# Advancing Open Access

Open access (OA) is a vital part of our mission to help researchers advance knowledge for societal progress. Every day, we work to bring more insight into closer reach for the research community and the public. We offer a wide choice and flexibility for every researcher and institution around the world that wants to publish OA, without ever compromising on research quality, integrity and value.

## Advancing OA at scale

We are enabling a transition to OA at scale

### 3.3M+

Our world-leading platforms make available **3.3M+** validated OA articles

### 30%

**30%** of articles we publish are OA vs **2%** a decade ago

### 800

**800** fully OA titles — the largest portfolio in the industry — an **x8 increase** vs a decade ago

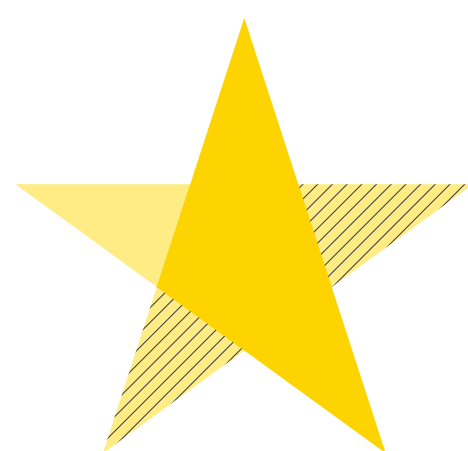

### 23%

We published **190,000** OA articles in 2023 — an increase of **23%** year-on-year

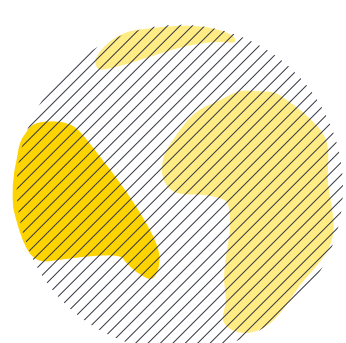

### 2K+

**2,000+** institutions supported with OA agreements

## Offering best quality and value

We deliver the highest quality research at the best value

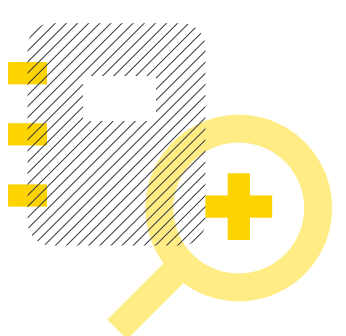

### 33K

**33,000** editors and **1.5 M** expert reviewers around the world

We are focused on delivering the best value for the research community, delivering **above-average quality** at **below-average price** across the last decade

### 28%

Articles in our journals account for over **17%** of global research output and **28%** of global citations, reinforcing their focus on quality

### 3M

We received **3M** article submissions in 2023 and ultimately published **630,000** verified, peer-reviewed, enhanced articles

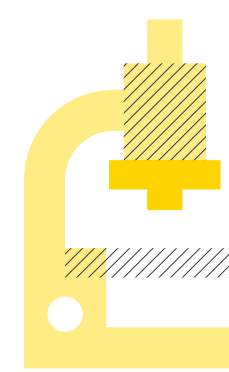

## Addressing inequity

We offer broad and equitable choices to support every researcher and institution

### 500K+

In 2023, we supported **500k+** researchers across **190+** countries and territories to publish OA

### 2.9K

**2,900** quality scientific, technical and medical journals offering OA options

### 80%

We waived or discounted OA publishing cost for **nearly 80%** of authors from the Global South in 2023

**Industry first** geographical pricing initiative to **help researchers in low- and middle-income countries** to publish OA
