

Optimize drug safety and efficacy decisions for better outcomes

PharmaPendium combines unparalleled regulatory and drug data with full-text search and predictive tools to help you:

- Accelerate regulatory approval
- Predict success of drug candidates
- Anticipate post-market safety risks
- Reduce animal testing

PharmaPendium turns regulatory and scientific complexity into strategic clarity.

Drugs with data

Plus millions of extracted data lines for:

- Safety
- Efficacy
- Activity
- Metabolism and excretion (ME)
- Pharmacokinetics (PK)

Numbers as of September 2025.

Used by the FDA and the world's top pharma companies.

ELSEVIER

Advancing human progress together

Gain *critical insights* from trusted quality data combined with analytical and predictive tools

Optimize clinical trial design

Learn from the success of your peers and from reviewers' comments.

Reduce risk

Predict harmful drug-drug interactions and off-target adverse drug reactions with the Drug-Drug Interaction Risk Calculator (DDIRC) and Safety Margin Tool.

Enhance regulatory success with AI

Gather regulatory insights using natural language.

Search normalized data on:

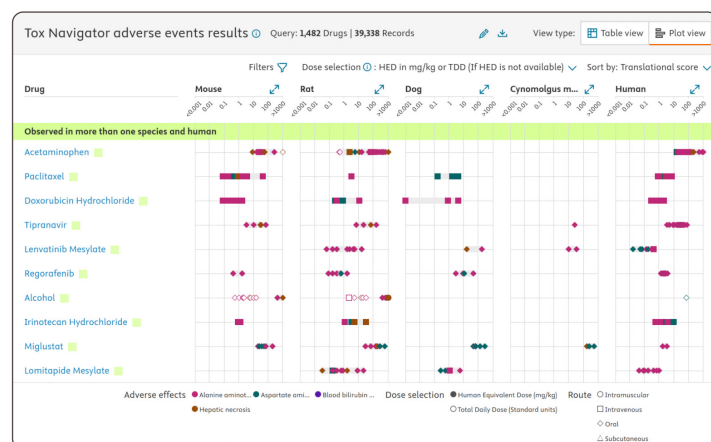

- Preclinical and clinical safety
- Adverse events (MedDRA)
- Pharmacokinetic parameters
- Metabolism and transport
- Drug-drug interaction
- Clinical trials and endpoints
- Post-market reports (FAERS)

"DDIRC is an essential tool and enables rapid response, hence decisions, on the interaction risks."

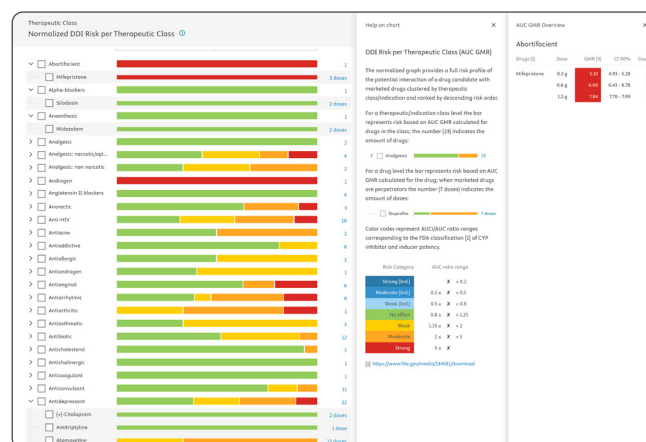

Head of Biopharmaceutical Research Department
Servier

"We often make decisions based on PharmaPendium's data on how similar compounds passed NDA."

Toxicologist
Japanese pharma company

Analyze the toxicity of drug candidates and advance the 3Rs with the new Tox Navigator.

Review multiple drugs for DDIs simultaneously with the Drug-Drug Interaction Risk Calculator.

Advance your research with Elsevier's PharmaPendium and a portfolio of solutions for [pharmaceutical R&D](#). Discover, innovate and develop with confidence, supported by trusted quality information, innovative technology and scientific expertise. Let's shape progress together.
