

# Sustainability Dashboard

Fastly Sustainability Dashboard calculates the electricity consumption and greenhouse gas emissions associated with your usage of the Fastly platform.

## Understand your digital carbon footprint

- ✓ Effortless Access to Emissions Data
- ✓ Complete Transparency and Trust
- ✓ Actionable Insights

Fastly's Sustainability Dashboard simplifies the measurement of emissions from your platform usage.

There's no guesswork and no delays—gain instant access to Scope 2 and Scope 3 data through our dashboard, API, and exportable reports.

Shine a light on what's driving your digital emissions.

### Effortless Access to Emissions Data

- Get electricity and emissions data, refreshed daily, via dashboard, API or CSV
- Filter by time frame to match reporting needs
- Break down emissions by country for regional insights
- Clear view of electricity consumption and emissions associated with bandwidth, compute and shared platform components

### Complete Transparency and Trust

- GHG Protocol aligned methodology
- Location and market-based Scope 2 & 3 electricity-related emissions
- See how and where your usage impacts electricity and emissions

### Actionable Insights

- API-first for easy integration into your workflows
- Supports daily carbon hotspot analysis and platform usage optimization
- Flexible design—use it how your team works best
