

Knovel Plus

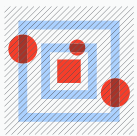

For Corporate Markets

Stalls in engineering innovation. Long development and scale-up timelines. Plant shutdowns.

These are some of the challenges facing engineering-driven organizations. But, how do you make improvements when the gap between scientific research innovations and engineering is years long and engineers spend **up to 40%** of their time looking for information?

Knovel Plus helps engineering-driven organizations feel confident in early-stage research decisions, accelerate new product development, and reduce risks along the entire value chain from R&D to manufacturing.

More comprehensive
than ever before

Quick access to the latest forward-thinking research and to proven methods across development, scale-up, and manufacturing

Faster access to answers,
insights, and analytics

Productivity gains through reduction in platforms needed to find answers

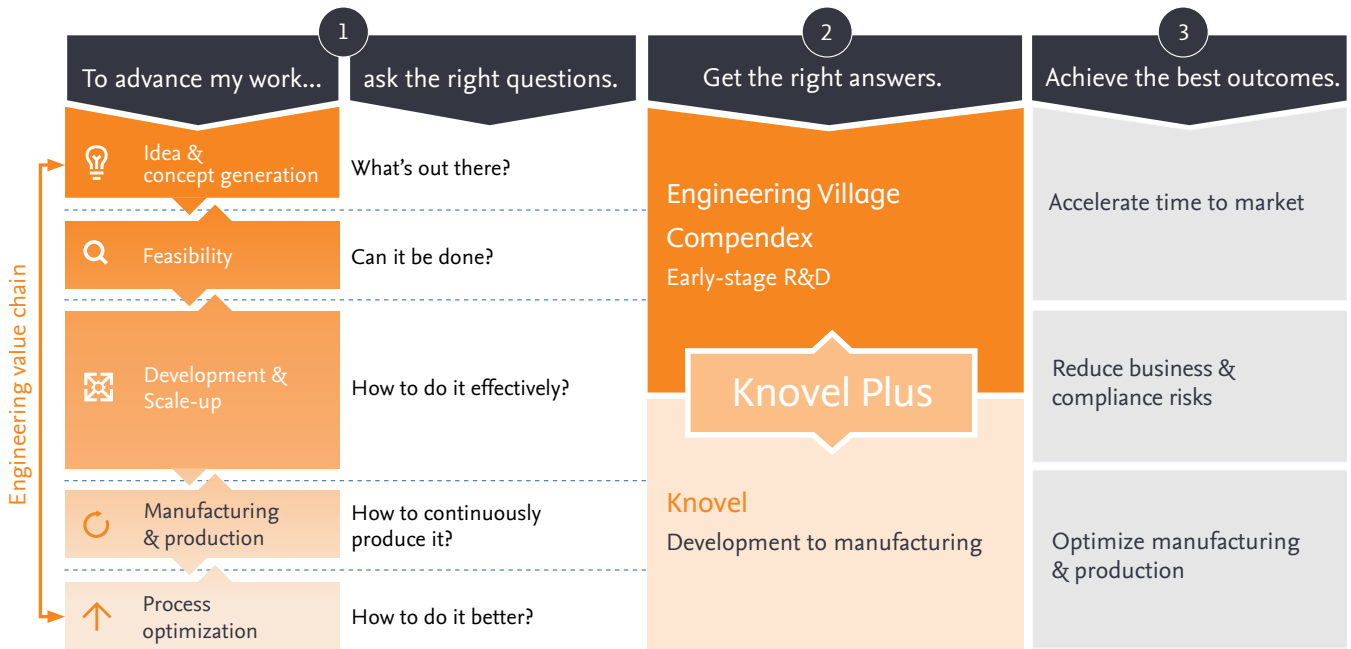

Reduce risks and
increase confidence

Confidence in decisions and recommendations from reliable and multi-disciplinary content

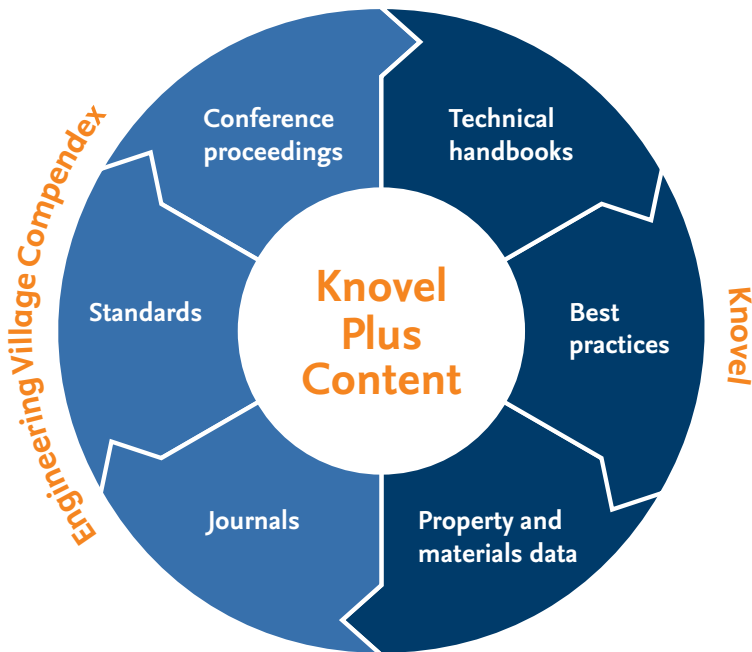

Through the interoperability between **Knovel** and **Engineering Village Compendex**, **Knovel Plus** enables answers and better decisions.

Knovel Plus relies on the power of Elsevier's two premier engineering solutions, Knovel and Engineering Village.

"The main benefit [of Knovel Plus] is being more confident in our answers."
 —Engineering Manager at International Manufacturing Company

Engineering Village (Compendex)

- From ideas to development
- Feel confident in early-stage research decisions, complete the research stage-gate faster, and identify impactful trends and collaborators

Knovel

- From development to process optimization
- Accelerate time to market, reduce business & compliance risks, and optimize manufacturing and production
