Noritake

8-Minute Sintering

with the SpeedFire “Pre-heating Function”

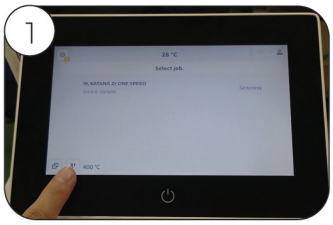
Standard
9-Minute

NOW EVEN FASTER.

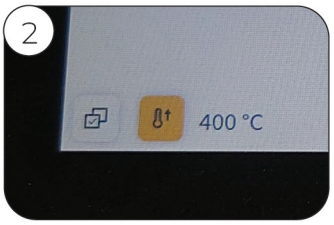
With Pre-heating function
8-Minute

The “Pre-heating function” built into the CEREC SpeedFire enables complete sintering of zirconia restorations in approximately 8 minutes.

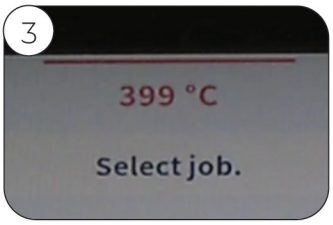
How to Use the “Pre-heating Function”



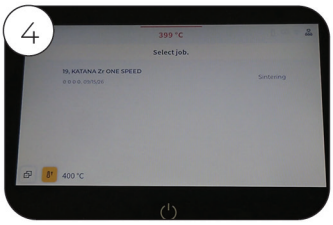
Touch the pre-heat button in the lower left section of the screen.



Check that the button color has changed to orange.



Confirm that the furnace has been heated to approximately 400°C.



*CEREC System version 5.2.13 or 5.3.3 and later is required.
