As Kyoto is a popular destination, transportation information at the airport is readily available and easy to understand.

Method	Time	Cost	Main Dropoff
Express Train	Approx. 75 min	3110 JPY (approx. 21 USD)	Kyoto Station
Highway Bus	Approx. 95 min	2600 JPY (approx. 18 USD)	Kyoto Station
Shuttle Taxi	Approx. 95 min	4980 JPY~ (approx. 34 USD~)	Direct

# Proposed Congress Outline

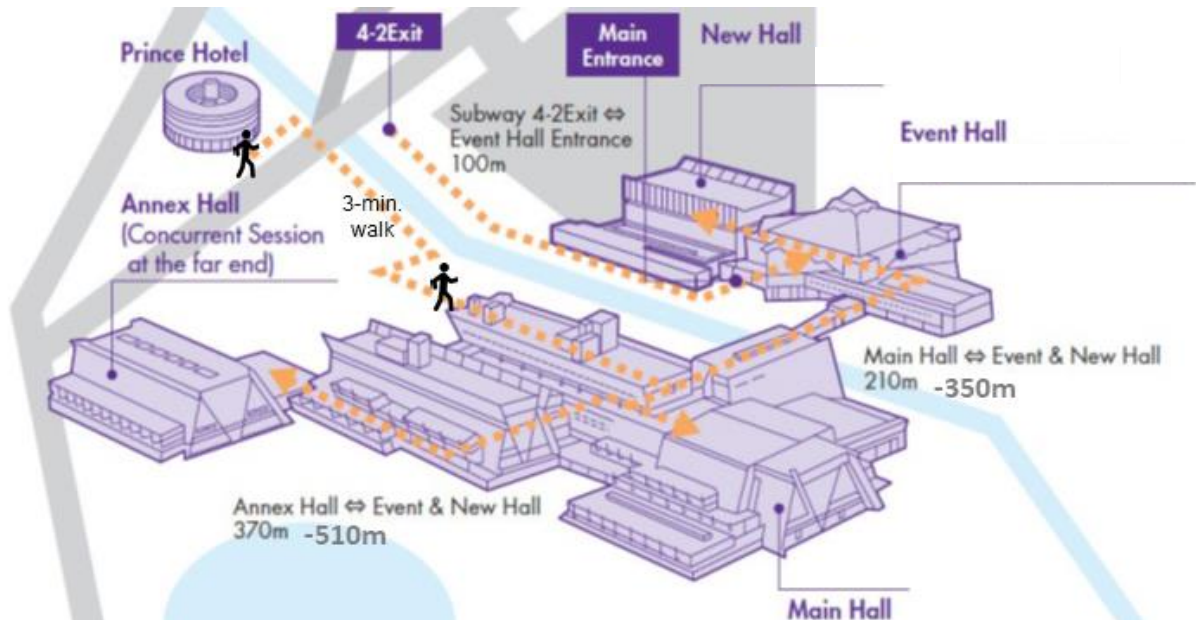

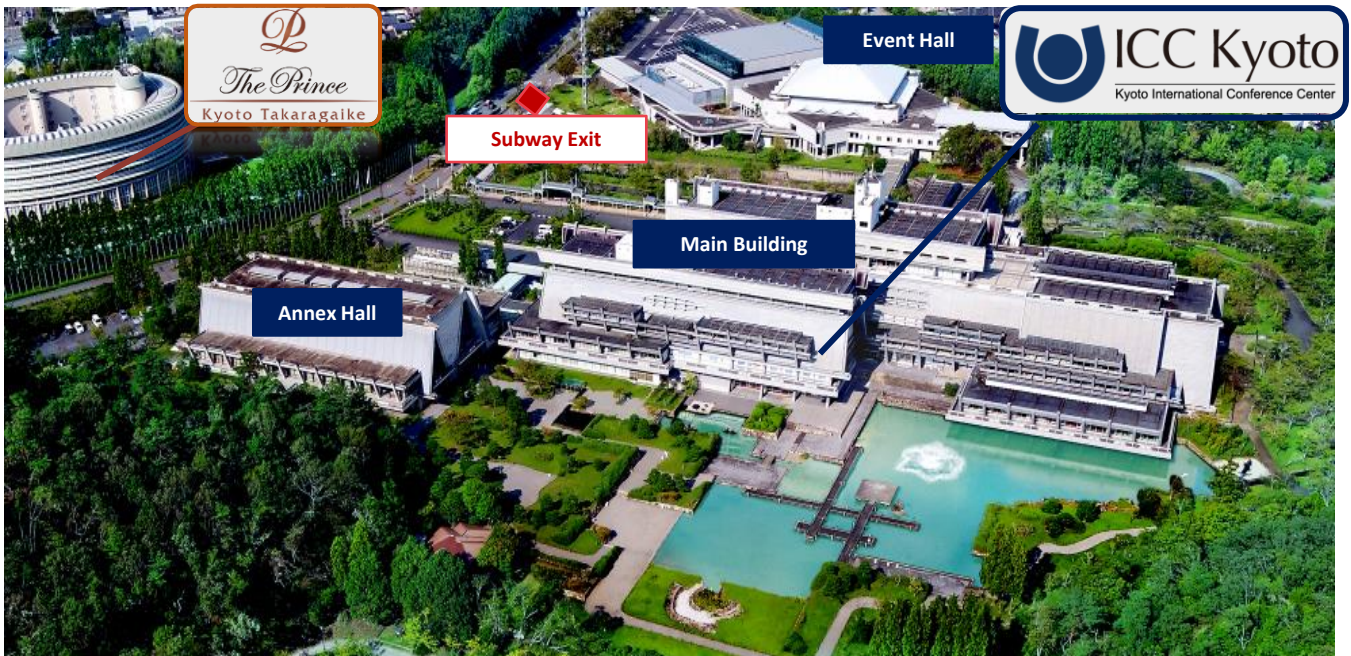

## Proposed Venue

### Kyoto International Conference Center (ICC Kyoto)

Kyoto International Conference Center (ICC Kyoto) opened in 1966, as the first government-built international conference facility in Japan.

ICC Kyoto covers a vast site of 156,000 sqm that features the Main Building, Annex Hall, Event Hall, New Hall and a Japanese garden, as well as car parking for 200 vehicles. Together with the adjoining hotel, The Prince Kyoto Takaragaike, the site serves as a state-of-the-art complex devoted exclusively to conferences.

# Sustainability -1

## Efficient Use of Energy

We have been working to significantly reduce energy usage by switching to LED lighting throughout the facility.

In addition, in 2023 we introduced a BEMS (Building Energy Management System) in order to use energy more efficiently.

## KES Environmental

We have received certification for Step 1 of the “KES” (Kyoto Environmental Management System Standard), which is the environmental management system standard produced by Kyoto, the birthplace of the Kyoto Protocol. \* LEED is not acquired.

## Solar Panels

We have installed solar panels on the slope of the parking lot to power the digital signage in the subway passageway.

# Sustainability -2

## Waste reduction

Food waste recycling  
Collection and recycling of used oil

Elimination of plastic bottles from ICC  
Kyoto vending machines  
Elimination of plastic bottles from  
catering services

## Ethical Choices

Serving of hot coffee certified by  
Fairtrade International (ICC Kyoto  
Catering Service)

Local Production for Local  
Consumption Menu (ICC Kyoto  
Catering Service)

## Maintenance of the Japanese garden and Surrounding Environment

In order to preserve Kyoto's historical landscape, we not only manage the environment of the Japanese garden within ICC Kyoto, but also cooperate with the local government to actively promote the improvement of the natural environment around Takaragaike Lake.
