

With Collomix at the pool position

## Mixing tool KKR For fluid and solvent containing materials

 The KKR mixing tool with a plastic bucket and galvanized shaft is particularly suitable for small volumes (up to 15 kg) of material, including aggressive materials. It swirls the material with a powerful suction effect, without splashing. Optimal flow conditions when used with high-speed drives (e.g. power drills).

Mixing action: 

 Ideal for paints, lacquers, glazings, primers, etc.
