We've got something against dust

Be it when mixing or grinding: dust arises during many tasks on the construction site. This is not only a nuisance for you as a tradesman and for your customers, it can also be a health hazard. The Collomix VAC 35 M provides a reliable remedy. With its "M" dust filter class, it reliably and permanently removes harmful particles from your respiratory air – to the benefit of your health. Not forgetting that the customer will thank you as well.

Work without any interruptions

"M" filter class

High-performance motor for greater suction capacity

Operating range of up to 13 m
