LAVABI

in gres porcellanato

Applicare il gres porcellanato per l'arredo bagno è una soluzione ecocompatibile e garantisce design durabilità e resistenza.

I nostri lavabi in gres porcellanato sono composti da 3 cm di supporto tecnico e strutturale, sul quale viene applicato un collante epossidico bicomponente e incollata una lastra di 3mm/10 mm di spessore.

La forza di questo prodotto è che non assorbe umidità e acqua, resiste al calore e i colori del materiale rimangono invariati negli anni, anche il bianco puro.

È un materiale molto robusto ed è ecologico e lavabile con prodotti a base acida.
