

CMG 2600 concrete grinder

Outstanding output

If long-lasting output and reliable working is required, then the CMG 2600 concrete grinder is the right choice.

It is ideally suited to medium-sized and larger spatial requirements. You'll be in a solid position to remove tile adhesive, smooth concrete surfaces, remove sinter layers, work screeds and much more besides with the CMG 2600 and its 180 mm cup wheel. The motor has sufficient power reserves for long work cycles.

Its two handles mean that the machine sits securely in the hand and can be guided in the best way possible. A shock absorber in the handle absorbs vibrations to keep them to an absolute minimum. An effective vacuum cleaner enables virtually dust-free working.

2600 W output

180 mm cup wheel

Fits comfortably in the hand

Cup wheel for concrete

Concrete grinder | CMG 2600

Technical data

Output	2600 watts
Voltage	230 V / 50 Hz
Speed	6600 rpm
Threaded spindle	M 14
Cup wheel diameter	180 mm
Power cable	4 m
Weight	6.8 kg
Item no.	19201
Scope of delivery	Supplied with cup wheel, in case, with socket wrench
Cup wheel	BST 180

- Advantages
- Powerful high-performance motor with optimised dust extraction
 - Sits comfortably and securely in the hand during work
 - Metal dust cover
 - Rubber lamellar ring for optimum extraction of grinding dust
 - Electronic safety shut-down
 - Vibration damping
 - Safety switch
 - Electronic overload protection and restart protection
 - LED indication in the event of overload
 - Supplied in a practical case
 - Deduster with fine dust filter (class M) necessary
