

BMI Icopal Profiles XL FireSmart

Concrete Deck: Warm Roof System

System features and benefits

Profiles XL Firesmart

- A multi-layer, warm roof waterproofing solution incorporating Thermazone PIR insulation.
- High-quality SBS modified bitumen membranes for flexibility.
- Exceptional durability for long-lasting peace of mind.
- Compatible with self-adhesive membranes for flame-free detailing.
- Installed via IMA Approved Contractor Network
- Incorporates FireSmart technology for safety and compliance.
- Extended guarantee available up to 25 years.

Quality without compromise

BMI Icopal Profiles is the UK's premier range of tried-and-tested bitumen roofing systems. Perfectly suited to the UK climate and the demands of UK projects, Profiles combines premium systems, professional installation, and the support of our flat roofing experts, from specification, design and diagnostics, to full system and workmanship guarantees. Putting quality at the core, **Profiles gives you control, cost certainty and confidence that your roofs will perform and protect your clients' investment for longer** – without compromise.

TorchSafe™

Profiles systems are available with the combination of self-adhesive membranes using a thermally activated application for a Safe2Torch compliant system.

Every application, expertly installed

Profiles is suitable for a wide range of flat roofing projects, environments and sectors, including education, healthcare, public and government, commercial, industrial and residential buildings. The support behind the system makes it the ideal choice when quality, durability and performance are critical – especially as Profiles is exclusively installed by contractors approved by the Intelligent Membrane Association. IMA contractors adhere to the highest standards of quality, workmanship, and health and safety – meaning the installation of your roof is in the very best hands.
