## MIXING MATTERS

Mixing matters now more than ever. New materials have a high degree of specialization – and they require individual treatment during mixing to optimize their properties and prevent damage. By perfecting mixing techniques, there is great potential to save time and money. Intelligent processes and the right equipment prevent errors, increase user satisfaction and contribute directly to customer satisfaction.

Yes, there is science behind mixing. But you don't have to deal with it. Collomix does and has done the hard work for you for more than 40 years. We're not only committed to products; we're dedicated to mixing workflows that help our customers to work faster, more efficiently and safely.

CONTENT PAGES

# At Collomix, we eat, breathe and sleep mixing.

Since our beginning in 1974, mixing's been the sole focus of our company. You can feel those decades of commitment to mixing as soon as you put your hands on a Collomix. You can feel the impeccable German engineering, with stability from handle to paddle. And you can rest assured that this tool will last, because it's from a company with a less than 1% return rate within three years of purchase.

To bring our customers this powerful product line,

we don't just start at the drawing board – we start by learning all we can about the whole process of mixing. Since we understand all the challenges involved, we can design our product line to help workers overcome them. We also work with the manufacturers of materials that need to be mixed. In fact, many material manufacturers come to us to learn how best to mix their own products.

At Collomix, we constantly monitor changes in the industry so our customers don't have to worry. Because we're driven to seek out what's important to today's workers, and to bring them the premier tool for mixing.

Originally invented in 1975, this paddle paved the way and is still in rotation today along with 12 other unique application paddles.

When a commitment to mixing guides everything you do as a company, smarter ideas emerge. Better tools are made. And everyone gets better results.

# Stronger parts mean stronger mixing products.

## The anatomy of a Collomixer.

Every part of a Collomixer serves a purpose – because this is NOT a modified drill; it's a tool that's 100% designed for mixing. All parts meet the highest standards for durability, reliability and worker safety.

A solid metal handle frame protects from housing breakage and protective rubber buffers at the corners absorb shocks.

O

# What goes into making the ultimate mixing machine.

» Transforms speed into torque.

- » Sufficiently dimensioned motor and transmission components for trouble-free operation.
- » Even with demanding tasks, sophisticated cooling reliably prevents the mixer from running hot.
- » A 100% quality check: each machine is assembled by hand and automatically checked again to meet Collomix standards.

The most important part of our products: people who use them.

Collomix worldwide.

An absolutely great product. Thanks to its comfortable handle, the paddle mixer can be held safely at all times. The switch enables infinitely variable speed control. I am thrilled.

John C., 38, USA

#### Gerd S., 43 Germany

Rául G., 50

Awesome product,

Super easy to use.

fun to work with.

Brasil

Top quality as always from Collomix. Anyone who knows the company knows what I mean. The nice thing is, if something actually breaks, you can always get spare parts.

#### Daavid T., 46 Finland

#### Paddle DLX

Absolutely recommended! You only need a third of the time compared to a normal paddle. Don't ever want to miss it again.

Léon R., 50 France

Mixing? Collomix! We have been using the Xo 1 R for some time now. Upright, fatigue-free work, finally without back pain! Top satisfied, gladly again!

#### Robert B., 37 Australia

We recently bought the MixerClean, with which our paddles can be cleaned within seconds after work. This saves time and arguments (no one wants to do the cleaning...).

# Why retailers depend on us too.

If you're a builder or worker, you'll want a Collomix. If you're a retailer or dealer, you'll want to carry these products. Sales of our Collomixer, mixing paddles, automatic mixers and accessories have made us the number 1 mixing brand in Germany, and we are sold in over 53 countries across the world.

## Why carry Collomix?

- We bring your customers guaranteed quality with a two-year warranty and a claim rate under 1% in 36 months of usage.
- » Our expertise is your expertise. Since we're the tool for mixing, we can help you advise your customers with our easy-to-use product app, mixing guide and tutorial videos.
- » We're here for service and sales support. And we'll also work with you to support promotional campaigns.
- » Our logistics and operations are as dependable as our products. We may be German-made, we

have a network of distributors and in the headquarters we have employees with high competence in foreign languages.

