P&G RESPONSIBLE BEAUTY

2030 GOALS
P&G RESPONSIBLE BEAUTY

P&G RESPONSIBLE BEAUTY DEMONSTRATES our commitment to be a positive force for beauty in the world. It is a systems-thinking approach to beauty that recognizes the interdependence of five essential principles — Quality & Performance, Safety, Sustainability, Transparency, and Equality & Inclusion.

P&G Responsible Beauty ensures that every product delivers best-in-class performance—one of our historical strengths, and that every product has been designed, formulated, and produced with the health and safety of you, your community, and the world in mind. P&G Responsible Beauty works to make our world better by promoting conversations and influencing attitudes to drive positive change within society and for the environment.

FIVE INTERCONNECTED GUIDING PRINCIPLES

QUALITY AND PERFORMANCE
It all starts with understanding the diverse beauty needs and desires of women and men all over the world. Our products deliver outstanding and noticeable benefits. We use high-quality ingredients from both science and nature, and our product testing goes far beyond industry standards.

EQUALITY AND INCLUSION
We are elevating diversity & inclusion beyond female representation to drive Equality & Inclusion for all people of different races, ethnicities, cultures, spirituality, sexual orientations, gender identities, abilities and backgrounds, within our teams, through our products, in our communication, and across our supply chain.

TRANSPARENCY
Always honest, transparent, and accountable. We work to provide clear, reliable, and accessible information about our ingredients, our products, and our progress, while ensuring that concerns from all stakeholders are heard and addressed. We foster a work environment that encourages open communication, and share technologies, programs and processes to help the beauty industry have a bigger, positive impact on the world.

SAFETY
For over 181 years, safety has been at the heart of what P&G does. Before considering an ingredient or marketing a product, we apply the highest scientific safety standards, often exceeding those of leading independent and regulatory authorities, to ensure every ingredient’s safety and that all products are safe and recognized as safe by scientists, NGOs, and consumers.

SUSTAINABILITY
We use our brands and our scale as a positive force for Beauty in the world to benefit people and the planet. We focus on the greatest opportunities for environmental, social and economic impact. We hold our business partners to the same high standards we have set for ourselves: to use resources responsibly, to preserve the environment, act with social responsibility, respect human rights, and to reduce environmental footprint.
P&G’s Ambition 2030 Goals are the foundational goals of P&G Beauty. For our P&G Responsible Beauty platform we have set additional broad-reaching goals. These goals represent our vision to be a positive force for beauty in the world. We have set these goals to help get us closer to achieving that vision, but we don’t have all the answers. As we move forward together with our partners, we will evolve and update our goals as we continue to learn.
RESPONSIBLE BRANDS

OUR brands leverage their voice in communication to promote social and environmental sustainability:

- Incorporate positive environmental cues in production and communication.
- Promote equality and inclusion.
- Rinse-off products: encourage water conservation behavior amongst consumers.

PROMOTE fair and equal representation in advertising and its production across gender, race, and ethnicity.

MAKE all Beauty priority communication tools sight- and hearing-impaired accessible by 2025, starting with newly created brand communications in 2021.

OUR brands are transparent about ingredients and share the brand’s safety science.

RESPONSIBLE INNOVATION & INGREDIENTS

PROVIDE water-efficient products and waterless product innovation to consumers, focusing on priority water-stressed markets.

100% of priority botanical ingredients are identified by the Royal Botanic Garden, Kew.

REDUCE the environmental footprint of our products, i.e., using fewer ingredients and improving the biodegradability of our rinse-off formulas around the world.

PRIORITIZE the use of responsibly sourced bio-based materials or materials prepared using green chemistry principles.

FUEL category-changing innovation by partnering with start ups in emerging ‘green areas’ such as bio-tech and nature-identical materials, green chemistry and sustainable materials.

ACTIVELY seek and become a leader in supporting start ups and cooperatives that are female owned/led.

ENSURE we have diverse teams supported by an inclusive environment in all sectors of our research & development enterprise.

MAKE publicly available game-changing technologies, programs and processes to help the beauty industry have a bigger, positive impact on the world.
RESPONSIBLE SUPPLY CHAIN

**REDUCE** our footprint and strive for circular solutions:

- **100%** renewable electricity.
- **50%** reduction in greenhouse gas.
- **35%** increase in water efficiency.
- **100%** of sites are Zero Waste to Landfill.

**RESPONSIBLE** sourcing of priority ingredients of natural origin, including 100% RSPO certified palm oil / palm kernel oil and derivatives by 2022.

**JOIN** forces with our External Business Partners and leverage our combined scale to drive environmental sustainability and social responsibility performance, programs, and outcomes.

**MANUFACTURING** sites in priority water-stress markets / basins for P&G Beauty are locally engaged to help protect water for people and nature.

**BECOME** a leader in supporting businesses owned & led by women and diverse groups along all areas of our value chain by 2025.

**CREATE** and nurture Kew-inspired gardens to teach employees about biodiversity at all P&G Beauty manufacturing sites.

RESPONSIBLE PACKAGING

**100%** recyclable or reusable by 2030. By 2025: 90% of our major packaging platforms will be recyclable or reusable across P&G Beauty.

**50%** reduction in the use of virgin fossil-based plastic by 2025 across P&G Beauty.

**DRIVE** significant increase in the use of refills across P&G Beauty via consumer behavior change; new packaging approaches, novel chemistry & new business models.

**PROMOTE** the use of responsibly-sourced bio-based materials and circular materials.

**MAKE** our packaging more accessible for people with disabilities starting with including tactile markings for sight-impaired people on our hair care and body wash bottles by 2025.
“WITH P&G RESPONSIBLE BEAUTY WE HAVE SET STANDARDS THAT ENSURE BETTER PRODUCTS AND A BETTER WORLD FOR PEOPLE AND OUR PLANET”

—ALEX KEITH, CEO, P&G BEAUTY
