About the Conference

Following the success of the first 8 conferences, the 9th International Conference on Bio-Sensing Technology will continue to bring together leaders from industry and academia to exchange and share their experiences, present research results, explore collaborations and to spark new ideas, with the aim of developing new projects and exploiting new technology for bio-sensing applications.

Bio-sensing technologies are of growing importance in healthcare, agri-food, environmental and security sectors, and this is reflected in the continued growth of global markets for such technologies.