- » We're always here to help and offer solutions. And with values of honesty, fairness and integrity, you know you'll always get a straight answer from us.
- » We're a family business that has stood the test of time. We've been bringing workers and builders mixing tools since 1974. This company has always been driven by product quality.

### **O** Collomix

Since 2005, we've sold more than 12.6 million paddles, over 1 million Collomixers and 12,000 Collomatic systems around the world.

Ł

# The Collomixer. Your trouble-free mixing buddy.

More machine power means less muscle power. With a Collomixer, workers can mix more accurately and easily, safe time by improving workflow and reducing physical stress. When things get heavy, the Collomixer won't let you down.

### Ergonomics & Safety

Use less muscle power and more machine power. Collomix hand-held paddle mixers are all designed according to ergonomic principles, eradicating hand and body fatigue. Machine design allows an upright working position thus eliminating back strain. That means you don't have to worry about worker's compensation.

#### Motor Housing

The housing components withstand tough construction site conditions without the additional weight.

#### Gear Box

Die-cast aluminum means maximum robustness and longevity. Polished, solid steel gear wheels inside the gearbox and a sophisticated lubrication system means a quiet and reliable machine.

#### Easy & Fast Paddle Change

HEXAFIX<sup>®</sup>: Innovative quick-action coupling for paddle change-over in no time without additional aids. Always work with the right paddle for your material.

## flow, TEC - WORKFLOW TOOLS

AQIX IN ACTION

Collomix's workflow tools are designed to keep jobs running effortlessly. Simple and efficient, these are the workflow tools you wish you always had.

## AQiX

The AQiX water dosing instrument allows you to accurately and precisely measure the amount of water needed for the job. This battery operated, portable device featuring automatic shut off eliminates the need to haul water buckets. Faster, easier and cleaner mixing than ever before.

ltem No.	Product	Dosing Qty	Flow Rate	Power	Water Conection
19042	AQiX	1 - 99 litres in 0,1 l-increments	10 - 25 l/min.	2x AA Batteries	3/4 ″

Simply clamp the dust.EX dust extraction device to the edge of the mixing bucket in combination with a vacuum cleaner. The clamping spring enables attachment to almost any mixing bucket. Switch the vacuum cleaner on for virtually dust-free working while filling or mixing. dust.EX reliably removes any escaping material.

ltem No.	Product	Hose Connection
19040	dust.EX	0 35 mm

## Sharky

Put this practical bag ripper on your mixing bucket, then place the material bag on the teeth. Bags can be opened with little effort, and without the need for an additional knife. Thanks to its intelligent design, Sharky can be used with a wide range of bucket diameters.

ltem No.	Product	Bucket Size
19190	Sharky	10 - 30 litres
19039	BIG Sharky	40 - 90 litres

## Mixing Buckets

ltem No.	Product	Description
60173	30 I Bucket	Ideal for small but heavy loads. Black with metal carrier handle.
60403	65 I Bucket	Special mortar bucket, 65 litres, robust design, black; high material thickness and rigidity, reinforced handles, secure hold during machine operation
70115	75 I Bucket	Mixing bucket for LevMix, 75 litres, black
60261	90   Bucket	Special mortar bucket, 90 litres, robust design, white; high material thickness and rigidity, reinforced handles, secure hold during machine operation
60177	10   Measuring bucket	Transparent 10 I plastic bucket with scale and handle

## mix.GRIP

ltem No.	Product	Description
19180	mix.GRIP	Secure grip for mixing buckets; diameter adjustable between 250 and 325 mm; the bucket is clamped using the foot switch. Holding the bucket between your feet, turning the bucket or the bucket slipping away is a thing of the past. The contractor can stand in a safe and comfortable position during the mixing process.

## Mixer-Clean

ltem No.	Product	Description
46002	Mixer-Clean	Quickly and easily clean your mixing paddle. When you have finished your mixing work, immerse the mixing paddle in the bucket filled with water and run the mixer for a short time. All residual material will be thoroughly removed by the brushes. Removable lid for emptying.

