

BMI Icopal Thermaweld

Concrete Deck: Cold Roof System

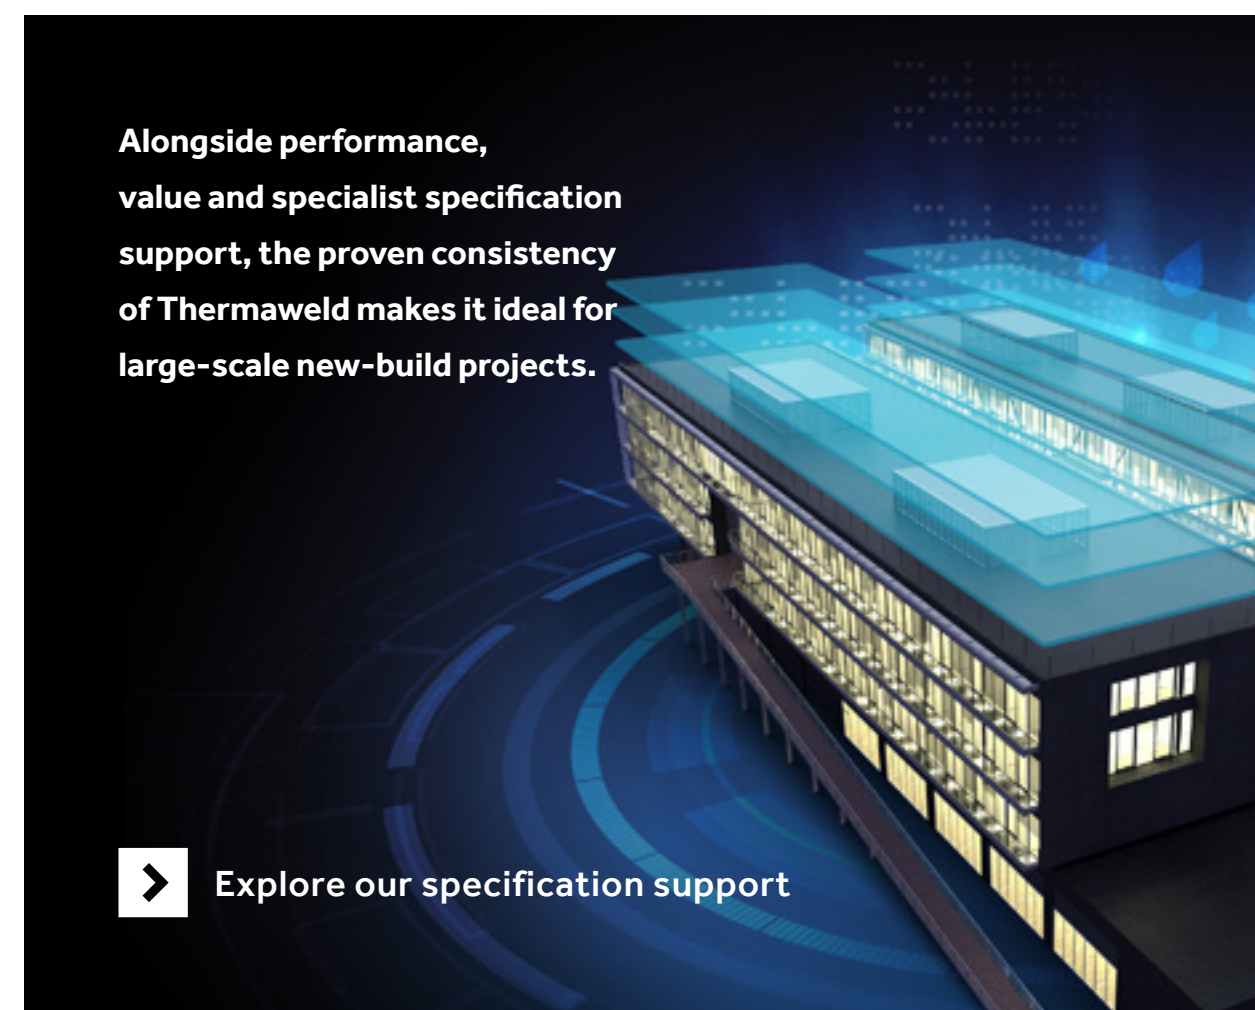

System features and benefits

- Safer low-flame application thanks to our technically advanced, low-heat-reactive SBS modified bitumen formulation
- Designed and manufactured in the UK to meet our unique environment and project demands
- Thermaweld is time-tested and proven to deliver outstanding durability, with an expected service life of at least 35 years
- Thermaweld is tailored and trusted to deliver the quality and finish you demand for every project, with Icopal's full technical support, from design and site monitoring through to guarantees
- Installed by IMA and Team Icopal-approved contractors. Project quality monitoring and sign-off is provided by the Icopal Site Inspection Team for projects requiring a system guarantee
- Reduced gas consumption and faster installation thanks to our unique mini groove profile technology
- Incorporates FireSmart® technology, a fire-retardant additive, for fully tested fire safety
- Thermaweld can be covered by an Icopal product guarantee of up to 25 years, as well as the option of a full 20-year system guarantee when installed by an Icopal-approved contractor

Tested. Trusted. Tailored.

BMI Icopal Thermaweld is our tried and trusted bituminous waterproofing system, delivering tailored roofing solutions that guarantee longevity. That's why Thermaweld is ideal for large-scale commercial and new build projects. Delivering solid performance over a long lifetime of low risk and low maintenance, enabling safe installation practices and peace of mind, Thermaweld is a complete system backed by the tailored service of Icopal's specification and technical team – from design to handover.

System layer	Product
1 Primer	Siplast Primer
2 Underlay	Total Torch VDL
3 Cap sheet	Thermaweld FireSmart
4 Detailing underlay	TorchSafe TA Detailing Underlay

Alongside performance, value and specialist specification support, the proven consistency of Thermaweld makes it ideal for large-scale new-build projects.

Built on trust

Thermaweld is a proven bituminous waterproofing system that delivers tailored roofing solutions guaranteeing longevity. It can be installed by either our premium approved contractor network, the Intelligent Membrane Association (IMA), or by our Team Icopal-approved contractor network. Our teams will help you with a specification based on your precise project needs, including on-site support, site inspections, technical calculations and certification. Also, our approved installer network, featuring contractors approved by the IMA, ensures you are guaranteed exceptional service, skill and roofing expertise, start to finish.
