Empowering engineers to solve
the world's greatest challenges

About EnCompass

EnCompass is a must-have tool for researchers working in energy industries, including for analyzing data to plan and execute energy transition projects.

Comprehensive coverage

Comprised of two highly specialized engineering databases EnCompassLIT and EnCompassPAT, EnCompass is trusted worldwide for providing superior insights from scientific literature and patents targeted specifically for research in the energy industries.

Started by the American Petroleum Institute in 1961, these databases are extensively indexed utilizing proprietary technology and a taxonomy known as the EnCompass Thesaurus.

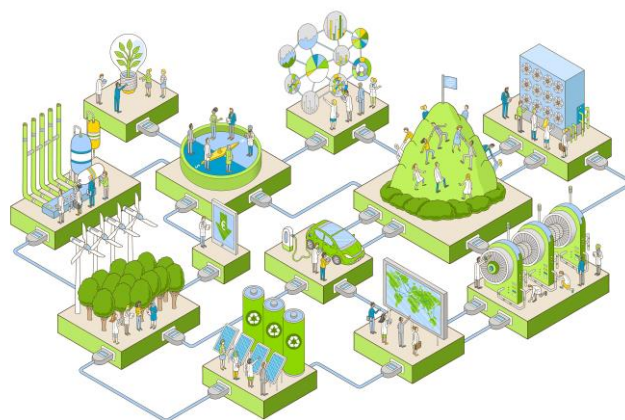

Content types

- EnCompassLIT covers mostly journals and conference proceedings, technical reports, and trade and scientific journals
- EnCompassPAT covers patents

Supporting your journey to Net-Zero

EnCompass supports customers to move towards their Net-Zero goals by amplifying data that covers enabling technologies, energy supply, and end-use technologies.

- Content has been expanded to include energy transition, batteries, carbon capture, utilization and storage (CCUS), smart grids, and biofuels in line with market needs.
- Working to extend taxonomies on renewable energy and sustainability.

Why EnCompass on EV?

Intellectual property (IP) expert, Scientists & Engineers, and Patent Information Specialist can narrow in on the information they need from broad terms. This is made possible through the features like Expert search, Thesaurus search, Alerts, Bulletins, Graphical overview made Encompass's niche in-depth search & indexing capabilities.

EnCompassLIT covers the following disciplinary areas:

- Automotive
- Catalysts & Zeolites
- Fuel reformulation
- Health
- Natural gas
- Oil field chemicals
- Petroleum refining and petrochemicals
- Petroleum substitutes
- Transportation and storage
- Tribology

EnCompassPAT covers the following disciplinary areas:

- Catalysts/Zeolites
- Chemical products
- Environment transport and storage
- Fuel reformulation
- Oil field chemicals
- Petroleum processes
- Petroleum and specialty products
- Petroleum substitutes
- Tribology

Both EnCompassLIT and EnCompassPAT are updated **weekly**

New records added every year **~35,000**

Records in EnCompassPAT (counted July 2022) **951,000**

Records in EnCompassLIT (counted July 2022) **1.33M**

“EnCompass is our most important source of information.”