## RMX

ltem No.	Product	Description	7
45624	RMX	Mobile mixing stand for Xo / Xo-R / duo mixers Relieves the operator's body and muscles Easy up and down movement of the agitator thanks to a gas pressure spring. Ideal for rolling work with several mixing buckets/containers.	7

## Transport trolley

ltem No.	Product	Description	
70183	Transport trolley	Transport trolley for 65 l bucket (0 58 cm), pneumatic tyres; with locking device for pouring out liquid material; effortless moving and pouring of heavy mixing buckets.	
60318	Upgrade kit	Upgrade kit for transport trolley for 90 l-bucket	

9

# ACCESSORY

Combine paddles with other drive machines or convert an existing drive to the HEXAFIX® system. Various thread adapters, connections or extensions offer a wide variety of combinations.

ltem No.	Product	Description	
49517-000	HEXAFIX® Retrofit adapter	For mixers with M-14 screw thread to HEXAFIX <sup>®</sup> ; for using Collomix paddles with HEXAFIX <sup>®</sup> connection.

## A SIMPLE SOLUTION FOR EVERY MIX

Every material mixes differently. It's why the science of mixing matters. For results that last, it takes the right machine and the right paddle. We've studied the science of mixing for over 40 years, designing tools to optimize your mix and maximize your results.

### Find your mix in seconds.

Find the right paddle and the right machine with our online MIX ATLAS. Search thousands of materials for an instant recommendation of paddles, paddle mixers or automatic mixers. Scan the QR Code with your smartphone to find your mix in seconds.

MATCH

YOUR MIX

#### Paddles for every material.

We make paddles to properly mix every material. When you match the right paddle to the right material, you get the right mix, every time.

## COLLOMATIC

# The tool that means productivity.

Small as well as large quantities of material can be reliably mixed with these machines - continuously, mixture for mixture. Collomatic ensures faster work sequences, mixing results of first-class quality that can be relied on and noticeable relief on the job site. No employee has to mix by hand all day long. This saves both time and money.

#### Fast and Economical

Get a short mix time, high mix quality and better results, all at the same time.

#### Mix it All

Just as every material needs a specific paddle; there's a Collomatic machine for every specific job. You name it, Collomatic mixes it to perfection.

#### High Mobility

These automatic mixing machines can be used wherever they're needed. Ergonomic handles, large wheels and light machine weight make Collomatic machines portable from job site to job site.

### Safety and Health

Depending on the model, the units are equipped with a dust extraction device, automatic switch-off, undervoltage release and other features to actively guarantee your safety in everyday work.

Rick M., 46:

REVIEW  $\star \star \star \star \star$ 

To be honest, in the beginning we all were skeptical. What should I say? LevMix did change the way we work, but in a really good way. My people love it because it's easier to handle than any other solution we've tried. I love it because we're much faster and we can do 35% more jobs than before. We work with up to 3 LevMix on one site, depending on the job. That way even when working in angled and remote locations 100 m<sup>2</sup> can easily be done within an hour. The LevMix can even handle large-scale industrial jobs and over-night projects.

# . E V M I X

## LEVMIX

Mix it. Move it. Pour it. Profit! Self-leveling compounds for perfect results.

Up to 100 m<sup>2</sup> per hour is no problem at all with the only VLX stirrer on the market specially developed for self-leveling materials. 100% lump-free, 100% homogeneous, 100% satisfied customers.

LEVMIX IN ACTION

#### Movability

The LevMix can be moved comfortably by one person when loaded thanks to the 4 castors. Pouring is controlled and precise. At the same time, its rollers remain clean even when pouring. With the LevMix, manoeuvring in confined spaces is easy.

#### Power

Thanks to the superior mixing power of the special paddle, the LevMix can handle an extremely high hourly material throughput of approx. 30-40 bags per hour. This saves up to 2/3 of your time.

### Health & Safety

The LevMix is ideally balanced for pouring. Together with the lateral hand guide, you can pour without bending down, which is easy on your back.

A dust extraction system reduces dust emissions to a minimum. This keeps your lungs and workplace clean.

### Specialized

Turn the LevMix into a design floor specialist with the optional sieve! It retains even the smallest particles from the material.

## TMX

The TMX models are particularly suitable for heavy materials with their three-arm mixing tools and low speed. In contrast to a drum mixer, the active mixing ensures a lump-free result. While you take care of other tasks on the construction site, the TMX mixes for you in the meantime.

