Tips for smooth content delivery

The biggest tip is to inform your Publishing Relations Manager about any changes

This may include changes to:

- The journal website or URL
- The journal title
- The publication schedule
- Content delivery methods

- Your contact details
- The ISSN (If you are updating the ISSN number, please ensure you update [ISSN Portal](#) as well. We use this to verify ISSN changes.)

- If the title ceases production or is transferred to another publisher, please notify your Publishing Relations Manager.

- Please ensure our web access does not expire

If you have questions, you can check our [content provider FAQs](#) or reach out to your Publishing Relations Manager directly