#### Mobility

The TMX has a 75,5 cm width so it fits through standard doors. Two big wheels make it easy to maneuver wherever you need it, even on the rough ground of construction sites or loading and unloading off of your truck bed.

#### High Productivity

Ingenious bag ripper on top of the machine opens the bag for you. Once the perfect mix is achieved, just open the shoot and the machine will empty itself. The shaker will remove any persistent material. All features decrease risk and increase workflow.

#### Health & Safety

The TMX has a dust extraction hook up and removable cover to reduce dust emission. Safety lid prevents anyone from reaching into the machine while it's running by shutting off if the machine is opened while in use.

#### Easy to Clean

Spend less time cleaning at the end of a long day. The mixing device can come apart tool-free for easy cleaning. Easily remove mixing device and extractable shoot, wipe out drum and that's it! No residue is left.

No. Market Mark

We used to always mix our concrete and other material in a tilted drum mixer. However sometimes the result wasn't smooth, and we had lumps in there, that's what made me buy the TMX despite the higher price. And the investment was definitely worth it. The TMX is quite versatile and is perfect for all our heavy and drier materials.

REVIEW  $\star \star \star \star$ 

We often have jobs in shops and malls where we have to tile vast areas in a very short time. Sometimes we even have to level the floor before we can start tiling. The AOX-S gives us the versatility we need for those different materials and the material output we need to keep to our schedule. One thing I love about the AOX-S is that all my men are productive at work and no one has to stand there and mix all day.

UN AREE

# A 0 X - S

# AOX-S

The most versatile automatic mixer in its class on the market. The AOX-S comes with two specialized paddles designed to work with a broad variety of materials giving you flexibility and the perfect result every time.

THIN-BED MORTAR	TILE ADHESIVE				
JOINT MORTAR S	LURRIES				
BONDING AGENTS	MORTARS

Marcus P. 43:

For 20 years we have been mixing our mortar in a concrete mixer. It always bothered me that pouring was quite a mess and transporting was always elaborate because we could never place the mixer where we needed the material. Every time we mixed with a simple shovel, there were always dry lumps in the mortar that hindered the work. The POX-S is a wonder weapon! Now I always mix my mortar exactly where I actually need it. And it takes less than 2 minutes to clean.

REVIEW

P 0 X - S

# POX-S

A lightweight, mobile automatic mixer strong enough to handle heavy materials. With a fixed mixing paddle and rotating mixing bucket, it ensures the best mix for sand or gravel-filled materials. The little brother of the TMX, its mobile and easy to operate.

CEMENT PLASTER	P	PAVEMENT GROUT				
CEMENT SCREED	S	SYNTHETIC RESIN SCREED				
UNIVERSAL MORTARS	5	CONCRETE				
DRAINAGE MORTAR						

## Mobility

Its biggest advantage is its mobility. Compact and lightweight, it can be easily moved by one person, anywhere it's needed on the jobsite.

SEE THE POX-S IN ACTION

Mixes Heavy Materials

Despite its compact package, the POX is a real heavyweight. It's in its element mixing heavy materials, including sand- or gravel-filled mortar, screed, or synthetic resin screeds.

## High Productivity

It thoroughly mixes in less time, in small or large quantities. Scrapers prevent material from sticking to the bucket. With exchangeable mixing buckets, you can mix one bucket after another to increase throughput.

## Ergonomic

It eliminates the strenuous job of mixing by hand. It saves team energy for other tasks on the jobsite. With an available transport trolley, one person can easily transport buckets, without strain.

# XM

High performance, forced-action, mobile mixer. It's a beast of a machine for a beast of a job. Choose from a variety of speeds and paddle attachments for any variety and combination of mixing needs.

#### Productivity

Planetary gearing converts power into high torque and high speed, ensuring optimum mixing in the shortest time possible. More than one ton of mixed material can be produced in an hour with alternating mixing. Built-in timer lets you control mixing cycles. The rim scraper and height adjustable mixing tools remove all material deposits on the bottom and sides of bucket, enabling less clean-up which means more productivity. Bucket dolly allows for quick transport and easy pouring.

#### Health & Safety

The removable safety lid is designed to prevent anyone from reaching into the machine while it's running. If opened, the paddles will stop operating.

#### Forced-action Mixing

Forced-action mixing tackles the most challenging materials. Interchangeable tools and speeds enable you to mix a variety of material from liquid to plastic media and multi-component systems like quartz sand mortar all in one machine.

#### Michael S. 56:

We do epoxy flooring in manufacturing plants, warehouses or in the food business. Speed and first-class processing quality count, because our customers do not accept long downtimes. To ensure that the processing quality of the epoxy material is consistently good, we use the Collomix forced-action mixer in mixing technology. This was a recommendation from our material supplier and after the first jobs we didn't want to miss it any more. A

# CONCRETE GRINDERS

Concrete grinders for removing adhesive residues from tile or floor coverings, smoothing concrete and screed surfaces, deburring formwork edges, sintered layers, coatings or for processing natural stone.

### Two Professional Models

CMG 1700, for small jobs or where space is at a premium, ideal for work on the wall. The universal model with cup wheel Ø 125 mm for the craftsman. With hood segment to open, for work close to the edge.

CMG 2600, the power pack for larger grinding jobs with 180 mm cup wheel. Especially suitable for floor grinding work and where strong forces are required.

### Latest Engine Technology

Optimised coil technology and airflow bring out the maximum power in the most compact design. For convincing power in material removal and constant grinding power with uninterrupted work. A temperature monitor, LED overload display and safety switch-off protect motor and machine. With soft start and restart protection.

#### Ergonomy

The cross handle position ensures that the machines lie well and securely in the hand. Controlled guidance during grinding. Adjustable handle (CMG 1700), vibration damped handle (CMG 2600).

#### Healthy and Clean Grinding

Maximum dust reduction is achieved by a tightly closing laminar ring and the connection of a powerful deduster. For a dust-free environment and clean air.

# GRINDING CUPS

Whether concrete, epoxy resin or natural stone: with the right cup wheel you work quickly and thoroughly. High-quality diamond cup wheels in professional quality. Welded segments with best values for service life and stock removal.

## BST 125 CYCLONE

ltem No.	Product	Description	
19295	BST 125	for hard, mineral surfaces, such as concrete, tile adhesive, natural stone with high material removal rate, rougher grinding pattern for CMG 1700; 0 125 mm	

## GST 125 GRINDER

ltem No.	Product	Description

ltem No.	Product	Description
19297	BST 180	for hard, mineral surfaces, such as concrete, tile adhesive, natural stone with high material removal rate, rougher grinding pattern für CMG 2600; Ø 180 mm

# DUST EXTRACTOR DUST CLASS "M"

Safety vacuum cleaner for the construction site with dust class "M", for the effective extraction of health-endangering fine dust during grinding or mixing work. With vacuum monitoring for automatic, mechanical shaking of the two filter cartridges one after the other. Thus working without interruption. Constant high volume flow for optimum dust removal. Antistatic hose with 35 mm connecting piece. Dust retention capacity at 99.9%, easy filter exchange.

## DUST EXTRACTOR VAC 35 M

ltem No.	Product	Description	
19007	VAC 35 M	1600 watt power, 2 polyester filter cartridges, filter monitoring by means of pilot light; socket for power tools with soft start and run-on; Capacity: 25 litres of dust, Sound pressure level: 69 dB(A), weight: 15.5 kg, Power cable: 8 m, Hose length: 5 m (antistatic hose), Hose connection: 0 35 mm

# BETTER. MIXING. KNOW-HOW.

We have always worked closely with the construction chemistry industry. This means we are often directly involved in the development of new, high-performance materials. Because material manufacturers know that we are the experts in mixing. Sharing our knowledge so that everyone on the construction site can achieve the absolute best results is perhaps our most important task. For this purpose we have established a modern training and development centre in Gaimersheim: the Collomix technikum

# O Collornic W1637

## mixing matters.

Collomix products include our world-renowned paddle-mixers, mixing paddles that are designed to handle specific materials, automatic mixers for heavy-duty jobs and workflow tools that are made with the same level of durability as our core products. Each one of these items has been designed to perform, with insight taken directly from the worksite. That's why our name stands for mixing. It's all we do, every day.
